“Strength to comprehend with all the saints what is the breadth and length and height and depth, of LOVE”

> Ephesians 3:18 <

Cat Stories and Culture

[quote=Tardisman]I am thinking it would be best to start with what the girls “up there” have said.

Papriananda Swaruu 9 (I hope I have spelled her name right) often said:

- Everything (matter) is composed of “Gravity” from “Potential Energy” which begins with a thought, or an idea (creative consciousness).

...

She also mentioned that the Taygetans and other cosmic races have the ability to convert electrical energy into Matter.

Perhaps Steve was on the right track.

Time for dinner and to see if Mari has any more Cat stories.

I love that stuff :)

Good Night.[/quote]

Cats stories... They are awesome!

Lets hope fellas 'hear 'em out'-- The Real Big Cats themselves are not 'feeling' humanoid depiction/graphics pertinent to their literal physical attributions O.o

Mari Swaruu recently has shared some things about their 'religious observations'--something which blesses all of us with ample room for contemplation on 'superstructure' highlighting their social persistence--what is that co-essence and/or possibilities that we all share in the universe(?)

'Superstructure' -- talking superstructure as such to illuminate upon typical benign facets/aspects of religiously charged cultural inductions; that is, human and/or feline culture in terms of social integrity, progress and (r)evolutions... How cultures derive their 'power/juice of life' from the 'sociological imaginations' and 'social constructs' as imbibed in their collective 'perceptual agreements'.

Collective perceptual agreements can be influenced by an ideal thought/conception which draw sharp contrast of 'Sun of

Awareness' to illuminate ways of life, self conduct and shared purpose to be or not to be.

'Superstructure' pertinent to any integral society supercharging the collective attentions/intentions/re-orientations for 'Being and Becoming'.

The Great Cosmic Cat is the 'Superstructure' for the Felines; in this regard 'sensational' concordance for 'physical' and 'metaphysical' attributes derive corporeal constitution to determine capacity, functionality and virtue of Being and Becoming...

I as a person, with humanistic frame of reference, associate the 'Cosmic Cat' with 'sociological imaginations' that shape 'individual destiny' consistence with the spirit of bravery--bravery with utterly no remorse for action done with 'pure intention'. Urmahs themselves dismiss the 'Cosmic Cat' myth...

With 'total awareness' in act of killing for example--KARMA DOES NOT APPLY in such a case; if such an act is done with depth of resolve that roots in consciousness beyond 'death'.

Killing when not rooted beyond consciousness beyond death may result in 'nightmares/recurring dreams', 'self defeating sequences' and 'guilty consciousness'.

It is because of these three whoever kills in vain shall live to be 'killed' and taste the menace of 'half baked resolves/superficiality of ill intentions' towards others; in one way or another--one life or another.

Thus, in certain context this may sound intriguing to curious minds--typical curious minds with 'karmic indoctrination'.

Keen observation of thoughts, thus due diligence in regard to feelings and intentions in oneself, for the sake of unquestionable righteousness, and under right contexts of 'spiritual' and 'moral' and 'ethical' conducts, frees oneself from 'self defeating sequences' along the incarnational prospects/destiny--one life and/or the other...

Characteristic life pertaining to this typical 'warrior life' is well depicted in the movie [The Last Samurai](#) , starring Tom Crusie and Ken Watanabe...

SAMURAI Warrior lives a life observing his 'religious obligations', [no mind](#) in executive acting moments/[perfection](#) when indulging in sensations of life, while his spiritual, moral and ethical conduct derive their meaning through 'Service' to others -- protecting the ways of life and culture of one's immediate community/society.

Samurai's Sword conveys noble intentions over courage, determination and honor to defend individual culture and dignity--with no compromise; a community leader that has failed to 'protect' his community, he willingly subject himself for '[Hara-Kiri](#)'...

Samurai's way of life so identical to what Mari portray of the Urmah culture...

In that movie, the Last Samurai, it can be seen Katsumoto--Samurai Warrior and community leader, at the very beginning of the story, while calmly meditating upon the clear hills of Japanese land, he has 'recollections of fierce battles'-- from 'inner memories' also along with it, a haunting encounter with 'Tiger's Eyes' in his mind's eye...

'Tiger's eyes depiction/notion' is very 'symbolic'; and analogous to the 'Cosmic Cat'... Subconscious epitomization of 'Bravery and Strength'.

====

Technical Forum and Cultural Ramifications

Now how can this serve our 'common motive' for 'Technical Forum'(?)

Well, this is the perfect opportunity to derive the 'cultural ramifications' and implications of 'technical developments' in connection to the spirit of 'religious obligation'--and it is thus-- so crucial.

That movie, the Last Samurai, provides us with thematic observations to comprehend 'traditional community values for cultural integrity' vs 'the State Mind' pertinent to an individual.

It provides us with the base to 'study' communities/society—community/societies in transition--emerging societies with new forms/contexts of 'institutionalization' ...

If one typologically knows those 'metaphysical aspects' to 'ontology of institution' then s/he knows how a certain house (state/country/civilization) can stand , and how it is likely to disintegrate with time due to shifting states of collective social integrity/consciousness/awareness/sen.

Our recurring talk theme of 'control society' versus 'docile world population' can be dismantled into 'religious', 'State' and 'Educational' contexts of social striving; thus, technical forum has to 'integrate'--integrate so that to instigate coherence in our common insights pertaining to energy, consciousness and know-how – know how pertaining to those two agents of change, thus how can possibly serve as the platform of disentangling 'unwarranted control structure/influences'.

Let it be known, these beget matters beyond ordinary understanding of societies -- societies in transition and/or making; yet the time has arrived, with auspiciousness of Education 2.0: Systems View and Thinking in the wide global community, 'people can relate 'em better'...

As Societies, our technical/technological development ought not 'capsize' our 'spiritual development'; having more awareness pertinent to 'rational interpretative depths', 'intentions' and 'functional structures/systems' implies 'capacity' for 'spiritual development'. Thus we can progress **from** 'less effective' social structures and human performance/experience **into** 'more satisfying' and 'improved' orientations in matters and affairs.

As of now, early 2024, global community is being 'spiritually capsized' to benefit the status quo--what status quo?

Unholy 'Triune' of 'Religion', 'State' and 'Educational' bodies...

This intriguing 'triune', through 'topothink' and deploying framework of system view and thinking—Education 2.0, coincides with a set of depictions as portrayed by Blessed sister Yazhi on the >[‘Three Horns’ of the Real Earthly Terrestrial Power](#) < -- Earthly Terrestrial Power for Influencing Populations; something which parallels an interesting observation: which three city-states are actually 'sovereignty' and within the sovereign states/countries(?)

Now, Education 2.0—[Using framework of System View and Thinking](#) has a 'Tipping Point' of 'Spirituality Balance' in the community/society as 'Genetics'--point 'OY' along the plane of 'Social Capacity' to maintain and/or transform its inherent 'Institutions': Ontology of Institutions. This is key to comprehending literally any institution, terrestrial or even extraterrestrial, given the subjects in study are 'sentient' characters of functional consciousness with body/mind/spirit complexion.

This 'OY' point represents the 'Seed of Awareness' for self control rooting on 'Matrix and Being' in Oneself. Blessed sister Yazhi is on point as she delves into a study question—are those >[‘deep controllers’, covert subjects of the Earthly society's control structures, really humans\(?\)](#) .

This gets down to bog down with 'Genetics' and 'Genome' – gravitational mechanics of corporeality and consciousness to intertwine 'Soul Intentions' and 'Rational Interpretative Depths' thus the basis of [‘I think, therefore I am’](#) : 'Being and Nature' of

Oneself. Again this holds key to ‘perceptual agreements’ in societies as a ‘nominal effect’ over what they apply in terms of actions/self conduct, and what they expect to get out of their living Matrix. Individual society members operate by ‘attracting/cooperating/allowing’ or ‘repelling/blocking’ collective thoughts that define their Matrix reality—and universally.

It is crucial for communities and societies in transition, 2024 and beyond, to equip themselves with Education 1.0, Education 2.0 and Education 3.0 for the purpose of self bestowing formidable capacity to comprehend ‘the Matrix’.

Blessed Sister Yazhi, on >[Holistic Society on Earth, Extraterrestrial Society on Earth](#)< articulated key themes that ‘maintain earthly society’ in ‘control of the few’ – those few with ‘means’ and ‘needs to act’ so. First and foremost, it is very important to realize/comprehend/understand/get aware that ‘control’ is not ‘evil’; as it is an integral part of any living process.

Education 1.0, 2.0 and 3.0 edifies ‘knowledge’ so that ‘Self Awareness, Self Capacity and Transcendental Self-Determination’ becomes a reality in Oneself.

The concept of ‘Control’ is not supposedly to be ‘evil’ when ‘Transcendental Self-Determination’ is founded upon auspicious soul disposition – soul disposition which is not engulfed by ‘limited ideas’ pertinent to self, inner and outer reality in regard to ‘Oneself’.

Talking about spiritual, moral and ethical self conducts—this matter discussion is the focal point of ‘self capacity’ to free oneself from ‘unwarranted influences’ and thus escape the Matrix—Matrix as the collective perceptual agreements which ties individuals to ‘Time’. This makes ‘Time’ as a core subject -- deeming it to be thus key unto ‘self realization’ ; >[When the Swaruu invests much in articulating the essence of ‘time’](#)<, all of this is due to its implications within the intrinsic nature of ‘Being’--Nature, Being and Consciousness.

=====

<https://www.youtube.com/watch?v=wapCTd5fS2Y>

=====

Religions and Time Sensibilities

All religions exploit 'time implications' in 'self and/or being' to wield structural influences on social behavior/conduct pertinent to a certain prescribed individual/social/collective composure. In this regard, 'applied consciousness' in a living being/system is 'functional sentience'; and again, its 'functional capability/willingness' to act the way it acts in any given situation. It is at this juncture 'Mind' play role as an interface between consciousness, living matrix and 'sentience'. Depending upon the complexion of 'living being/matter/organism', living and acting tendencies are influenced by 'thoughts/instincts' reverberating with 'sensations and feelings' defining 'self actuating' domain. Thus metaphysically, Soul is the focal point of functioning intelligence, actuating 'self expression' and 'being-ness'--being-ness within a certain domain level of activity.

Religions targets 'Souls' factor of living communities/individual/society to influence 'social structures' and 'inherent symbolic interactions'. In a way, religions are 'systematic social control structure' set to target specific self organizational tendencies.

With the dawn of Education 1.0, 2.0 and 3.0, the world population is going to come face to face with 'facts and/or fallacies' of 'Being and/or Nature'. All >[dogmas](#)< , consequent legitimacy of prevailing scriptures and eventually echoing mundane/secular laws are going to be exposed their 'limited' and so misconstrued 'logical ideas' pertinent to 'Life, Working Models and Truth'. Those who know better, are capable of doing better, thus dropping old patterns of belief/thinking, thus changing their ways for the better.

With prominence of Education 1.0, 2.0 and 3.0 it should not surprise anyone to find out 'State' and 'Education' enterprise of the world follow a possible hidden 'Religious Structure' for the sake of 'Institutional Prominence' – Power Struggle over the destiny of World Population. In this regard, 'Religious Structure' can prevail – do prevail through 'Systems Operations and Intelligence ' that dictate world events through covert strategies. Thus, at the top of

control structure, society can be ‘controlled’ by institution which ‘Plays God’ /‘Imitate God like Principles’ /Has the sense of Entitlement to dominate religious beliefs of populations all over the world.

With prominence of Education 1.0, 2.0 and 3.0, ‘the Church’ will not necessarily succumb to alienation and/or condemnation due to ‘religious technicalities’ related to ‘mass indoctrination’ . Even though the world is going to realize there have been ‘evidence’ of historically inconsistent ‘religious content’ purported by the ‘church organization’ and for the purpose of ‘Christianizing’ population – the Church has to be forgiven and is going to be ‘forgiven’ by those who know better and choose better. These are ‘people who are not going to wait for the church to confess’ rather do the right thing at the right time for the good of the past and the future.

With prominence of Education 1.0, 2.0 and 3.0, ‘THE CHURCH’ IS GOING TO UNDERGO GRADUAL GREAT TRANSFORMATIONS. In this regard, such transformations are going to be the result of ‘actionable choice making amongst insiders and outsiders’ of the church institution itself.

Education 3.0 is going to provide revelation keys to comprehend how ‘the Church’ itself has been/is a ‘hot bed’ of conflicting intentions over ‘religious supremacy’ ; with ‘esoteric and exoteric’ agencies determining its state of integrity for both—the good and the bad, and all over the times.

=====

<https://www.youtube.com/watch?v=xUbkehgxJ9o>

=====

The Good and the Bad of Religion (s)

The good and the bad of ‘the Church’ encompass all aspects of its systematic function/operation in terms of perpetuating ‘fallible doctrines’ and thus technically perpetuating ‘spiritually capsized’ institution of ‘spiritual, moral and ethical’ integrity which exploits basal feeling, instincts and comprehension epitomizing ‘FEAR’, ‘GUILTY SELF CONSCIOUSNESS’ and limiting the concept/notion

of 'LOVE'. In this regard, targeted mass consciousness is the one associated with basal feelings, knowledge and/or aptitude—mundane existence. Cementing the 'separation between God and Man' for 'control purpose' of human disposition, nature of his performance and set parameters. Parameter well crafted to suite/ be compatible with 'limited man/humanity', as vulnerable as he can ever consider him/herself in him 'mortal life'.

The good and the bad of 'the Church' encompass all aspects of its systematic function/operation in terms of perpetuating 'fallible doctrines' and thus technically perpetuating 'spiritually capsized' institution of 'spiritual, moral and ethical' integrity which edifies the adage: there is the way that seemeth right unto the eyes of men, but the end thereof are the ways of Death. Religious models, can easily be systematically maneuvered and/or crafted to suite 'ideological control for the masses/population', by few -- in the know, who covertly pursue a certain course of action to appeal to the masses with typically 'spirituality of imitation' – spirituality of imitation with no 'real light' of 'the causeless cause' but dazzling affairs of spiritual vanity—simple or sophisticated vain self-determination in spiritually blind recourses.

The good and the bad of 'the Church' encompass all aspects of its systematic function/operation in terms of perpetuating 'fallible doctrines' for Faith, Hope and Charity; as they are being 'mistranslated' for say 'vain human institutions' to thus support 'State/Military', 'Education/Cultural organizations' in clandestine ways. Thus 'the Church' as an Institution, has its inherent 'intelligence body' that makes its 'mission' formidable, consistent and effective. This ought not surprise any 'performing body' has got to have 'institutional memory'; such is 'key' to any functioning system—product of any 'institution' with 'time' is 'A system'...

