## The All Developers Summit (ADSum) – Tanzania

### Introduction

All Developers Summit is Hosanna Higher Technologies' Initiative to Bring together Senior Software Engineers and Juniors or the curious for a common goal, namely Sharing knowledge, passion and Leadership skills thereby making a continuous chain of IT experts. It is intended to provide a solid platform for Professional Engineers to impart what they have to the Juniors and the developers Wanna be. The process is supposed to ensure continuous presence of Professional Software Engineers in the Nation, to fulfill the wider mission by Hosanna Higher Technologies namely, to make sure Tanzania a Software Engineering Hub in Africa, beginning with East and Central Africa. The Conference is Organized by Hosanna Higher Technologies with collaboration with sponsors who can be individuals or companies.

Currently, the Summit is planned to be an annual event.

### Vision

ADSum as part of our said wider mission, exists to stir Leadership, Integrity, Innovation, Passion, Knowledge and Competence in young generation of Software Engineers and those who aspire to be Informatics Nerds regardless of their profession, and cement them in senior developers. We believe that the said qualities are necessary for Tanzania to become the hub we dream of, and so the core of the Summit is to impart and cement them into attendees.

### Mission

The ADSum have few mission statements that, we believe, will make our vision a reality. The mission includes: (1) Initiating People of divers professions into Software Engineering Field/Informatics (2) Produce Software Engineers with Passion, Innovation, Integrity, Knowledge and Competence (3) Help turning projects into Startups by marketing them to potential funders/buyers (4) Making Leaders that will drive our wider National Vision home (5) Make Platform for Networking and Enjoying together among the interested.

### Participants

Participants for ADSum are divided into four categories which are Students, Junior Developers and Wanna Bees, Senior Developers/Software Engineers and Potential Investors in Informatics Sector.

The Students can be coming from any field, but he or she must be passionate about Informatics, specifically Software Engineering. So Law, Accounting, Social and Computer Sciences students for example can be part of the Summit. We believe anyone from any field can be expert Software Engineer without dumping his career profession.

Second group is for Junior developers and those who work in other fields but aspire to be Software Engineers. This group is the same as students with exception that they are no longer students for some reason. The two groups needs encouragement, training and other necessities of a Software Developer which brings us to the third group, the experts.

The Senior developers/Engineers are those who have been in the field for so long and have acquired wealthy amount of expertise. The major tasks of this group is twofold. First Impart their expertise on young developers and wanna be and sharpen each other among the group. Secondly is imparting the Leadership and necessary tactics to maintain the unbreakable chain of excellency in leadership necessary to maintain our wider vision.

The last group is the Venture Capitalists, those who have money and would like to invest on projects turned into startups, companies that deals with IT which can buy the project or employ students who have displayed ingenuity. Its our plan to convince these angel investors, both local and abroad to invest on local projects, as part of empowering local Developers.

## **Costs, Time and Accommodation**

The Conference is free but you must register yourself. There will be limits to the Number of people depending on the capacity of the hall itself for that year. We can make a provision for food caterer but that will not be free though we can and will negotiate for cheaper pricing, to avoid inconvenient movements.

While we do not Provide food and Accommodation (unless someone steps in to sponsor the ADSum accommodation costs), we are ready to negotiate with Hotels if we are requested by people who come from outside the Conference region. The Conference is one day event from morning to evening.

## **Sponsoring Event**

You can help us fulfill the vision. We are ready to work with Individual, University, Company, et al committed to help us drive the vision home. Note that while we allow the Investing Entity to benefit with the Summit, we do not allow entity that will deviate us from the vision or introduce schism among conference members.

If you want to help us sponsor the event here are few things that we need help:

1. If you fall in group number four (Investors/Capitalists/Employers), we would like to invite you in our conferences to pick one project and fund it to its reality or employ a talented student.
2. Fund conference costs. We really want to provide food and accommodation for conference members, but we are not yet capable of that. You can contribute to our budget help us with what is lacking and making our conferences better.
3. Our future plans is to invite the high profiles people like Larry & Brin , Larry Ellison, Bill Gates, Jack Ma, Jeff Bezos and many other Silicon Valley Samurai worriers. Bringing these people is costly work

If You want to help us with this project (financially, or otherwise) or you have questions about the project and its vision, then give us a call or email us. Contacts are at the top of the first page.

*May God bless You and See you there!*
