

Job Title: Electrical Technician
Job Location: Moshi, Kilimanjaro
Industry: Manufacturing

Job Summary:

We are looking for Electrical Technician to install, maintain, and repair electrical systems in an industrial setting. The ideal candidate will excel in troubleshooting, preventive maintenance, and ensuring efficient system operation. Strong electrical skills are required for this role.

Main Responsibilities:

- Install, inspect, replace, or fix electrical wiring, outlets, switches, lighting, and other components.
- Test electrical equipment to check for proper function, ensuring correct current, voltage, and resistance.
- Maintain, repair, and test electrical switchgear, transformers, and meters to keep them working efficiently.
- Maintain, repair, and test motors, generators, batteries, and electrical control systems.
- Fix and maintain electrical control systems and devices to minimize downtime.
- Perform regular maintenance to prevent breakdowns and extend equipment life, keeping accurate records.
- Install, maintain, and calibrate industrial instruments to meet performance standards.

Job Requirements:

- Full Technician Certificate (FTC) in Electrical Engineering or equivalent.
- At least two (2) years of working experience as an electrical technician.
- Proven experience in electrical maintenance, installation, and repair in an industrial setting.
- Strong knowledge of electrical wiring, components, systems, and troubleshooting.
- Ability to read and interpret electrical schematics, diagrams, and blueprints.
- Excellent communication and organizational skills.

Deadline 07 April 2025.

Job Title: Plumber
Job Location: Moshi, Kilimanjaro
Industry: Manufacturing

Job Summary:

The Plumber is responsible for installing, maintaining, and repairing plumbing systems and fixtures, ensuring the proper functioning of pipes, taps, valves, and drainage systems.

Main Responsibilities:

- Replace taps, plugs, valves, and other plumbing fixtures.
- Fix leaking pipes and related fittings.
- Clear blockages in drainage systems and waste pipes.
- Install and maintain plumbing systems and water pipes.
- Inspect and test plumbing systems for safety and functionality.
- Clean and disinfect water tanks and perform water treatment services.

- Collaborate with contractors and construction teams on plumbing projects.
- Provide out-of-hours call-out service and perform other assigned tasks.
- Perform additional tasks as assigned by the supervisor.

Job Requirements:

- Certificate or NVA Level I / II or Trade Test Grade III / II in Plumbing and Pipe Fitting or a related field.
- At least two (2) years of working experience as a plumber.
- Ability to define property blueprints to evaluate plumbing layouts.
- Knowledge of cutting, welding, and assembling plumbing systems.
- Ability to collaborate with contractors and other construction professionals.
- Experience with plumbing tools and equipment.