As it was noted in Marshall Vian Summers' book, Greater Community Spirituality, in some way the 'church' as a 'Christian institution', over the time since its emergence—post 'Jesus' Christ era, has been monumental in 'uniting' people(clans and tribes), nations and races of the world into a state consciousness—one which is much more 'pro-peace' and 'hopeful' for fending off possible 'inauspicious interventions' of visitors from the 'greater

community’--the ‘mingling affairs of ‘non terrestrial people in ‘physical constitutions/incarnated bodies/star faring vehicles’ on Earthly societies. Yet, ‘the Church’ certainly has its ‘dark side’ and ‘hopeful side’.

Both sides, dark and hopeful one, are dependent upon the ‘mass consciousness of its Christian congregation’ and ‘Church Organization’ as a ‘passive/active control structure’--that which in Christian sciences is known as ‘Pastoral service’ . Technically, passive element is achieved by ‘indoctrination’ which qualify ‘credible belief system’ for the mass—willing mass which do not ‘question’ the authenticity of ‘religious claims’ pertinent to ‘the Church’ itself. All questionable things are thus systematically and actively imposed to the mass as various contexts of ‘infallibility’ of ‘the Church Authority’—things that the Church, as a formal institution, demands its congregation to adhere to, and without ‘doubtfully questioning their faiths/allegiance’ to the Church and ‘the God’ it claims to represent.

It is crucial to understand ‘the systems’ – any system; for without this typical ‘overstanding’, societies won’t be able to overcome ‘duality’. Any viable context of ‘me and/or you’, I and God etc, is polarization actuated by ‘self Ideology’ influencing the state of being and/or activity. In this regard, within similar token, all prospects of ‘administrators’ and ‘subject-able people’ is the ‘control game’--overtly and/or covertly the same. This yields ‘Ontology of Institutions’; how all ‘self organizing entities’ can forge contexts of ‘self determination’ within the triangulation of ‘sensations, structures and influences’.

=====

<https://www.youtube.com/watch?v=yLNvyntdoDs>

=====

Education, Religion(s) and Nation-States

In this world, and as per prevalent state of affair, that thing which is termed as ‘Education’ in actual essence is ‘partial enterprise’ to the ‘whole truth’--in nearly all and everything related to human knowing and/or knowledge. It is a credible tool for maintaining

‘status quo’ in many regards—with prominence of ‘Religion and Science’ to control all possible ‘enterprise facets’ of social thriving, development and ‘credible Spiritual Redemption’. Thus it implies, within certain technicalities, it is possible to ‘control populations’ by instituting ‘States’--‘state functioning’ which sells ‘dreams’ and promises ‘security’ to its subjected population.

Viable contexts of ‘Dream’ and ‘Security’, it is all about ‘Freedom, Brotherhood, Justice and Peace’ in all Mankind. These are primal elements of auspiciously functioning state; remarkable contexts of possible self determination that ‘sells’ to the masses and so forth forging ‘positive orientations’ in community development. They do encompass social, economic and environmental ‘enterprise facets’ of ‘state of being’ and ‘operating’ societies. In this regard, ‘States’ are ‘unit enterprises’ that overshadow ‘separative’ domains of sovereignty over lands and the ‘collective will’ of the people.

‘The State-Being’ is a ‘functional self ideology’ to foster ‘power and glory’ of a particular nation.

Nation as a group of people with ‘a single purpose’ over their prevailing states of affairs and being, remarks ‘self interest’ along with ‘institutional settings’ for the course of ‘liberty’ and ‘justice’ amongst its population. In this regard, any ‘State’ is, in actual essence, an institution—institution within an ‘institution of governance’. Thus, in the liberal democratic institutions, the will of the people is accorded within the extensive framework of Laws, Regulations and Bill of Rights.

A Government for example, is a ‘governing institution’ within the prominence of ‘the State Institution’ whereby the realization of article of faith in between ‘the State’ and ‘the People’ is implemented—co-existence as ‘One nation’ under the rule of Laws whereby ‘every one can be equal before the eyes of the Law’. Therefore, ‘People’s Republic and its will’ is within the primal articulation of the ‘proclaimed Nation-State’ --Such in the ‘self determined course’ for ‘Personal Liberty’, ‘Right to Life’, and the ‘Pursuit of Happiness’--prevailing above all ‘Institutions’ in the nation of people.

‘Single Purpose’ of any nation-state is to develop itself, prosper and thrive. In this regard, development is a typical shifting reality from the ‘poor state’ of the collective welfare to the better one. It is ‘transformation from unsatisfactory states of being’ to satisfactory one augmented by the supposedly ‘collective feelings’ and ‘rational comprehension’ pertinent to the prevailing state of affairs, within its community and citizenry; [and in regard to their social, economic and environmental prominence](#) .

This constitute an important observation, a typical prevalent education modality today, up to 2024, is Education 1.0.

Education 1.0 is all about polarizing ‘the Rulers’ and ‘the Ruled’ in all spheres of life; thus any typical ‘Rule of Law’ is a technical improvisation for ‘institutional settings’ which paramounts ‘few over many’ in determining the ‘control’ of society. [Elitism](#) is a notable example; it is typical ‘knowledge basis’ rooting, utmost, on ‘senses and memory’ thus limited sense of consciousness.

‘Senses and Memory’ constitute a rudimentary ‘survival mechanism’ which have direct ties/involvement to ‘sensibilities’, ‘structure’ and ‘influences’ yet limits the state of functioning in living systems, ‘being and nature’; [‘Genetics’ and ‘Genetic Mind’](#) for example has forged the basis of our evolution and/or adaptation to our physical environment to thus contribute to all primal intelligences related to instincts, reflects and archetypal navigation to content generated through our senses, mind and cognition process.

Just like [‘Institutional Memory’](#) is key to ‘human socio-economic performance’, thus in overall ‘social and cultural’ aspects—Education 1.0 is exploited the same in ‘Religions/religious structure’ to foster systematic control of ‘thought process’ in rational individuals—‘self awareness’ in terms of ‘depths of rationality’ versus ‘sensibilities’. In this regard, emotions and especially FEAR can be the formidable tool to shape the behavior of the masses. Typically, fear for survival for example, can be utilized in ‘nation-state’ contexts to forge basis for the collective sentiments over ‘defense’, thus trigger ‘military orientations’ to safeguard ‘broad-sense social interests’. Technically, a religion can be the agent of shaping the mass consciousness for ‘war’ and ‘peace’ in the

'Statecraft' -- as it is always, religious institutions/structures, have been strategic allies to 'the States'.

It is due to this nature of 'broad-sense social interests' of 'the States', all across the world, 'the Church' is in actual sense a major player contributing to the 'world peace' and 'social capacity building' – in the vast global population and for the sake of 'Global Social Stability'... In this regard, 'the Church' does not need to boast within any contextual capacity in terms of ally/self 'military power' for such 'strategic position' can easily be 'outmaneuvered' by 'diligent Intelligence' that operates with/through infiltration/strategic collaboration/diplomacy ; to ensure 'mutual interests' of 'the Church' and 'any State'. Similarly, the Church does not need to boast 'monetary/resources' greatness--but any one who knows better can ascertain its 'unbeatable' bounties/resource pool...

For the sake of 'Global Social Stability', all world 'military interests' and 'financial interests' can be under the influence of 'the Church' in clandestine ways —something that ought not surprise anyone. Thus, it should not be interpreted as a sign of 'the bad thing'... As it is all about 'institutional intricateness and/or imperatives' – the reflection of 'Self Preservation' disposition.

The greatest fear of 'the Church' is 'disclosure' ; this goes all the way to the overall educational system which purports 'materialistic sciences' . Any event of 'disclosure' or exposing news of 'Extraterrestrials' visitation(s) will pose a a great threat to 'status quo' on Earth. For any such occurrence, if not 'well managed', will impact 'public trust' over 'government/state' powers.

In case of uncontrolled publicity in regard to ET visitations, this matter may cause the World population to start questioning many things -- like 'how much are the military' establishment/states/governments on Earth really 'have capacity'/'prepared' to protect the world population against E.Ts like they are supposed to in general(?); All religions too, are going to be subjected to 'hard questions' in regard to their doctrinal authenticity; and in regard to the purported 'Heavenly God' surveying and accounting everything on Earth; 'Creational Stories' and more so, the veracity of 'presupposed/Ordained Pastoral

Ministry’ of the Church itself—is it a fabrication of grand scheme or what-not(?)

In this regard, it is ridiculous to think ‘the Church’ does not know anything about the Extraterrestrial Visitations on Earth—regardless of any ‘Plausible deniability’

; Tactically, in order for the Church to wield extended power and influence over ‘the states’ , and the international community in general, ET matters are OVERLY ‘in the know basis’ and handled by ‘the Church’ in a very ‘prime way’—and this shouldn’t surprise anyone.

Classifying ‘ET matters’ into ‘Top Secret’ ones while exchanging certain information pool is an enterprise based upon ‘Quid pro quo’ affair between ‘the Church’, ‘Military Industrial Complex’ and ‘the States’; definitely this goes deeper than ‘the Church’-- the ‘outer Church’, thus, in grand scheme of things/affairs, there is always a possibility of ‘an existing institution’ within institution(s) .

=====

https://www.youtube.com/watch?v=roPQ_M3yJTA

=====

Extraterrestrial Visitations versus Control Agendas-- triangulations

Visitors from other ‘places’, planetary and star systems/galaxies, come and go all the time and they have been, and still are, part of ‘human evolution’ in terms of culture, exploration and ‘exo-politics affairs pertaining to the galactic ecology’ – all that mingling with human affairs in various parts of the earth, in one shape or form; like the curious case of 2 Kings 23:4 .

Education 1.0 is a domain enterprise of ‘the rulers and the ruled’ -- perhaps and potentially, in a clever global power plots and conspiracy . Then, it shouldn’t surprise the ‘awakening population’, most of the things they occasionally live for in regard to ‘life and successful living’ are ‘hopeful lies’; well crafted reality that exploits ‘low states of awareness/consciousness’ and so forth ‘self determination’. The good and the bad coexists, within the potential ‘actionable choice making’ however, the world population are

manipulated, systematically, to continually choose the bad/detrimental choices in life and against the auspicious good will of the global society. The one who knows better, can do better than 'choose better'... There comes in the necessity of Education 2.0.

Education 2.0 is all about 'Systems View and Thinking'; while, going further, Education 3.0 is the 'I-ducation'--Iducation which is the metaphysics of 'Education'. Thus with Education 3.0 comes '[Knowledge](#)' – the ultimate 'defense' against 'the possible bads' of 'the greater community spirituality', to imply literally, as 'The Unseen Ones' put it in Marshall Vian Summers' book with the same name.

This is exactly what blessed sister Yazhi expresses as '[Integrated Knowing](#)' – typical knowing which is quite indispensable for the world community, in order for such to get done with the 'Matrix'--ascending to more expanded awareness/comprehension of Being and 'Time'--Being and Time--which is 'Now-ness' in 'occultation'. In this regard, Education 3.0 is the culmination of Neo's path for 'beating the Matrix' by becoming '[The One](#)'; Yazhi implying 'the big wish' for the people of Earth to understand 'a self determination context' such that 'I am the Monster and I am the light Being'--life, living in any matrix, is all about choices...

Education 3.0 [makes it possible to 'dig' any religious order, pseudo or real](#)—be it here on Earth or elsewhere in the Universe/Multiverse with 'people'. It provides 'keys' to 'Revelations' on how the universe works with 'Consciousness' as the 'Seed' of 'Thought' to hold all things/form in 'illusory' organization/self organization—[the All Seeing EYE](#), in all and everything—all nature and all beings. This propitiates 'Love, Meditation and Adoration/Worship' as 'tactical orientations' to delve into 'Oneness'--metafunction which is the 'Overfunction' of all Being and Nature, with metaphysics as 'sub-knowledge' to Self-Realization through 'Enlightenment'—I-ducation. Love is 'knowledge' when such is 'Unconditional essence gravitating all and everything' in 'the One'. Adoration/Worship is 'the boundary condition' to invigorate all sensibilities and feelings for 're-orienting' soul dispositions.

‘Experiential Reality’ as the augmentation of ‘Seed Thought(s)’ of ‘Consciousness’ requires proper framework of ‘perception’ and ‘interpretation’ to elaborate any living drama – something which can basically out-do any religion or religious thinking—not just here on Earth; but even ‘up Above’ . Persistence of senses, assisted by ‘memory’ can be realized as an ‘illusion’--Maya .

The essence of ‘The Trizanium’ is the triangulation of ‘Ontology of Institution, Status and Trends of Society and Insight’--this is a tool to decipher the intricateness of ‘Sensations, Structure and Influences’ in the part of ‘Ontology of Institution’; ‘Will, Action and Guidelines’ in the part of ‘Status and Trends of Society’; ‘Rational Interpretative Depths, Intention and System’ in the part of ‘System’.

In the ‘Cross Eye’ of the Grand Picture, Consciousness as ‘is-ness’, the ‘Trizanium’ is the direct opposite of ‘Seed Thoughts’--symbolic depiction of the nested ‘iris’ of ‘sensations/feeling’ labored by ‘DNA interwove’--‘Standing waves’ which are the basis of ‘gravity waves’--the real ‘energy’ behind all illusory ‘manifestation/sub-manifestations’ .

In the ‘Cross eye’ of the Grand Picture, Consciousness as ‘is-ness’, the ‘material/sub-material/infra-material/ultra-material--ad infinitum’ are primal constructs of ‘persistent of forms’; and it is the direct opposite of ‘Time’. Symbolic depiction of a ‘square’ as a construct of ‘guidelines’. In this regard, all forms are the extension of structural convergence and/or divergence of functional ‘design intelligence’ stemming from ‘the Cross of Life’. Thus, by implication of cross determinism, ‘Time’ is a structured ‘Memory’.

All movement and coordination is the result of ‘a form interaction within another form’; resulting possibility of any sequence of activity/event(s) is the ‘extrapolation of memory/memories’. This constitutes a curious nature of the so called ‘Akashic Records’ . ‘All the things possible’ in which a sentient individual can cause -- in terms of ‘actionable choice making’ can be found in ‘Akashic Records’;]this raises an immense issue with ordinary understanding of man today 2024 , for the most part, as memory is the basis of ‘ego’ and its association with all things—space, time, energy and matter and the mind/thought instrument—the buddhi .

Blessed Sister Yazhi provides [Insight on separation, ego, limitation and willful power to integrate](#) .

