

Alphonse Francis Kamisa is a graduate of the University of Dar es salaam (UDSM). He holds a Bachelor Degree – BA (Education) Upper Second Class with Honors which he obtained in the year 2001.

He has twenty (20) years of experience in the teaching profession. In his teaching career, he has been teaching Economics and General Studies. Currently, he is the Deputy Principal – Academic at Baobab Secondary School located in Mapinga, Bagamoyo.

He has already written another book called, “A Comprehensive Approach in Economics for Advanced Level Paper One” published in 2016.

Currently, he is in the final process of writing another book of General Studies, which will make a course on General Studies easier.

“Excel in General Studies” is a review Book written on the basis of questions and answers approach. The questions and the corresponding model answers are arranged topic wise and they follow the same pattern as shown by the Syllabus. There are 108 questions with their corresponding model answers.

It should be recalled that these are “model” answers and that; the book must be read together with other General Studies’ books to supplement the knowledge effectively. Students are urged to use these questions and model answers in their groups, to discuss them and add up more points. The Author discourages a mere cramming of the points given in the book, rather students are advised to get an in-depth knowledge and understanding of the concepts.

If the book is used properly, for sure students will “excel in General Studies” and show a high degree of understanding of the World.

Thank you so much, and enjoy your study.
