Following the request from mwananchi communications limited, This proposal will shows only a prototype algorithm of the Physical asset management System means the practice of managing the entire lifecycle (design, construction, commissioning, operating, maintaining, repairing, modifying, replacing and decommissioning/disposal) of physical and infrastructure assets such as structures, production and service plant, power, water and waste treatment facilities, distribution networks, transport systems, buildings and other physical assets.

PROPOSED APPROACH OF THE SYSTEM

As required in the Terms of reference from Mwananchi communication Ltd. Our proposed system will be able to manage the entire asset lifecycle from purchase to disposal.

In today's complex and constantly changing environment investment managers need asset management systems that can meet the demands of a modern investment portfolio. Choosing effective asset software can mean the difference between an average investment portfolio and one that generates a significant amount of money. And this is even truer in unpredictable economies where the value of a single investment can fluctuate considerably.

Financial asset management provides a way for investors to realize the full potential of their investments, showing them the risks and costs of the choices that are made. There are many different types of asset systems, each designed to work with specific types of investments, from stocks and bonds, to hedge funds and mutual funds.

Mwananchi Asset management System will keep track of the equipment and inventory vital to day-to-day in business operations, exactly how those assets are managed, though, is highly variable.

Mwananchi Asset management System will be accurate, real-time asset tracking system is Thanks to the cloud and mobile technology, there is indeed a better way to track your assets. MAMS will be extremely intuitive and easy to use.

All that's needed to track your inventory in real time, 24 hours a day, is the mobile device you already carry

PROPOSED VIRTUAL ZONES

MAMS will be an enterprise asset management is the business of processing and enabling information systems that support management of an organization's assets, both physical assets, called "tangible", and non-physical, "intangible" asset

Since Mwananchi Communications has its head office in Dar es Salaam. Our system will comprise of Five virtual zones for the purpose of effective management of Mwananchi assets as the diagram below shows.

Zone 1: Dar

Zone 4: Central

Zone 5: Lake

Zone 2: North

Zone 6: West

Zone 3: South

THE SYSTEM ALOGARITHIM

MAMS will be the bottom line software of the company need and more effective means to track its vital inventory. This asset management system that's not only simple and powerful, but completely customizable and user friend.