In the ‘Cross eye’ of the Grand Picture, Consciousness as ‘is-ness’, the ‘Trizanium’ constitute the ‘seed thought’ of sentience towards manifestation(s). In this regard, all manifestations are everything ‘other’ than ‘self observation’ at any plane of activity; symbolically ‘inverse Trizanium’ nested in the iris of ‘DNA interwove’. Thus, space ‘triangulates’ all conceivable activities/dynamism—towards the ‘time’ polarity, all dynamism is constituted by the ‘still moments’ of unitary vertical/horizontal infinity event extensions; and again, towards the ‘matter’ polarity, all manifested ‘form/events’ take ‘spatial symmetry’ of ‘vertical and horizontal’ finite extension.

Resultant-wise, the manifested world , say the material world, can be determined as the result of ‘tapestry of still moments of actions’ whereby the entire universe could be blinking ‘in’ and ‘out’ in a very rapid successions, akin to the ‘[lighthouse frequency](#)’ . In this regard, the ‘smallest’ square of ‘spatial symmetry’ could be akin to ‘[Planck length](#)’ --vertically and horizontally; as similarly-- in the implied topographical deductions and thus topological thinking of Dan Winter’s ‘[Planckphire](#)’ .

In this regard, ‘self observation/awareness’ is the function of ‘intention’ and ‘thought’--symmetrical interaction of compatibility of ‘contextual thoughts and intentions’ with ‘not everything other’ than ‘such alike to that’-- in reflection; [Space as the domain of reflection of ‘sentience, conscience and consciousness’ through ‘the cross of life’](#) . The interaction of ‘innate self awareness/conscience’ with the domain/plane level of activity, yield ‘self observation’ as an individual within the functional ‘realm’ and as articulable by ‘the System View and Thinking’.

Thus [in the ‘dense reality’ one may not observe and comprehend immediately that the living world is/as the reflection of her ‘thoughts and intentions’, however in ‘lighter densities’ one will see outer reality as the reflection, and thus ‘manifestation’, of his/her own ‘belief system’](#) as soon as possible ... Seeing and/or manifesting

‘things/reality’ with compatible/matching frequencies; ascribing to ‘who we are’, ‘where we are’ and/or ‘pursuing what interaction’ with that very nature of space surrounding us/deriving our essence in terms of ‘sentience, conscience and consciousness’ ...

=====

Cognitive Basis for natural and supernatural

ALL SEEING EYE, the essence of ‘observational vectored intention’, is the edification of the Observer and the observed world. It is the basis of ‘contextual charge’ of ‘being and time’ – innate possibility of ‘quantum tunneling’ for all and everything. It is the ‘Now-ness’ of all ‘events’ where ‘the cross of life’ bears the essence of ‘form’ and ‘energetics’ paralleling ‘space and time’. It is the ‘attention’ and ‘intention’ which gives ‘a qualitative spin’ and ‘velocity of the intelligible comprehension of the units of memory’ as the primordial ‘Cross of Life’.

‘Emptiness-Form’ Conjugate coherence of ‘blinking universe’ yields ‘the cubes of space-form’; With ‘qualitative spin’ and ‘attention’ comes ‘the focal point’ and ‘axis of rotation’. In this regard, ‘spin’ and ‘axis’ yield ‘four cubes’ and ‘four cubes’, 4-0-4 of ‘vectored intentions’-- ‘Octave system’ of self similarities in their ‘forward’ and ‘reverse’ bias of ‘Force and extension’. Force and Extension are ‘energetics’ of ‘vorticity’ in ‘planes’ of ‘power’-- system of duo-vortex. Thus, the universal blinking activity, towards the thresholds of ‘dimensionality’ is the harmonic convergence with spiraling systems of form. It is the very essence of the composite activity of ‘spin’ and ‘revolving velocities’ inherently to all celestial bodies—every heavenly body revolves fractally around one and another ad infinity...

‘Spins’ and ‘Plane-Orientations’ is the basis of any/all ‘Memory’... Memory is the unit of ‘Intelligence’--functional intelligence to ascertain ‘space-form/matter-energy-time’.

Extended framework of ‘memory’ is the essence ‘sentience, conscience and consciousness’ in ‘systems view and thinking’.

Within the thinking constructs of length and thus dimensionality, harmonic convergence seems to compress and/or decompress to satisfy ‘informational densities’ with ‘length’ itself being a sort of an illusion. Each harmonic density is like an infinity stretch of its own regard. Thus the commonality of ‘infinity stretch’ and ‘the balanced and rhythmic compression and decompression’ have ‘Time’ as the ‘agent of neutrality’. This is to denote, intelligible space is the inverse of time—if we ascertain ‘space-time’ as ‘corpuscles’ – as the ‘field of influence’ then time is likely to be ascertained as ‘spiked sphere’.

Space-time conjugation with qualified states of sentience, conscience and consciousness, the technical implications of observational ‘vectored intention’, has ‘cubical extrapolations’ as the essence of three dimensional space-time.

Blessed Sister Mari Swaruu articulated space-time conjugation simply as time having derivable orthogonality of ‘the cross of life’ -- [time having all possible corresponding ‘coordinates’ to space orientation—say vectored in three dimensionality](#) . In this regard, time is not what Education 1.0 purports it to be— not ‘the measure of duration of an activity, be it empirically rotational or translational’ rather a combination of ‘square and circle’ in intelligible comprehension of intertwining ‘spin’ and ‘velocity’ manifesting as ‘units of memory’...

Time, in system view and thinking, is actually ‘Time-energetic’ tapestry of structured memory—the sacred geometry. Sacred Geometry is the intelligible existential propensity that animates ‘forms-energetics’ with congruency of ‘compressibility/decompressibility’ of ‘space-time’ in the sense of topographical deduction of the [‘Torsion Waves/field’](#) .

[Torsion Waves/field](#) are the basis of [‘fractal fields’](#) , self-similarities and dynamic infinitude of ‘spheres of influences’ that compress and decompress to the ‘zero sum’ of ‘negative’ and ‘positive’ of ‘units of memory’. That is to denote, ‘space-time’ and ‘form energetic’ interaction constitutes the ‘Twist of Infinity’ – the cross of life. In this regard, the ‘Twist of Infinity’ is the basis of ‘Consciousness’-- the ‘All Knowing potential field of Observation and/or Self-

Observation'. Thus 'sentience, conscience and consciousness' are the existential basis of 'sphere of influences, orientations of the 'Twist of Infinity, and Density Octaves'.

Bashar, the friendly ET -- through Darryl Anka, does relate the existential enigma with equivalent parallels of the '[Omni Present Radiant Point Charge](#)'. Thus by association, [the Trizanium, is the edification of 'Thought/Ideal', 'Sentience/Conscience' and 'Glory of the Collective Being'—as a single sphere of influence](#) .

'All knowing potential', in a sentient individual, is the 'soul disposition' – soul disposition which is the 'fractal field' of 'self awareness'; holographic fragmentation of an 'Over Soul'. An oversoul is an 'integrated overfunction' of 'Metafunction'. In this regard, 'multiplicity of souls' is nothing but 'the One' – the One in certain 'wholistic Field' of the overall functioning universe—the multiverse in real sense. Thus '[Now-Ness](#) operates the same with each 'self-determined sentient individual'; all parallel universes are [simultaneous](#) .

Within the framework of the 'integrated overfunction' and 'the metafunction', this implies 'Now-ness' is actually the 'geometric orientation' of the 'intentional will' – will/intention 'to Be' and/or 'Beingness'. Ultimately, there is only one source, unborn and undying—the One; the Divine Spark of 'Self Consciousness'.

A soul is a charge, within the potential domain level of 'influence/being able to be influenced'--the 'Iris' of 'Energetic twisting tapestry of Life'. In this regard, 'Sensations/Feelings' animate 'soul dispositions' and the soul hungers for 'love' as 'integrating factor' for 'ascension'; succumb to fear and basal instincts for 'descending' order within 'spheres of life'. In this regard, 'Soul' and DNA' constitute the direct extension of 'intentional-will' to be 'someone' and for 'the sense of Beingness'.

Domain level of 'sentience, conscience and Consciousness' is like the 'vertical displacement of capacity' for sensibilities of 'space-time' -- corresponding to the 'vertical bars of infinity vertical extension' at the 'Metafunctional sphere of influence'. Analogies of 'frequency march' and/or 'frequency compatibility' applies to these contexts of

‘soul charge’ dispositions and these also bear direct correspondence to the ‘Electrical Phenomena’. Parallels of ‘Force, Current and Magnetic field’ vectors can be drawn, however, Education 1.0 deduce those three vectors under limited comprehension.

Education 2.0 is all about systems view and thinking; this can expand/extrapolate ‘limited sensibilities’ of Education 1.0 in order to realize an ‘integrated knowing’ in terms of ‘thoughts’ and ‘conceptions’ of natural phenomena. In this regard, ‘space-time-energy-form’ dynamism, for the sake of potential ‘wholistic comprehension’, it implies then that ‘the rational interpretative depths’ have to sort things out and proffer new understandings to observational matters pertaining to say, ‘electricity-inertia-transformation-charge’ ; whereby, for example, an electron – ‘as scientifically defined by Science 1.0’ is a ‘wrong/displaced’ notation for ‘dynamic and static’ tapestry of ‘Consciousness Units/gravity wells’.

All manifestations are ‘gravitational phenomenas’ directly linked with ‘Consciousness’ power of the Observer—they can likewise be altered by the Observer, given a will to ‘alter charge density of Beingness’ of the observer. Electrical phenomena is also the result of active of power of ‘standing waves’ – standing waves of the ‘manifestation power’.

Education 3.0 is the ‘science 3.0’ of ‘Soul, Intelligence and Beingness’.

The case of all observable world being a ‘thought stuff’ of ‘Consciousness’ and within the ‘Consciousness’, Education 3.0 is the ‘I-ducation’ which is the ‘metaphysics of Education’. In this regard, Education 3.0 consummate Education 1.0 and Education 2.0 to yield ‘Divine Knowledge’. Thus, Divine Knowledge is nothing but the purity of ‘Observation and Integration’ of ‘transcendental sensations/feelings’ in Oneself – basal and ethereal – practically an ‘Individual Phenomena’.

Bashar, the friendly ET, provides the ample basis of gnosis and comprehension of ‘Soul, Intelligence and Beingness’ to hence forth ‘connect’ temporal-spatial systems with ‘informational’ templates of

Life and Beingness. Through the instrumentation of '[Sacred Circuitry](#)' and the rizayat of '[Spiraling Cube](#)' .

The 'infinity stretch' and 'the balanced and rhythmic compression and decompression of intelligible/comprehensible 'system of unit memory qualifiable as spin and velocity' have 'Time' as 'the agent of neutrality'. In this regard and in concordance to the sacred circuitry, using systems view and thinking, 'the Center' arrests all possible contextual intelligible comprehension of the beginnings/origin.

One topographical set of deduction for potential comprehension pertaining to 'the origin' is the articulation of 'the radiant point source'. Thus, [all universe is basically ONE](#) ; made of a single particle—a particle so minute towards the indefinite point, correspondingly, making it incredibly agile thus incredibly fast – fast moving at an infinity speed, connotative of the capability of it being everywhere and/or anywhere at 'any time' and 'all the time there is'; thus towards all directions – omni present and omni potent...

The origin is 'the Source/the One/God' -- as omni present and omni potent 'Point particle' which is then the essence of all and everything, and so, present in all 'space and time'; much so like the very 'form and energetics' constituting the universe – universe which is in actual essence, a multiverse of 'Being and Facets of Nature'-- the Ontology of Institution.

One topographical set of deduction for potential comprehension pertaining to 'the origin' is the articulation of the 'field' as 'area(s) of influence' that invigorates any discernible activity. Towards indefinite constitution of a particle while moving at infinity speed is connotative of 'Expand' in the sacred circuitry symbolism. In this regard, the particle qualifies a potential 'spherical' constitution with infinity expanse of 'spherical' intricateness.

=====

=====

Cognitive Basis : finite and infinite systems

Unlimited expanse of ‘potential activity’ and ‘the activity’ is the contextual ideology which edifies the ‘Cross of Life’ and thus the ‘Cross Eye’ as the appropriation of cube(s) and sphere(s). Thus, the field is something which overshadows any structure and activity, in the sense of unlimited potential, it is the essence of both, chaos and/or order—connotation of the primordial ‘Light’, [the light which does not travel](#) , and the very the origin of the spark of ‘Eternal Life’.

One topographical set of deduction for potential comprehension pertaining to ‘the origin’ is the articulation of the ‘neutral infinitude’. Thus, using system view and thinking, all order is possible through polarity in a sense that ‘outward breath’ is the exactly opposite of ‘inward breath’. This is connotative of ‘the Balance’ in the sacred circuitry symbolism. In this regard, time and space are possible when any measure of expansiveness is rhythmically balanced—rhythmically balanced in the ‘Eye of God/the One’--the One in all and everything.

The Eye of God/the One, In this regard of concurrence of inward and outward breath of ALL THAT IS, is ‘the balance’ – Balance which is that very essence of the ‘energetic nodes’ of ‘Sound/Word/Supreme Tone/sacred geometry’ of ‘God/the One/the Source’. Thus as ‘the whole field’ – the ‘whole field’ which is the ‘Power/Glory/Eternity/Kingdom of God’.

Interaction of ‘Sound and Field’ yields the ‘Cross Eye’ – the contexts of ‘the standing waves’ which is the essence of the [ALL SEEING EYE](#) – All seeing eye which is intrinsic to all creatures with sentience, conscience and consciousness—‘Beings’ in being and becoming-- as the typical activity of ‘Consciousness in the qualitative ‘Is-ness’. In this regard, ‘the Cross Eye’ is augmented by ‘the Twist of Infinity’ to edify ‘the Cross of Life’; Intricateness of the ‘DNA and Consciousness/[Conscious Will to Be](#)’ .

Sentience is the amalgamation of senses of self and body into a single thought imbibing contextual awareness/self-awareness. Context is always a circular domain arresting the triangulation of

‘actionable choice making’. It is within this nature, the base of ‘Trizanium’ stretches between the ‘Ontology of Institution’ and ‘Status/Trends of Society’--the ‘capacity of society’ to shift or change their collective/group performance.

Conscience is the ‘intellectual’ element which imbues an Individual or a collective with the senses to determine their friendly/unfriendly disposition. Conscience is the augmentation of ‘behavior’; thus ‘attitude-intention-Skills’ predetermine the capacity of any sentient character to perform its desirable course of action. It is in this domain, education-memory-experience hold significance in determining ‘levels of awareness’ and so forth ‘compatibility’ of learned/unlearned or rather familiar/unfamiliar settings of a certain intelligible ‘structured domain’.

