HOW TO INSTALL ANDROID *jerry been* IN PC

Download:

1. Oracle VM VirtualBox

Download the latest version of VirtualBox from <https://www.virtualbox.org/wiki/Downloads>

2. Android x86 4.3 Image

Download the Android 4.3 image from <http://android-x86.googlecode.com/files/android-x86-4.3-20130725.iso>

Instructions:

1.Install VirtualBox on your PC

2.Open VirtualBox and select New. In the dialog box enter the name as your wish and select i)Type : Linux

ii)Version : Other Linux
and select Next

3.In the next dialog box enter the memory size as your wish

Note : Minimum 1 GB required for JellyBean

and select Next

4.In the next dialog box select create a virtual hard drive now. Then select VDI and select fixed or dynamically allocated as your wish and create the virtual drive

Note : Minimum 1 GB required for installation

5.Select Virtual device and select settings, a dialog box appears. In the dialog box select

i)Storage->Storage Tree->Empty

ii)In the attributes section select the Android 4.3 iso file you downloaded and check Live Cd/Dvd, then click Ok

6.Then start the virtual device. In the screen select Install Android-x86 to hard disk.

HOW TO INSTALL ANDROID *jerry been* IN PC

7. In the next screen select Create/Modify Partition.

8. Then create a new primary bootable partition and select write. After finishing writing select quit.

9. Then install android in sda1 and select type as ext3 , choose yes for installing grub.

10. After installing remove live iso from VirtualBox and reboot. Now you can boot into Android 4.3 .

You are done.

Cheers, enjoy....