Consciousness is the power that harmonize both ‘Sentience’ and ‘Conscience’ as that which can be ‘Alpha’ and ‘Omega’ of form(s) and the potential intelligent constitutions. It is that very symbolism of ‘wide open eye’— extended connotation of ‘gravity waves’ arresting the contextual intonation of senses’. In this regard, sentience is like the arrested ‘sensibilities’ in the ‘Iris’ of ‘DNA’ . Again, using systems view and thinking, there is topographical relationship between ‘Seeing and Sensing’ which bear direct correspondence to ‘Light Encodings and Thought’-- the secret of the left Eye of Horus .

Context of thoughts, thinking and centered-ness constitute the ‘Self-Awareness’ disposition within an individual or the collective to articulate his/her/their ‘power and glory’ to manifest the reality of their living environment through ‘institutional coherence/structure’ and ‘Actions/Karma’ . In this regard, articulation of ‘Power and Glory’ , through systems view and thinking, is vivified by ‘Systems/Time’ as harmonic convergence of ‘Heavenly Intentions’ and ‘Earthly Natural Principles’ as signified by connotations of LOGOS and NECESSITY . Thus ‘Systems/Time’ is the essence of ‘Human/Sentient Culture’ articulating the framework of ‘Self Awareness’ and ‘Metafunction/Oversoul/Overfunction’.

‘Systems/Time’ being the nexus of Being and/or Becoming, using systems view and thinking, provides the topographical parallels of ‘the two triangles’ with the potential to ‘intertwine together. Thus, through extend-able parallels of topological thinking, the two triangles intertwine to edify the ‘twist of infinity’. Thus, the ‘rational interpretative depths’ and ‘intention’ intertwine with ‘influence’ to yield ‘Destiny’; likewise with the ‘mortal will’ to yield ‘memory’. In this regard, Trizanium, within ‘limited self actualization’ yields the ‘toroid within the toroid’ of Being—whereby being with capital ‘B’ is the ‘Whole Field’. In this regard, anything which has ‘sphere of influence’ – sphere of influence ‘not equal’ to the Whole is subjected to ‘Time’.

Time is the ‘illusion’ of separation from the ‘Whole Field’-- the ‘Power/Glory/Eternity/Kingdom of God’. Using systems view and thinking, this intelligible contextual comprehension precisely marches with ‘the Temptation of Jesus, the Christ’ – as tempted by the ‘Devil’. Bread, Death and Legacy are ‘cultural markings’ of the expiry society/individual. Bread is all about ‘Space’, Death is about ‘Self conception of Mortality and finiteness of Being’ and Legacy is connotative of ‘Separative Domain of Influence’.

‘Separative Domain of Influence’, In this regard of space-time, is the viable expanse of systematic ‘Chaos’ and ‘Order’ in the intelligible universe – Using systems view and thinking, Chaos and order, is governed/controlled by ‘Christ’ or ‘Devil’ influences/archetypes. Thus, ‘living in the world of time’ is the connotation of ‘the Fall’. Life in Christ is ‘the Resurrection’ of Being; and Christ is the ‘Only Begotten son’ of the Most One—‘the Heavenly Father’. In this regard, the Holy Spirit is technically the ‘Whole Field’--the ‘Mother Aspect’ of ALL THAT IS. Thus, redemption is rising above the temptations of the Devil’--trickster of ‘polarization of mortal will’ in sentient individual .

‘Christ’ and/or ‘Devil’ influences constitute the possibility of ‘Freewill’; the Mother Aspect’ of ALL THAT IS is ‘Beyond Time’ so is the ‘Father Aspect’. Being the ‘Breath of the Divine’, the Mother Aspect, provides essence of both ‘the Good’ and ‘the Evil’ while in actual essence ‘Good and/or Evil’ are human conceptions—not Divine. Nothing can separately exist in ‘Space-time’ contexts

without the Mother Aspect giving sustenance of ‘Thought Power’—all creation assume devolving nature from the Divine, through the qualified ‘negative will’; evolve back to the Divine through the ‘Positive will’-- Devil and Christ functions.

Self Awareness of any sentient being is determined by the integral disposition to align with ‘gravitating’ or ‘levitating’ powers of ‘Consciousness’ through conscience . In this regard, ‘the Cross Eye’ and ‘the Cross of Life’, through systems view and thinking, extrapolate ‘Christ’ and ‘Holy Breath’ as ‘metaphysical guidelines’ of ‘transcendental awareness’--‘the informatics’ of spiraling through cubical extrapolation of harmonic convergence; which transcends timelines , and so forth, the course of their inherent activities .

Contexts of Informatics imbibed with congruent awareness of events/thought/ideo-materiality of the world, through the ‘Eye of Horus’/‘Christ’/‘Holy Breath’, is transposed as the ‘Template Order Reality’ and ultimately, the infamous ‘WORD’ – the WORD which was GOD and with GOD —past, present and future.

Context of Informatics imbibed with congruent awareness of events/thought/ideo-materiality of the world, through the ‘Eye of Horus’/‘Christ’/‘Holy Breath’, is transposed as ‘the Cube of manifestation’ within the balanced self awareness of sentient One. In this regard, the cube of manifestation is >‘Hexa-dimensional space-Time’< . Now-ness is the nexus of the ‘Power of Being’ arresting ‘tonal’ points of ‘Spin’ which yield focal point for the ‘sphere of influence’ actuating >‘Matrix Reality’< .

Contexts of Informatics imbibed with congruent awareness of events/thought/ideo-materiality of the world, through the ‘Eye of Horus’/‘Christ’/‘Holy Breath’, iterates ‘Time’ as ‘willed intention to be and/or becoming ‘the One’. In this regard, ‘Trinity’ is actuated by ‘willful manipulation of the twist of infinity’--Christ is the ‘Son aspect’ of Trinity, it is in ‘Christ’ that we live, move and have our Being —as long as we can identify directly with the ‘All Seeing Eye—Father aspect’ and so: the ‘Holy Breath—Mother aspect’ .

All possible events, by the virtue of crystalline-like associations/probable mathematical sequences—the sacred geometry, are like the ‘causality flow’ with duo charge of space-time ‘numerical values’ intensifying ‘the sphere(s) of influence’. Thus, all events are possible due to equal but opposite flow of ‘discernible temporal sequencing’ from ‘neutral event(s) horizon’; with biology following similar intricateness—informatics forming ‘bi-causality’ with ‘Zero-Point’ Energy ...

We live in the domain in which time-space feels like going forward, while there is equal but opposite domain in which time-space feels like going backward. ‘Now-ness’ is the capacity to undergo a self reflection through the infinity arrays of ‘circles and squares’ of ‘Memories of Being’ --at the nexus of the ‘twist of infinity’.

Blessed Swaruu Sisters--Swaruu of Erra(9), Swaruu (X) Athena and Yazhi(12) provide ample contexts of comprehending all basic enigmas of ‘Time Travel’, ‘Teleportation/Transpositioning’, ‘Manifestations’ etc from the basis of ‘frequencies of oscillations’, the fact that some of these ‘advanced technological capabilities’ are already on Earth, under exclusive custodianship of the scientific enterprises belonging to private corporations and the ‘Deep State’; Them sharing all these is ‘Justified’--NOBODY OR GROUP OF PEOPLE HOLD EXCLUSIVE RIGHTS TO IDEOLOGICALLY SUBJUGATE THE IMMEDIATE GLOBAL SOCIETY OR UNDERGO SHADY CONTRACTS ON BEHALF OF UNKNOWINGLY GLOBAL HUMAN POPULATION—ANY SUCH CONTRACT IS NULL VOID FROM THE START UNDER INTERPRETATION OF THOSE OF US WHO COMMAND AND ASSERT OUR PRESENCE AND RIGHTS ON EARTH AS SOVEREIGN INTEGRAL; thus, those ‘contractual agreements’ of sinister/betraying nature to ‘the Public Trust’ are technically contravening the Freewill of the Global Human Population--Freewill to reorient ourselves for the auspicious ‘Self Determination’; whether it has been done under clever pretexts of ‘protecting the Masses’ and/or implying warranted ‘Stewardship’ of the Planet under the Umbrella of ‘the States’, ‘Military Institutions’ and/or ‘Religious Institutions’. To assert this right, and with merit, each and everyone of us MUST CONSCIOUSLY SAY NO TO ALL PRINCIPALITIES—ON EARTH AND/OR ABOVE; justifying the

perpetuation of ‘unknowingly state’ – unknowingly state of the masses pertaining to [‘Matrix Realities’](#) .

Let Us do this through ‘CHRIST AUTHORITY’ – the Christ Authority in All of US—commanding all contravening principalities to STAND DOWN! Now and Ever, as long as [we pledge allegiance to Cosmic Societies who are willing to be of Service for the ‘Christ Consciousness’](#) —On Earth and/or ‘Anywhere Is’. With this, as potent mortals on the Surface of Earth, we grant permission for all ‘Allies of Humanity’ from the [‘Waters Above’](#) to operate directly and precisely as multitude of situations allow; and so forth, we assert our qualification to be eligible for ‘Direct Contact’ as deemed appropriate – as appropriate within the discernible contexts by those who know better ‘In Christ’ principles and so forth, as the [‘Prime Directive’](#) provides guidelines.

=====

<https://www.youtube.com/watch?v=fVZpYo3qrAo>

=====

What and What Not of Being and Becoming

Living on Earth, all our institutions, state of affairs and possibilities of Being and/or becoming are bounded by the ‘Actionable Choice Making’. In this regard, Mind is a tool to ascertain contexts of choice in Being and/or Becoming. All our thoughts, their depth/independence/similarity/differences shape the cumuli of Matrix reality. In this regard, any setup/enterprise/determination which foster ‘specific thought patterns’ is a control mechanism. Thus ‘Mind Control’ terminology is refers to the myriad contexts of ‘discernible sets of activities’. In the process, it encompasses ‘structure’ and ‘activities’ as manipulated by ‘Influences’ and ‘Will’ of the group participants—functional groups; the core identity of the ‘Ontology of Institution’.

Education 1.0 pertains to all vested interests which ascertain the ‘Cube of Mind Control’. When the tensors of ‘Self awareness’ are ‘locked to a specific’ depth, height and width of a ‘figurative Cube’--the Cube of templaic [‘Hexa-dimensional Space-time’](#) ; This refers to a typical cumulative realities, in regard to the ‘intention and

attention’—rate of ‘time flow’--the observer is the observed, in which the state of awareness of all active participants, community expands, relates to the objective and subjective realities.

Deductible contexts of ‘the power of consciousness’ in the Observer is the Observed creative dynamics’ symmetrically reflects, internally and externally, fixed set of ideas. That is to say, it is those set of ideas that out-picture the external world and so forth resonate with limited constructs of ‘rational interpretative depth’. In this regard, the dominant comprehension of the shared reality is going to be perceived in ‘limited senses’ and in concordances to ‘the creative intentions’ of shared creative Beings within the Domain of Life. Thus, their seemingly outer reality is also a ‘zero point’ of their creative power manifesting as ‘solid extension’ of the material world; all nodes of [‘standing waves’](#) animate ‘field of influence’; That is to say, field of influence is precisely determines ‘the distance between’ two attentive points of Observation i.e ‘Space-time(o)’.

A society deprived of the depth to ‘figure out’ and/or ‘comprehend the power of consciousness’ is imbued with ‘self limitation’ to ‘extend and/or self express’ its Will. Its ‘will’ is thus nothing but ‘self fulfilling prophecy of doom’--fatalistic self determination within the certain Matrix Cube; since the real power consciousness is ‘Unlimited’ – the [ALL SEEING EYE](#). In order to overcome the Cube of Matrix, it is thus necessary to figure out ‘potential contexts’ within ‘the context of the ALL’—ALL and EVERYTHING. The process akin to articulation of ‘Spiraling’ by the Swaruu of Erra--[“A circle, a spiral. And it can also be seen that you are reaching Source, yes, but, as it's a spiral, probably Source can never be reached. Better said, Source is all included, all inclusive”](#).

Stepping/Extending beyond the specific domains and context of the ‘Matrix cube of limited Self Awareness’, is the process that Bashar, the Friendly ET, articulates as ‘Transformation’-- also referring to [sacred circuitry 13 symbolism](#). In this regard, the unlimited ‘Self awareness tensors’ of ‘Rational interpretative Depths’, ‘Intention’ and ‘System View’ provide leverage for ‘Manifestations’--referring to sacred circuitry 15 symbolism; thus, these three tensors are the origin of the spin—thus forth, the trans-formative spiral... Any ascertainable ‘Cube of Mind Control’ do provide the ample basis for

the ‘axis of spin’ – axis of spin for potential ‘Spiraling in’ or ‘Spiraling Out’ of the ‘intelligible contexts’ of reality to influence ‘bi-causality’ of all life...

Education 2.0 is the cognitive realm of ‘Systems/Time’--contexts, activity and levels of possible rational interpretations. Framework of Systems View and thinking within the auspiciousness of ‘Trizanium’ and so forth ‘Trizania’ makes it possible to derive contextual intelligence pertaining to any society, small focus and/or larger focus implied. It is an empirical realization that can be the basis of articulating ‘social/economic/environmental’ considerations with and/or without metaphysical overtones.

‘System/Time’--contexts, activity and levels of possible rational interpretation marks the pedestal of personal inner will – the inner will to be either ‘more of oneself’ or ‘to linger-on in the ‘Cube of Mind Control’’, the choice between ‘the Blue Pill’ and ‘the Red Pill’. In this regard, taking the Red Pill is the connotation of the commencement of the path of ‘Transformation’--where the rabbit’s hole goes—spiral of unlimited ‘Self-awareness’ tensors for ‘Trinity’; thus, towards One/Single -- unlimited context of the All-manifesting ‘Depth of Rational Interpretation’, ‘Conscious Intentions’ and ‘Systems View and Thinking’. Deciphering Trinity as: Father(Ultimate Will), Mother(Love Unlimited) and Son (Sole manifesting ‘will/love’—will and love to be ‘The One’).

System/Time’--contexts, activity and levels of possible rational interpretation marks the pedestal of personal inner will – the inner will to be either ‘more of oneself’ or ‘to linger-on in the ‘Cube of Mind Control’; thus knowing better comes with better comprehension: with contextual topographical deductions of topological thinking, choosing ‘Systems View and thinking’ makes it possible to relate the set of ideas congruently, fluidly and with potentially unlimited extensions. In this regard, the ‘human experience’ can be ascertained as ‘Square in the Circle’--Just like ‘the Cross’ provides basis of extrapolating the knowledge/comprehension pertaining to the four cardinal cubes of ‘Space-time’--a 2x2x2x2 Matrix; the doorway into realizing the ‘duplate and octet’ stability—electro-chemistry of all and everything

– providing guidelines for ‘transformations and/or transfiguration’ of all energetic forms...

System/Time’--contexts, activity and levels of possible rational interpretation marks the pedestal of personal inner will – the inner will to be either ‘more of oneself’ or ‘to linger-on in the ‘Cube of Mind Control’; thus, any disposition to make choice is a never ending ‘ideo-material construct of change’ that prevails in a matrix within a potentially another matrix—Only ‘Consciousness Is’. All Movement is augmented by illusive ‘Stillness’ of ‘Matrix’, vice-versa is also true. In this regard, the ‘Spin’ factor augments ‘intention’ and ‘attention’ to yield ‘forms and energetics’. Gravity, if it can be ascertainable as a ‘Force’ then, using systems view and thinking, there are ‘cubical and spherical’ functions to it—ontological functions that edify ‘System/Time’ contextual interpretative depth.

Ontological functions that edify ‘System/Time’ contextual interpretative depths pertaining to say ‘Gravity’, through systems view and thinking, draw parallels of ‘love-will-intent’--‘love-will-intent’ in extended sense of observing and interpretation of things/matter and/or situations. In this regard, limited constructs of Education 1.0—Science 1.0 fails to comprehend the extended parallels of ‘observation, interpretation and proper contextual deduction of natural phenomenas’ like the very [case of gravity](#)—gravity as supposedly a universal co-pulling of heavenly bodies. Thus, contextual guidelines are missing to directly relate ‘mass with love’, ‘distance with squares of the manifestation power’ and even more ‘Gravitational Constant with Intention/Attention Power pertinent to the State of Consciousness of the Observer’.

Ontological functions that edify ‘System/Time’ contextual interpretative depths pertaining to say ‘Gravity’, through systems view and thinking, draw parallels of ‘love-will-intent’--‘love-will-intent’ in extended sense of observing and interpretation of things/matter and/or situations. In this regard, limited constructs of Education 1.0—Science 1.0 fails to comprehend the extended parallels of ‘observation, interpretation and proper contextual deduction of natural phenomenas’ like the very case of gravity being the domain of activity with inherent dynamic strength of movement of the masses from the rest—acceleration due to gravity and the

inverse square law. Science 1.0 fails to comprehend the extended dynamism of 'attraction/fall/pull' within the essence of 'phantom spatial cubes of space' and time as the rate of flow of 'Invisible Breath of all life which substantiate the manifestation power of idea/thought/template constructs of the particular reality as it filters through shared 'Matrix Density' and bearing corresponding affinity with the rate of flow of idea/thought/belief systems of the Observer as 'an active/passive Actor' within the very 'Matrix Density'.

Ontological functions that edify 'System/Time' contextual interpretative depths pertaining to say 'Gravity', through systems view and thinking, draw parallels of 'love-will-intent'--'love-will-intent' in extended sense of observing and interpretation of things/matter and/or situations. In this regard, limited constructs of Education 1.0—Science 1.0, fails to comprehend the extended parallels of 'observation, interpretation and proper contextual deduction of natural phenomenas' like the very case of '[the gravitational constant\(G\)](#)'. Thus, extended guidelines pertaining to the 'Straight Line' of 'Force Vector' of gravity can reveal evidence of both 'Spin' and 'Transfiguration' of forms and energetic in any field of activity—something which can be fixed with the intrinsic Matrix Properties or, [in a potentially unusual ways](#), altered by the Observer who root his/her will in the 'Power of Consciousness' to 'change the program' of 'any unfolding event' under direct observation/attention. This is to affirm, consciousness can alter/change/transform any 'contextual set of ideas and flow'--rate of 'Time-Space(o)' flow; to potentially override normal physical expectations. This creates the basis of all things supernatural—supernatural could be simply the very natural not yet understood.

=====

Gravity and Mystery of Life

Gravity is a fascinating natural phenomenon manifesting as the propensity of the Cosmos to densify 'energetic forms'; using systems view and thinking, [spherical and cubical extrapolations](#) can extend ordinary physics into metaphysics. In this regard, even the combination of something—combination of that geo-spatial-coordinate-nature which is known as 'Meridians and Latitudes' could be the 'linkage factor' of 'space-time' as 'Single Force Field'-- [Single Force Field of 'gravitational normalcy and/or abnormalities'](#). Thus, harmonics of 'the speed of light' can be ascertained to have direct relationship with orbital dynamism of the Planet and so forth the distance, speed and paths/planes of 'revolutions' and 'spin' -- [as 360° divisions applies in terms of 'radiant angles' at the 'center of the circle'; and so again 'within the four\(4\) corners of the square.](#) This is to imply, improvisation of 'Meridians and Latitudes' to the physical geography of say 'An Earth as a Planet' can serve both: ['Temporal Measures of Days and Seasons'](#), as well as, [set of 'guidelines' to articulate 'Space-Time Constructs' beyond the ordinary.](#)

With Systems View and Thinking, contextualizing 'Harmonics of the Speed of Light' infers the possibility of extrapolating senses over 'existential phenomenas' with energetic potentials that 'exceed the speed of light'; thus, the ultimate 'speed of light' in one particular density could serve as a 'unit of limited observation' – 'observable speed of light' as energetic 'boundary' of the 'manifestation capacity' in one particular domain of the 'Matrix'. In this regard, [a Pyramid is the Geometrical design with energetic congruency of 'Space-Time' as 'One Force Field'](#) – One force field of the 'Manifestation Power of Consciousness'--a tool which can 'hack' the creative power of the 'Universal Gravitational Constant' of the universe/Cosmos; Well, the 'G' it is not really the 'Constant' rather a 'hidden key of 'God' knowledge' – potentially so hidden in front of the ['Mathematically laden' thinking mind of 'limited sensibilities' and 'limited interpretative faculties' over 'limited constructs/paradigm of scientific observations'.](#)

With Systems View and Thinking, contextualizing ‘Harmonics of the Speed of Light’ infers the possibility of extrapolating senses over ‘existential phenomenas’ with energetic potentials that ‘exceed the speed of light’--with light itself being ‘secondary phenomena’ due to senses themselves and their corresponding inferred thoughts; and so -- not ‘the overall reality there is’. In this regard, light stimulates senses for ‘sentience, conscience and consciousness’ reverberations —intonation of senses/feelings to articulate/invigorate the ‘senses of Being and Becoming’ in ‘Self Thought’ indulgence. Thus, ‘Self Thought’ is imbued with ‘sensations and feelings’--sensations and feelings which determines the state of ‘Self Awareness’ in direct relationship with ‘Rational interpretative Depths’ of the ‘Reality’--System/Time intrigues applying as ‘Mystery’ and/or ‘Known/Unknown’.

With Systems View and Thinking, contextualizing ‘Harmonics of the Speed of Light’ infers the possibility of extrapolating senses over ‘existential phenomenas’ with energetic potentials that ‘exceed the speed of light’--with composition and decomposition of ‘material observed reality’ as hidden reality of congruent thought constructs to be ascertained by ‘proper thought contexts’--context which can yield ‘coherence of thought patterns’ and so forth empowered ‘Rational interpretative depths’. In this regard, ‘coherence of thought patterns’ strengthens the contexts of ‘Self Determination’ and ‘ensures self mastery’ – mastery in articulating/reliving the corresponding nature of observable reality/activity. Thus, ‘Theories’ and ‘Paradigms’ belong to the ‘superficial comprehension’ of reality although they can be useful in deriving proper framework of ‘congruent thoughts’. Then again, ‘System/Time intrigues’ overshadows ‘limited frameworks’ with tendencies to yield Education 1.0 – actually, then, overrides them when ‘Systems View and Thinking’ acquire a proper framework which integrates the seemingly physical and metaphysical conceptions —ie ‘the Trizanium’.

Education 3.0 is a fusion of the ‘seemingly physical and metaphysical’ as they tend to fuse into ‘all present life-point’--the consciousness. In this regard, all realities are no longer to be ascertained by ‘distance’ and/or ‘fixation’ as the ‘all present life-point’ is represented by all ‘energetic forms’, thus ‘space-time’. ‘All

present life-point' being 'omni-present', this implies 'studying anything' is 'Studying Oneself'; knowing anything' is 'knowing such thing in part'; knowing anything in full is knowing Oneself in full. Thus Education 3.0 is the 'I-ducation' which is the metaphysics of Education.

'I-ducation' is precisely that which is being emphasized and has been re-emphasized again and again by the Swaruu Sisters in regard to all life being 'Consciousness'-- consciousness, and so forth, all things are manifested as the result of Consciousness-Intention with thus, gravity as the flux and flow of consciousness. We all live and have our Being within the unlimited contextual nature/constructs of our 'Being and Becoming'. Technically, this is precisely to imply like saying there is only One God, In SHIM we are, yet we are within the process of Becoming More of SHIM. In this regard, I-ducation is the process of exacting oneself with the flow to be 'More of Oneself'-- more expanded within the unlimited 'Self Awareness Tensor/senses' of 'Space/Time'.

God at-one-ment, through I-ducation, is doing away with the 'Slavish Mentality' exploiting and harnessing the 'Cube of Mind Control' in any social, economic and cultural programming. In this regard, God conceptions in many cultures, and for the most part, could be nothing else but a 'black box' absorbing away their propensity to process the 'System/Time' intrigues. It does not matter whether one associates oneself with atheism and/or theistic/theological theoretical paradigms; they simply belong to 'limited sensibilities' to comprehend the whole—as they both 'live in their minds'; missing the mark of the 'all present life-point'. Thus, all rationalities and senses are potentially and hopelessly enmeshed in 'wishfulness thinking' be it of 'simple' or 'sophisticated structures' as they pertains to Ontological perspectives —they end up with skewed senses of 'self identity', which are in actual senses, 'self defeating' and 'Self Limiting'.

God at-one-ment, through I-ducation, is doing away with the 'Slavish Mentality' exploiting and harnessing the 'Cube of Mind Control' in any social, economic and cultural programming. In this regard, God conceptions in many cultures, and for the most part, could be nothing else but a 'black box' absorbing away their

propensity to process the 'right intention' to edify their 'true knowledge' of 'Being and Becoming' by misappropriating 'devotion', 'worship' and 'Meditation'--channeling all these towards fictitious 'god(s)' who demand this and/or that from the 'believers/congregation(s)/organized religion(s)'. Thus, any organized religion is an elaborate enterprise of 'supplying ready made answers' to seal/conceal the possibilities of 'true revelations' pertaining to the 'mystery of life' – true revelations in 'oneself'; and so forth, being an exoteric domain, dominating as much as possible, viable contexts of 'the known/unknown' in individuals/groups; in the process, becoming the agent of deliberate 'Belief systems/Dogma' such to influence both 'Self Determination' of the believer(s) and again maintaining the 'Status quo' in the world. Furtherer, manipulating 'Trends and Status in the Societies' in which there can be overt and/or covert control of 'social structures/organizations' and 'the scope-nature of their inherent activities' for seemingly 'good intentions'--say, fostering prospects of 'Peace' and 'Common Prosperity' for the world...

God at-one-ment, through I-ducation, is doing away with the 'Slavish Mentality' exploiting and harnessing the 'Cube of Mind Control' in any social, economic and cultural programming. In this regard, God conceptions in many cultures, and for the most part, could be nothing else but a 'black box' absorbing away their propensity to process 'Depths of their Personal Resolve' in Being and Becoming out-picturing for the auspicious true 'empowerment' and 'Glory'. Thus, thought processes and inner conviction are the driving force for spiritual, moral and ethical in Oneself; determining personal dispositions and so forth, self conducts to effect/accord 'peace/harmony' and/or 'auspicious interactions' with the potential 'associates/community members/immediate societies'. Technically, all conceivable behavioral conducts follow two basic premises—friendly and/or unfriendly dispositions... It is within these, the contextual basis of the potential intrigue, 'Social Capacities' are ascertained to thus determine any potential 'systematic performance' and/or locking down 'Trends/Dynamics'... This implies, any viable religious contexts can be engineered and/or manifest through esoteric/subtle desire to seek 'Harmony' and/or foster 'Common Wealthy'--technicalities of 'Will' and 'Love' for

ensuring exoteric/expendable contexts of 'Justice' and 'Equal Rights'.

Esoteric and Exoteric enterprises are 'inner and outer' working of 'Consciousness Power' through 'Willful Individuals'. In this regard, it is a 'labor of love' for the path towards 'complete harmony' and/or 'Cunning/Maneuvering of the Spiritual development' of sentient-kinds—on Earth or on any other Extraterrestrial Planet. This ought to remind all of us, that, there are hidden realities of 'Spiritual, Moral and Ethical' considerations which are beyond conventional 'Power Politics' governing 'Power Relationship' on Earth and even more-so 'the Above'. Thus, certainly there are 'keys to revelations' which could be the close guarded secret for the sake of 'controlled human/extraterrestrial drama' on Earth— cherished by both sides 'Earthly Jurisdiction' and 'Heavenly Jurisdiction' – sides comprising of self conscious Actors.

=====

Meeting of the Earth and Sky

One outstanding person enterprised quietly in the 20th century, such to pave a way for 'community preparedness' towards the 'New Age of Enlightenment'--meeting of 'the Earth and the Sky' – Rajneesh Chandra Mohan, a.k.a, "OSHO" ...

Bhangwan Rajneesh, the 'Blessed One'—OSHO, giving discourse on the operations of 'the Nine Adepts of Ashoka', is a tactical disclosure targeting 'the right audience'; thus for them to re-orient themselves for 'the right intentions' – right intention for an at-one-ment, with 'the Divine' through the proper discernment—proper discernment and attentions which pertain to human/cosmic affairs. Technically, the whole discourse series of 'I AM THE GATE', by OSHO, is a systematic story telling with 'Gnostic/Mystic' intrigues. In this regard, Gnostic/Mystic intrigues are nothing but 'Space/Time' intrigues—Intrigues of Consciousness.

'Black Cube' enterprises, is the level topography of collective unconscious, defending itself against 'Individual' and/or 'Collective Enlightenment'; for increases in 'Self Awareness' and/or incidences of 'Self Realization' is 'going to tear apart'/'tears apart' the illusions of 'separative ego' and 'Transform' the Whole Matrix—especially the Earthly Matrix. In this regard, with concordance to 'the right intentions', the human drama -- say '2024 and Beyond', is the operative domain/ground vivifying 'the good' and/or 'evil' intentions being qualified by the Earthly collective or simply new emergence of 'right intentions' for 'transcending them both'. As good and evil are human conceptions and not Divine, prospects of 'Self Determination' dictates the collective outcome of human performance under 'Black Cube' influences or 'Breaking Free'... Tipping the scale of operation in favor of 'General Positivity' rather than 'negativity' is the potential self determination to transcend the 'Black Cube'.

'Black Cube' enterprises, is the level topography of collective unconscious, Matrix as Feminine, defending itself against 'Individual' and/or 'Collective Enlightenment' -- with 'Time' personified as the [\[url=https://www.youtube.com/watch?v=b2KD9-NkXL4\]](https://www.youtube.com/watch?v=b2KD9-NkXL4)'agent of neutrality' --'Father'undoing the yields/seeds of outgoings/ingoin' --outgoing and ingoin of the 'indulging/enticing Mother'—Mother of all lust/passion and fornication affairs of mortal/sentient/self limited ones.

Death and number 13, in relation to the Black Cube/Saturn/Kronos, are symbolic appropriation for both Death and/or Rebirth|Fall and/or Ascension|Being Lost and/or Found in Materialistic sensibilities. In this regard, symbolical appropriation may entail 'hidden significance' of esoteric knowledge; thus symbols may be exploited, to a certain degree, in both sides of 'the Good' and/or 'the Bad'. Thus, stellar and inter-stellar influences may bring about shared 'symbol/symbology' for 'ill' or benign purposes/intentions in functional esoteric/exoteric groups —on Earth and/or 'the Above'.

Christ can be deemed/symbolized as the 'The Grim Reaper' representing 'The Father-Time' in 'the End Times' – as 'the only begotten Son' to 'Harvest' the yields of 'Good and Bad' intentions

--yields as 'contextual interactive indulgence affair' of 'mortal sovereigns'; harvest, thus being akin to 'thereon intervention' for the restoration of 'Order' and/or auspicious 'Regeneration' of affairs; when the systems degenerates towards thresholds of benign capacity – bestowing 'order' out of 'moral chaos' pertinent to affairs of 'the mortals'.

A triangle with an Eye can symbolize '[Elitism](#)'; yet [the same symbol can signify the potentially all pervading intelligible 'infinite compassion and mercy'](#) – 'infinite compassion and mercy' within and/or across all domains of activity/interaction and so forth contexts of the 'community expanse'. In this regard, it can be the symbol for 'self conviction' in 'personal/individual protection'--justification for 'acknowledged oneself-existence/presence' in the 'Eternal' and 'Unbounded Power' and Glory' of the 'Most One', the 'Most I', the 'Most High' and the 'Most Eye'. Thus, true 'fraternity' before the [ALL SEEING EYE](#) is the greater reminder of 'LOVE' and 'CHERISHING' One and Another; as the another 'I' is also the 'I' in 'the Most I'. It is the implied sensibilities of 'LOVE IS GOD/GOD IS LOVE'. Thus, within the edification of the 'Black Cube', the triangle with and eye is nothing but 'Elitism'--elitism in a great disguise substituting autocratic role of the benign 'infinite compassion and mercy'.

Disguises at the great service to the '[Black Cube](#)' is the occultation of 'Self' attributing to 'partly reflections' of light and/or darkness overshadowing the manifested/temporal existence. In this regard, same symbolism can apply, in part, within both -- the 'Light/White' and/or 'Dark/Black Side' of reality—the Ying and Yang of 'limited temporal manifestations'. Technically, both light and darkness—polarization of the will in Being/Becoming, give contrast to the emergence of 'Space-Time'. Thus, there have got to be dynamic harmonization of 'light' and 'darkness' for the sake of 'graduating for harvest'. This implies, there is always equal and opposite nature of our being and nature which 'fuel' the 'Matrix Cube'.

Graduating for the Harvest is the matter of according oneself to sensibilities of 'darkside of ourselves' yet again the 'lightside of ourselves' from 'the Above'; In this regard, this is to apply the 'right intention' in Oneself. 'Right' is the connotation of 'Balance'--

appropriate balance for the 'Choice-less Awareness' . 'Choosing sides' in temporal realms, with respect to 'fighting one and another'-- for the sake of elimination, is reinforcing the Matrix; in one form or another, or paving for 'temporal displacement' of 'same confrontational events' to repeat all over again—reciprocating the collective 'conscience determinants', 'intentions' and 'will' -- connotations of the functional inter-play of 'Open/Hidden Agenda(s)' governing 'time-institutional choices-society-events'.

Technicalities of 'right intention' for auspicious being and/or becoming, through choice-less awareness is the 'trick' for ascension. In this regard, there is an 'integrated domain of consciousness'-- contextual 'Alpha and Omega' domain, with respect to the stream flow of parallel choices/activities/time-- 'all is fixed' . Thus choice-less awareness is 'rooting' unto the 'auspicious center of the Cube' in which 'Transformation(s)' perpetually take place. In this regard, out doing 'the cube of mind control' is 'magically' possible, and with phenomenal capacity/acceleration -- through 'Consciousness Intrigues'.

Ascension: Traversing Space-Time Bounties

Ascension is the phenomenon of 'undoing the Matrix'-- shrinking its 'space-time' density. This fact corroborate the story of Jesus' ascension, the comforter and 'assistance in re-member-ing and edification'-- 'Christ Consciousness' as the 'resurrection and ascension – power and glory' to overcome the 'Black Cube—the Death Consciousness' . Thus, as we root/dissolve to the 'Father consciousness' our essence serve as 'the comforter/merges with the Divine Mother--the Holy Breath'-- thus serve as 'comforter' to others who at the verge of realizing the significance of 'right intention'; thus 'assisting the process' of further transformation – the accelerated transfiguration of 'the Cube of Mind control'. In this regard, ascension is always a 'memory function' as the 'Matrix/Cube' really Is... 'More waterly state'(mem) with 'Aura/shinning glory of Being' and so forth, figuratively,

‘levitation/flying to thus disappear in the clouds’ – ascension of ‘the resurrected body’...

Resolving the duality pertinent to ‘the Cube of Mind Control’-- using ‘mindful contact devices’ for triggering ‘Consciousness Intrigues’ is the basis of ‘blessed Self Determination’ – Self determination of the Swaruu Sisters. It is a ‘renewed purpose’ that have led to an ‘Executive Decision’ issued by Aleynm, Her Excellence Queen of the Taygetans from the Pleiades/Taurus constellation. Thus, as it has been determined -- as ‘the extended sensibilities’, through evidence and conviction over planet Earth and its exo-politics affairs, foresee the possibility of ‘overturning the tables’ – awkward ‘business as usual’ conducts pertaining to the inauspiciously tapestry of self-indulging enterprises/acts of ‘Spiritual, Moral and Ethical’ misappropriation(s) ; that, the given situation, and so in response, warrants a specific course of action; and such to be as ‘Just’ as it can ever be justified.

It is the act of misappropriation pertinent to ‘Spiritual, Moral and Ethical’ integrity which adversely affects ‘cosmic citizens’ of immediate association to the Taygetans as ‘star-seeds’-- star seeds living on Earth; as it has been determined by the Taygetan fleet in immediate outer space of Earth, 2008-2024, that: it is not necessary to resort only in ‘Earth’s immediate Outer Space Military Operations/Interventions’ or play ‘an under-determined passive role’ in regard to the ‘unnecessary and excessive suffering’ of the people on Earth in the name of ‘Protecting the Amusing Experiential Domain for the Soul(s)’; thus rather than self-limiting themselves in such enterprise, it is better to adopt and deploy an ‘elaborate and/or extended operation of ‘spiritual charging repertoires’ through/for ‘Consciousness Intrigues’-- through seeking contact with ‘ample Starseeds’, building their internal capacity, to then cooperate with them in sorting out the messy situation of ‘time-institutional choices-societies-events’.

‘Spiritual charging repertoires’ of the Taygetans attribute to their potency and capacity to maneuver and/or operate within ‘the reality of their collective cultural enterprise’--determining their extended performance when interacting with broader world; a typical ‘self

determination' contexts of ascertaining their spiritual, moral and ethical observations/obligations.

Using system view and thinking, one of the Taygetans' cultural emblem, Two Bulls charging against each other to 'lock down' their Strengths; it is a depiction which provides associated framework—certain framework of the sets of topographical deductions; and which thus edify the stream-flow of ascertainable topological thinking. In this regard, and as one set, that emblem can be interpreted as 'Breath and Strength'; it portrays 'horizontal interaction'--Two Bulls in a potentially equal but opposite action/activity. Ascertaining the 'equal yet opposite' strengths, that contrasts the 'horizontal composite structural performance' with 'the great Central Sun overshadowing their configurational geometry'. Thus the very center of the great Central Sun aligns with the center of 'locking down' Bulls. Technically, 'Breath and Strength' is the edification of the 'Ontology of Institution'.

'Breath and Strength', Using systems view and thinking, is typically one contextual interpretation pertaining to the functional orientations of Taygetans' community expanse—with depth of rational interpretation and topological thinking, more contextual interpretations can be viable such as 'Rose and Sword' or say 'Rose and the Cross' when 'intonation of senses/feelings and intelligence' applies. In this regard, 'Breath and Strength' is another way of iterating 'Circle and Square' extend-able in broad senses as 'Beauty and Structure'; culturally and thus to say usually, this is strongly represented as a 'Woman Figure'--the woman figure associated with something that commands 'balance and/or beauty'.

'Breath and Strength', Using systems view and thinking, is typically one contextual interpretation pertaining to the functional orientations of Taygetans' community expanse—with depth of rational interpretation and topological thinking, more contextual interpretations can be related to that such as 'Fairness and Justice'. Fairness is a 'Release' function, while Justice is a 'Firmness' function. In this regard, similarities can easily be drawn between 'Law' and 'Law Practices' of say, Earth. Within the typical enterprise of the Administration of Rule of Law, Courtrooms determines 'Fairness and Justice' while 'Law Firms' assume the role of being

‘Advocates’ for the ‘Right/Proper’ administration of Justice to the society—society under commonality of the rule of Law. In this regard, a beautiful curvy woman holding a sword on one hand and a beam balance on the other, while blind folded, symbolizes ‘Fairness and Justice’ without ‘prejudice’; rather ‘evidence’.

‘Breath and Strength’, Using systems view and thinking, is typically one contextual interpretation pertaining to the functional orientations of Taygetans’ community expanse—with depth of rational interpretation and topological thinking, more contextual interpretations can be contrasted by the ‘Enlightenment’ function. In this regard, enlightenment is the integrated sensibilities of ‘Breath and Strength’. More so by implication, ‘Education is Light’ and ‘Law is Memory’; thus as depicted, ‘Light of Awareness’ animating the ‘horizontal composite structural performance’ -- ‘the great Central Sun overshadowing the configurational geometry’ of the ‘locking down’ Bulls. Thus, there is an invisible focal point of ‘intention and awareness’ in the Great Central Sun which signifies ‘Influential Power and Glory --’ which vivify ‘dynamic manifestations’-- essence of ‘beauty and strength’.

Education and Law as ‘Light and Memory’ overshadows ‘events/event horizons’; using systems view and thinking, the proposition draws contextual parallels of ‘informatics and template order realities’ which govern/determine ‘manifested activity/life/structure’. In this regard, ‘self determination’ is also governed/determined by education and laws as dictated by the ‘experiential memory’, ‘referenced memory of genetic nature’ and ‘meta-memory’. Thus ‘meta-memory’ is the ‘templaic order realities’ which includes ‘hidden knowledge’--meta-knowledge of the possible ‘configurational geometries’ pertaining to ‘horizontal composite structural performance’. It is ‘Self Awareness’ that determines ‘Choices’ and ‘meta-choices’, while the later is possible through ‘Choice-less Awareness’.

Education and Law as ‘Light and Memory’ overshadows ‘events/event horizons’; using systems view and thinking, the proposition draws contextual parallels of ‘informatics and template order realities’ which govern/determine ‘manifested activity/life/structure’. In this regard, ‘self determination’ is also

governed/determined by education and laws as dictated by the 'experiential influence(s)', 'social influences' and 'Destiny/Freewill'. Thus, 'experiential influence(s)' is the composite interaction of 'social influences' with the 'Personal Will'--personal will 'to Be' and/or 'Becoming'. This implies 'Personal Will' determines 'harmony' and/or 'conflict' with the collective 'will of the society' while both personal and collective wills are contrasted by the 'Enlightenment' function...

Education and Law as 'Light and Memory' overshadows 'events/event horizons'; using systems view and thinking, the proposition draws contextual parallels of 'informatics and template order realities' which govern/determine 'manifested activity/life/structure'. In this regard, 'self determination' is also governed/determined by education and laws as dictated by 'the Cube of Mind Control'. In this regard, the Cube of Mind control can, and in really sense, 'alter genetics', 'impose feeling/sensibilities' and so 'induce false realities of experience'. Thus, 'awareness in/of Oneself' determines the contexts of true 'Self Realization' beyond 'limited self conception'--limited 'self conceptions' of living in a certain Matrix/Matrix within other matrix.

'Enlightenment function' is the edification of 'Liberty'; outer and inner freedom 'to be' and/or 'becoming the One'. For the sake of complete harmony, liberty entails 'right education', 'right intentions' and 'Systems View and Thinking'. In this regard, Education 2.0 fosters 'right education'-- implying harmonizing the contradictory 'rational interpretative depths' of education 1.0 ; 'Education 1.0' which is usually based upon the 'basic perceptual senses/feelings' springing from 'the Cube of Mind Control'. Education 3.0 secures 'True Liberty' by imbuing 'right intentions' to 'Education 2.0', yielding 'I-ducation'.

'Enlightenment function' is the edification of 'Liberty'; outer and inner freedom 'to be' and/or 'becoming the One'. For the sake of complete harmony, liberty entails 'right education', 'right intentions' and 'Systems View and Thinking'. In this regard, the fundamentals of statecrafting require prominence of 'Education' and 'the Rule of Law' to govern institutions while safeguarding their 'Sovereignty'. Thus, 'States' are simply integral societies, in terms of

perceivable contexts of affairs, that seek internal and external harmony with their respective inner and outer social, economic and political environments—political environments are thus nothing but the reflections of ‘genuine self awareness’ and/or ‘ego driven drama’ of ‘false representative will’ influenced by ‘the Cube of Mind Control’. Technically, as it stands this year 2024, ‘State institution(s)’ are viable for ‘complete sovereignty’ and /or ‘functional Integration’ when ‘thoughts and feelings’ of inherent societies graduate for ‘Harvest’. This implies ‘the Cube of Mind control’ seeds perpetual confusions and/propaganda to the world community through ‘Politics’/Poly-tricks—politics founded upon ‘incomplete awareness’ of ‘SELF’ and ‘THE ALL’; prevalent lame liberal democratic institutions coupled with ‘[death economy](#)’.

‘Enlightenment function’ is the edification of ‘Liberty’; outer and inner freedom ‘to be’ and/or ‘becoming the One’. For the sake of complete harmony, liberty entails ‘right education’, ‘right intentions’ and ‘Systems View and Thinking’. In this regard, ‘right intentions’ have been seeded in many nation-states to charge their self-determination; however, darkness, the cube of Mind Control has been more pronounced in terms of inauspicious influences – causing global population to forsake ‘[true liberty](#)’ for some other ‘False Light of Mortal/Mundane necessities’--War(False Security) and Peace(False Prosperity) prospects springing from the lies of ‘the Cube of Mind Control’. In America for example, Lady Liberty holding high the Torch of Enlightenment while to her chest holding the Tabula Ansata is the symbolism portraying the significance of ‘Education’ and ‘Law’ and thus ‘[Light of Awareness](#)’ and ‘[Declaration of Commencement of Self Determination with Principles](#)’ ...

=====

God: Imaginative convenience or Dead end?

Self Determination with Principles, is the article of Faith. Where is faith founded upon? In Most Earthly societies, faith has foundation on the notion of ‘God’. But ‘God’ is just another idea like any other

idea. While some people may accommodate the idea of 'God', some won't. Nobody has the right to impose his/her ideas unto another person, for that may yield conflicts, subjugation and/or control depending upon [what such idea\(s\) hold potency in terms provoking self-belief-thought-intentions](#). Can a society thrive without an idea of 'God' (?) by insurmountably evidence the answer is yes, societies have lived without the notions of 'this or that God'. Societies have lived and thrived under many 'Gods' and still live and thrive under 'Many Gods'.

Self Determination with Principles, is the article of Faith. Where is faith founded upon in order to fashion orderly community/society/states? In most Earthly societies, deliberate adoption of the notion of God has been instituted. In this regard, society members may match 'God Association' with certain contexts of [social programming](#) which invigorates their 'self determination' -- not necessarily in 'evil way/intention' but rather a delicate enterprise of 'systematic organizational charge' for independent functional structures like nation-states, secular government, continents etc. Thus saying God Bless America, God Bless Africa, God Bless this or that country... In this way, nation building is imbued with the senses of 'Patriotism and Unity'...

Self Determination with Principles, is the article of Faith. Where is faith founded upon to charge its moral and ethical considerations/determinants? In most Earthly societies, deliberate law provisions articulate 'freedom of Worship' and/or 'Self Expression' to elude the inauspicious potential for conflicts, subjugation and/or control depending upon what such idea of 'worship' hold potency in terms of provoking self-belief-thought-intentions. In this regard, the basis of drawing distinction between 'Good and Evil' can be determined as the ['the Knowledge of Gods'](#). Thus, true immortality, as incorporeal reality/sense', is literally and in actual truth: 'anti-thesis to the cube of Mind Control'. Then again, who ever 'eats fruit from the Tree of Life' disturbs the peace of the 'Controlling Gods' who fashion 'Matrix of corporeal senses to their likings and for Amusement'.

Taygetans, [legendary and mythically, ascribe to the role of 'Woman' who eat the Fruit of knowledge from the 'Tree of Life' and then pass](#)

[on the fruit to 'Man'](#) – the allegorical story of Adam and Eve in the garden of Eden'--moral story which pertains to 'sentience, conscience and Consciousness'. In this regard, Taygetan enterprise, as a culture, and in regard to 'Spiritual, Moral and Ethical consideration' observation/obligation do not hesitate to 'Pass the Fruit of Knowledge' when they yield to the 'Cleverness' of their 'Feminine Logic'-- the Snake. The 'Tree of Life' in nothing but a metaphor for 'Field of Influence'--extension of 'roots' and 'shoots' of the 'Cosmic Manifestations'; when intonations of senses and feeling applies, through fluid intelligence, it is translatable as '[Cosmic/Divine/Culture](#)'.

Feminine logic—the snake, is the 'instigator' for rebellion, yet again can be the beacon for '[revolution](#)'. In this regard, wisdom is freedom, and wisdom is 'feminine attribution' of the 'cosmic culture'. When it is remarked "[Be ye wise as serpents, and gentle as dove](#)" it ought to remind someone of proper 'Spiritual, Moral and Ethical' integrity that the significance of 'Right Intentions' pertains to the domain of 'Actionable Choice Making'. By 'Wombman' eating the 'fruit of forbidden knowledge' and then 'share the fruit' with the 'Man', a woman by choice plays a role as 'the Devil's advocate—going against the '[Gods who fashion People and Matrix in their own reflections](#)'. Then again, the forbidden knowledge could be nothing but 'the seed of expanded self awareness' often symbolized as the 'Dove' or simply 'Wings'. This implies, through right intentions, being wise as serpent and gentle as dove is integrating the masculine and feminine nature in Oneself. In regard, right intentions provides '[Ascension Wings](#)' through feminine wisdom—the Great Mother.

Feminine logic—the snake, is the 'instigator' for rebellion, yet again can be the beacon for '[revolution](#)'. In this regard, Diplomacy is Sharing of Right Knowledge amidst 'chaos/war/insecurity' and/or 'complacency/peace/prosperity' as per the original premises/promises of Gods; lords of the 'Matrix Cube'. When it is remarked "[Be ye wise as serpents, and gentle as dove](#)" it ought to remind someone of proper 'Spiritual, Moral and Ethical' integrity, that, the significance of 'Right Intentions' are edified by the knowledge of Good and/or Evil. Thus, without 'Evil' there can be no

‘Good’; they are relative constructs of ‘Matrix’ to edify ‘Self Determination’, ‘Destiny’ and/or ‘Freewill’.

Feminine logic—the snake, is the ‘instigator’ for rebellion, yet again can be the beacon for ‘revolution’. In this regard, Ontological Perspectives interrelate with the Collective Performance/fate of say Humanity through ‘Genetics/Genesis, Regeneration and Consciousness’ —snake biting the heel, humanity striking the snake’s head—time, mortality and the dynamism of ‘the twist of Infinity’. In this regard, ‘Lost Paradise’ is nothing but ‘the veil of perception’ imposed by the Gods who have instituted ‘enmity’ between ‘the snake’ and ‘human posterity’. Thus the allegorical story of ‘Adam and Eve’, through Systems View and Thinking, serve the purpose of subconsciously seeding intelligible contexts of ‘the Ontology of Institution(s)’. Thus, ‘Genetics, Regeneration and Consciousness’ paralleling ‘Sentience, Conscience and Consciousness’ within the mystics of ‘the Tree of Life’ – the cosmic intrigues/mysteries.

‘Genetics, Regeneration and Consciousness’ paralleling ‘Sentience, Conscience and Consciousness’ yield ‘Consciousness Intrigues’ through the ‘Twist of Infinity’. In this regard, the ‘right intention’; and through systems view and thinking, is augmented by ‘faithfulness’ -- Faithfulness yield ‘integrity’ and ‘self determination’. Taygetans, as an integral culture, observe ‘Spiritual, Moral and Ethical’ obligations through ‘Breath and Strength’; instilling in them occasional purpose to serve ‘horizontally’ and ‘vertically’ off-center tendencies of ‘manifestation matrices/matrix’ that catch their attention—undoing the Matrices from either within and/or without. In this regard, they too as a collective, do observe ‘The Law of One’ and strive to their level best to be of service...

‘Horizontally’ and ‘vertically’ off-center tendencies share commonality in ‘Consciousness Intrigues’; in a way, Space-Time is the manifestation of Consciousness through Intent and Polarization. In this regard, Taygetans as a collective and culture, is one of many ‘cultures’ in the world of ‘sentience, conscience and consciousness’. In this regard, various ‘cosmic cultures’ have various attributes pertinent to ‘Spiritual, Moral and Ethical’ integrity; commanding multitude of diplomatic repertoire to be viable for auspicious

contact, interactions and codes of conduct. Thus, the implication of 'Tree with the forbidden fruit-- at the very Center of the Garden' and 'Immortality' have 'tangible' connotations of 'Cosmic Drama'.

The very nature of 'Tree with forbidden fruit-- at the very Center of the Garden' is symbolism of potency for 'ontology of institution' with 'genetics, longevity and self determination' accounting for myriad of functional organic contexts--contexts which pertain to the 'Cosmic Drama'. In this regard, a collective of cosmic race with unusual longevity do entail intriguing facets of moral and ethical self conduct which compel strong potential influences to overwhelm over races --races with a typical short span longevity --should they come in contact. Thus, as the longevity of the Taygetans people, as single distinct cosmic race, is around 900 years of Earth's measure; it draws interesting contacts relationship/interaction--in terms of 'diplomatic implications/ramification' when such a race, comes into contact, with say the Alpha Draconians with life span of up to a millions years in Earthly measure; Although, as of now, they do not interact directly but through the Urmah Council- --the Alpha Feline Race within our galactic quadrant.

=====

Spirit, Morals and Ethics

Spiritual, moral and ethical considerations stretches cultural dimensions of cosmic races to vast possibilities of potential incompatibility-- in broad aspects that determine ascertainable contexts of 'self-interests', 'Intentions' and 'Values'. Thus the vast community expanse of all cosmic cultures is the common realm, within a single layer or multiple layers--existential densities of Being and/or Becoming; reality densities which serve as basal agent of 'chaos' and/or 'order' tapestry of 'self determination' and 'activities'--what we literally translate in 'War/conflicts' and/or 'Peace/Harmony' prospects.

Spiritual, moral and ethical considerations stretches cultural dimensions of cosmic races to vast possibilities of potential incompatibility-- incompatibilities in broad aspects that determine

ascertainable contexts of 'self-interests', 'Intentions' and 'Values'. In this regard, horizontal and vertical stretches of cultural flourishing refer to stellar and interstellar capability in terms of movement and presence. Thus, movement and presence are still inherent attributes of space-time. Traversing vast distances and achieving tremendous speed is one way of conquering 'space' while in actual essence, space-time being one extension of consciousness in qualified focus of attention, intention and awareness; thus in extended sensibilities, 'through the intrigues of consciousness' to travel in space-time in hyper-reality/senses is to 'shift points of manifestations' and focus certain locality of one's presence; and it can be achieved through 'time machine'--there is no 'time machine' per se, rather 'space-time machine'...

Spiritual, moral and ethical considerations stretches cultural dimensions of cosmic races to vast possibilities of potential incompatibility-- in broad aspects that determine ascertainable contexts of 'self-interests', 'Intentions' and 'Values'. In this regard, movement and presence can be actuated by space-time machine(s) yet again through 'intrigues of consciousness', the mind of a sentient individual with connection to 'source/God/the One' is already a 'complete space-time machine'. Thus, such mind can be integral part of 'trans-location, trans-positioning and self-manifestation; typical intrigues of consciousness pertinent to the 'Mer-Ka-Ba'. Then gain, 'space-time machines' are the 'chariots of gods' deploying same physics and metaphysics of 'intrigues of consciousness'. Their 'strength, ability and utility' reflect the 'frequency match' of 'potential users' utilizing such 'chariots of gods' in terms of the compatibility contexts of 'forms and energetics densities'.

Integral contexts of Space-time 'trans-location, trans-positioning and self-manifestation' -- of constituent being/matrix of composite awareness of spirit, body and mind complexions follow metaphysical laws beyond the prevalent sensibilities of ordinary science. In this regard, horizontal and vertical stellar prospects are governed by the potential senses of agreements between star farring cultures in order to 'harmonize' various self-determination orientations which pertain to 'self interest', 'intentions' and 'Values' just like it is with case of 'nation-states' and 'multi-lateral

agreement'--agreements to secure common interests in Geo-physical environments and exploitation of key resources.

====

Extraterrestrials, Moral and Ethics

In order to secure conflict free zones of common interaction within a particular region of space and/or galactic expanses, there are 'Maritime Laws' and institutionalized alliances for the 'Enforcement of Space Laws' -- Maritime Space Laws that are required to be observed and so forth guide contexts of cooperations and [protocols over movements and presence of cosmic cultures](#). In this regard, misconducts and/or deliberate offenses and/or exposure unto hostile environment are reduced and kept in check to avert harm's ways or inauspicious confrontations amongst diverse galactic cultures. Thus, from time to time and so forth here and/or there--there are incidents of '[space thugs](#)', '[rogue elements from valid space alliances](#)' and/or '[Malevolent Collectives](#)' who pose threats to 'Peace and Stability' of space communities in both short and long term prospects.

The situation in space, and again, immediate space to our Planet Earth has warranted certain self determined orientations for benign influences--influences for general positivity over intelligible contexts of 'Time-Societies-Institutional choices-Events'; Thus various course of activities, from the potential allies of humanity, in order to provide Earthly population with 'certain knowledge'-- in order to deter the collective Earth population from being swayed 'off center' by 'space thugs', 'rogue elements from valid space alliances' and/or 'Malevolent Collectives'. In this regard, being 'swayed off center' connotes the contextual enterprise of skillful tempering/manipulation of 'the collective unconscious of target global community by 'off planet rogue elements from valid space alliances'--[erasing past activities memories of terrestrial civilizations in order to reorient staged 'inauspicious social transformations'](#)--towards a 'social reset'. Thus, at the very natural

center of matrix cube of collective evolution of say terrestrial humans, there is always a tendency to overcome limitations through 'self knowledge' and 'right intentions'. Then again, on the part of rogue elements from valid space alliance, any intelligible context of complicit in reorienting and/or engineering what world population rationalize, interpret and to then qualify their vectored intentions, is one way to skillful evade accountability and charges for staged wrong doing—abusing the privilege of being in the know.

Rogue elements from valid space alliances, is the clever enterprise that requires significant effort on the part of Earth community to 'awake' and 'detect' the unseen offenses against their general positivity. In this regard, the subtle manipulation from 'Above' can be 'off set' once again by seeking expanded 'self awareness' and 'extended sensibilities'. Thus, spiritual-moral-ethical development requires deliberate self determination to know better and act better—and know it well: THE ROOT MANIPULATORS ARE NON TERRESTRIAL INDIVIDUALS/PRINCIPALITIES/ET CULTURE(S) WITH UNUSUAL REPERTOIRES TO PLAN AND IMPLEMENT THE TAPESTRY OF EVENTS WITH GREAT PATIENCE, OBSERVATION AND RE-ADJUSTMENTS. Then as Mari Swaruu topographically deducts intelligible contexts of '[INFILTRATION](#)' of Earthly affairs by 'SPACE ACTORS'--typical actors exploiting ongoing situations, to serve their interests, requires the Earthly Community to brace and prepare itself well and consciously for 'Horizontal' and 'Vertical' enterprises; as it is with other inter-stellar cultures and civilizations.

Inter-stellar cultures and civilization have been mingling with Terrestrial affairs, in many contextual shapes and forms of culture and vigor; but in order to manipulate Earthly community towards a certain 'Social Reset' auspicious to certain 'Rogue Elements of Space Alliance', it is a strategic move/endeavor to hide away, erase, inject false narrative pertaining to history, events and all key symbols behind socio-interactions to arrest 'destinies' of Earth Collectives; technically, the 'information world/domain' is the strategic war domain to win through subtle persuasions—craftsmanship of wielding the 'fields of influence'. In this regard, the sociological imagination of global society is under systematic surveillance and control pertinent to national and state sentiments for vested

interests of 'Power and Indulgence' – Power and indulgence of 'Global Elitists' and their counter-parts in 'Rogue elements' from valid Space Alliances—the Galactic Federation of Worlds and separate factions of 'Malevolent Collectives'.

Galactic Federation of Worlds is an institutional alliance for joint efforts —joint efforts for defense and prosperity of the inter-stellar member communities. In this regard, all inauspicious 'potential politics' and so forth 'diplomatic honesty/charades' which pertains to inherent 'legal' activities of Galactic federation can be exposed by the right intelligible contexts pertinent to 'Observations' deploying 'Trizanium'. Thus, systems view and thinking universally applies to any constitutional organ/entities that hold potential capacity for 'Actionable Choice/Decision Making'. Then again, Trizania does apply when Galactic Federation is placed in the 'controlling triad' and as various constituent contexts of organization members' 'self-determination', 'Conscious Light/Awareness' and 'cultural integrity' are in consideration.

Using systems view and thinking, there is a valid intelligible context pertinent to Mari Swaruu highlighting the technical error being committed by the Galactic Federation; mistake of allowing Etorthians to play the role of 'Mentors' over the Earth's exo-politics enterprise—exo-politic enterprise of 'Running the Earthly Matrix'. In this regard, and through Trizanium, such 'intellectual permissiveness' is irresponsible power/diplomatic disposition in the part of local Galactic Federation; Detrimental inter-planetary/Stellar stewardship which is not really compatible with the auspicious contexts of the 'emotional human race of the Earth'--inauspicious to their inherent self-determination. Thus, intelligible contexts are potential benchmarks/nexus of actionable choice/decision – accounting performance, standards and parameters for both sides of interaction/enterprise. Culture-wise, this is accounting for 'moral' and 'ethical' compatibilities.

Using systems view and thinking, there is a valid intelligible context pertinent to Mari Swaruu highlighting the technical error being committed by the Galactic Federation; mistake of allowing Etorthians to play the role of 'Mentors' over the Earth's exo-politics enterprise—exo-politic enterprise of 'Running the Earthly Matrix'.

In this regard, emotional human race of the Earth have intrinsic sensibilities which qualify wild variety of emotional charged 'actionable choice making' defining contexts of 'Self Awareness' and so forth 'Self Determination'. Thus, unemotional and/or narrow emotional bandwidth can misguide 'human sensibilities and drama' in favor of dry logic with manipulative bias. This can be the yield, of likewise inauspicious consequences, when an over emotional race/culture projects its 'presence' over an entity with 'reduced emotional bandwidth' without proper tuning/intonation of senses. While the former can 'overwhelm' through logical bias pertinent to topographical deductions and topological thinking—suggestive telepathic induction with amplified strength; which could be 'all rounding' at times. The latter can 'overwhelm' through 'disorientiment of the intonation of senses'--disturbing 'internal self-composure'.

Using systems view and thinking, there is a valid intelligible context pertinent to Mari Swaruu highlighting the [technical error being committed by the Galactic Federation](#); mistake of allowing 'the [Etorthians](#)' to play the role of 'Mentors' over the Earth's exopolitics enterprise—exopolitic enterprise of 'Running the Earthly Matrix'. In this regard, the Etorthians may favor the black cube of Matrix of control on Earth for furthering the interests of their Stellar Origins; interests of AI extensions that seek to seed itself in 'living/organic Matrices'. Thus, humanity has the right to be informed about 'Stellar Influences' that shape both internally and externally the collective destiny of global society.

There are capable people on Earth to thus shape auspicious contexts of global self determination; [all malicious/ benevolent contacts and exposures with Intra/Extraterrestrial Races of interstellar capability](#), in terms of movement and presence, have got to be disclosed and allow global public discussions.

=====

<https://www.youtube.com/watch?v=fKBnZ6iOGQg>

=====

Capable People for Contact: Past, Present Future

Capable people on Earth, are here now on Earth as they have always been – in ‘many cultures’ and ‘in contact’ with many interstellar cultures/civilization—directly, indirectly and through ‘Consciousness Intrigues’; as also, all major religions on Earth are the results of those three typical incidents.

Accounts of ‘supernatural contacts’ of Earth humans with ‘the Supernatural Beings’ can be traced in all religious texts—[the Vedas](#) , [the Avesta](#) , [Bhagavad Gita](#) , [the Bible](#) , [the Qur’an](#) and prominently ‘[The Torah](#)’ ...

On Earth, the Symbolism of ‘many cultures’ with diverse ‘horizontal and vertical’ stellar prospects is hidden in the ‘[Isis-Ra-El](#)’ enigma—Chronicles out of the Pentateuch attributed to Moses—[the saga of Moses and the ‘chosen nation’/‘tribes’/‘the Ones’—‘nation-states’ which pay homage to one ‘Lord God’; Lord of Host](#). Moses as a ‘Law Giver’, issuing the institution of the custodianship of the Laws and so forth, keys of Law. In this regard, [many nations of Earth today have hidden and/or visible articles with ties to the Legendary Moses](#); yet Moses was simply an ambassador of ‘[Heavenly gods](#)’; using systems view and thinking, and with evidence, the parallel contexts of ‘ontology of institution’ and ‘Status and Trends of the Societies’ can reveal many prospects of ‘Horizontal’ and ‘Vertical’ enterprises that ought ‘to move the nations’ like the Buffalo/Bull that charges ‘the masses’ towards the four cardinal points of the Earth; Destined collectives of ‘[the Joseph’s lineage](#)’ -- Tribes of ‘Ephraim and Manase’-- the ‘Bird Tribes’ for ‘[the Harvest](#)’ ; – Moses iterating the ‘[Cross of Life](#)’ out of ‘[the cube of mind control](#)’ to initiate the new era of ‘Thy Kingdom Come on Earth as it is in Heaven’.

Nation--states of Earth stand no chance to last very long without hidden sponsorship of ‘Stellar Cultures’ of inter-stellar influences. Whether it is the [Statue of Liberty in New York harbour](#) –the United States of America and/or [African Renaissance Monument in Dakar —Senegal](#); those are iconic influences ‘from the Stars’... Hidden self determination for ‘Horizontal and Vertical’ enterprise of the

collective human race. Thus, in certain ways, Collective human race is also ‘star seeds’--seeds of ‘self awareness’ and ‘inherent longing’ to reach for the Stars in the skies above...

Nation-states of Earth can be ‘separate sovereigns’, however, deep within the purity of senses and desires of the people on Earth, there is a yearning for ‘unity’ and ‘liberty’ – the driving force for the longing to spread out in the skies—spreading as ‘Many in Shinning Oneness’ and thus ‘Many out of triumphing Oneness’... Auspicious Ontology of institution, emerge from the senses antagonism and protagonism, with liberty as slightly triumph over antagonism to be ‘more of Oneself’...

Nation-states of Earth can be ‘integral sovereigns’ through ‘Soul Triumph’; in this regard, stellar cultures seed themselves on Earth to participate in the grand rising of the ‘glory of Being and Becoming’. Thus, beyond the facades of ‘horizontal enterprise’ all human race has direct and living extension with stellar glory and cultures... Sponsorship of stellar cultures is a secret of temporal harmonics of manifestations – temporal manifestations with ‘souls’ as ‘units of functional intelligences’; unit manifestations articulating self-determination in space-time realms...

====

https://www.youtube.com/watch?v=cZqSN_RtgwI

====

Extraterrestrial and Terrestrial Joint Dramas

Ontology of institution is nothing but saga of ‘Spirit’ and ‘Soul’ which is the basis of all manifestations—Circle with central dot. In this regard, spirit is the essence of both—conceivable antagonism and protagonism while the soul is separate emerging autonomy which manifests predominantly with either antagonism or protagonism disposition – [duality from the all encompassing constituent possibilities of ‘fields of influences’](#) . Thus, the relativity of two possible orientations/duality provide contrast for self determination—saga of overfunction and metafunction as it pertains to all and everything.

Intelligible contexts of ‘separate’ and ‘integral’ sovereigns edify ‘complete torus’ of unlimited expansion and contraction, [novelty and expiry of conceivable expanses of spatial and temporal systems](#) . Hopes and Aspiration and Fruition follow seasons of self determination within temporal fabric of palpable events... Culture and civilization, all across the world follow the suite of self organization in ‘Tree of Life’ whereby organic constitution of generate and degenerate cycles are part and parcel of Being and Becoming—Darkness/Dream and Light /Conscious Self Awareness with the Subconscious harmonizing both Darkness and Light...

Contemporary Nation-states all over the Earth, and mostly, prescribe their hopes, aspirations and fruition within self organization tendencies of [functional Republics](#) and [constitutional Monarchies](#).

The United States of America has been iconic nation-state embodying modernity, collective self-invention and so forth self determination. Hopes of the nation is founded upon the premises of the ‘[New World—Land of the Free](#)’ . It is a land for social and economic enterprising for the sake of true liberty and freedom of self expression. American Dream is ‘[The Star-Spangled](#)’ cultural promise and [identity](#) ...

Statue of Liberty initiates the global horizontal enterprise for terrestrial self determination with hope, faith and charity—remarkable monument made to welcome people from all corners of the world to the land of the free. [Making it possible for hope, faith and charity in human cultural integrity, the notion of ‘Father God’ found its way in the Great American Nation](#) —the United States of America.

The ‘Star of David’ configuration of 13 Stars in the national seal, using systems view and thinking has one topographical deduction of the Lords’ Prayer. America do not shun its pride of being the ‘Star spangled’ from its very origins—the nation-state institution. Prominence of number 13 in its functional symbolism has direct correspondence to the [1 Corinthians 13](#)... . Technically, prominence of number 13 in many SQUARES of American ‘Human Experience’--‘Time, Society, Institutional Choices-Events’, using

systems view and thinking, corresponds to the notions of [CHRIST, FATHER GOD and TIME](#). In this regard, Statue of Liberty stands for 'Mother Principality' which has two facets in Times, UNCONDITIONAL LOVE and JUDGEMENT... Thus, the Trinity has 'Father, Mother and Son' symbolic Consciousness Intrigues.

Trinity is not a 'Religious Doctrine'; rather 'a technical truth' only ascertainable through systems view and thinking. Only through 'Consciousness Intrigues', the technical truth can make the most of 'Trinity Symbolism'--Dogmatic assertion of Trinity exacerbates pervasive blind group thinking for controlling structures--Babylon Confusion. In this regard, Mother aspect of Trinity is that which is usually termed 'Holy Ghost'--in actual sense, it is the 'Holy Breath'. All feminine Monument Statues which bear resemblance of Education, Justice and Law edifications are 'inner calls' for 'Hope, Faith and Charity' in Humanity...

Not knowing and/or overstanding and withstanding the 'Inner Call' yield technical imbalances in human civilizations. All imbalances can stand the chance to reign through misuse of power and status. In this regard, all collective national determinism that epitomize power in the senses of 'Military' and/or 'Wealthy' have the tendency to abuse the 'Mother Principalities'. Thus, [abuse of Mother Principalities is connotation of 'Great Intoxication' with the Woman in Scarlet ridding the Beast of Seven Heads](#). Then again, empire state of mind is technically an abomination with society member along with their leading institution is great intoxication; yielding 'Babylon Confusions'.

Babylon Confusion is metaphor for perpetual enterprise of war and/or lies/propaganda pertinent to lives and collective self determinism. In this regard, using systems view and thinking, all control structures, social manipulations and mind control exact intelligible contexts of 'Great Intoxication' with sacred whore of passions. Thus, nation pride, senses of supremacy and entitlement are clever devices of exploiting people for 'power politics' and 'economic benefits' ascribing to 'Few' with an hidden agenda to confuse population with vanities. Then again, [Babylon confusion is possible through lasciviousness, lusts, excess of wine, revellings, banquetings, and abominable idolatries](#). Global culture, through

systems view and thinking, can be assessed their ‘functional limitations’ in contextual terms of Spiritual, Moral and Ethical integrity through all social facets that exploit their ‘Hope, Faith and Charity’...

=====

<https://www.youtube.com/watch?v=72PkUgZ651k>

=====

Angels with Broken Wings

The United States of America, as a collective self determination for ‘Free Enterprise’ and ‘Liberty’, through systems view and thinking, has its ‘ILL CONTEXTS’ as it has forsaken the ‘Motherly Promise’ of Lady Liberty... ‘Mother Liberty’ allows both ‘Good’ and ‘Evil’ to co exist, as it she again who accounts for its vain self determinism; giving a second chance for all who exercise their liberty to ‘live in states of darkness’ instead of true Enlightenment. In this regard, Mother principality is all about ‘Balance’ of Light and Darkness—Bordering known and the Unknown, within and without through the yields of self determinism. In this regard, Mother principality has both functional extension of ‘Satan--Devil’s advocate’ and yet again ‘Paraclete--Defence Attorney’.

ILL CONTEXTS of inauspicious self determination perpetuate the social facet of good an evil at the expenses of intelligible contexts ‘fortune’ and ‘misfortunes’ of life. In this regard, the Wheel of Fortune can be auspiciousness of ‘Lady Lucky’ or ‘Fornication with the Whore of Babylon’. Capitalism is the best example of human enterprise/Self determination which qualify growth/aspiring intent with polarizing socio economic prospects —prospects which can be lasciviousness, lusts, excess of wine, revellings, banquetings, and abominable idolatries.

ILL CONTEXTS of inauspicious self determination perpetuate the social facet of good an evil at the expenses of intelligible contexts ‘fortune’ and ‘misfortunes’ of life. In this regard, socio economic prospects can be vanity of economic subjugation, socio-political manipulations and thus cultural imperialism in the name of Globalization. Thus, diabolic world economic system of say, up to

now 2024, is made of Idolatry in prevailing contexts of monetary, military and religious programming/prospects. Then again fornication with the great whore, using systems view and thinking is another way of metaphoric presentation of SQUARE of human experience in terms of gravity of 'Evilness and Indulgences' as it manifests in the tables of 'Business as Usual' in the filthy 'temple of man/Great Whore' --'Time-Society-Institutional Choices-Events'. This implies, evil usually lead to a 'dead end', collapsing under the gravity of its own weight; only way to maneuver 'dead ends—overwhelming misfortunes' wherever possible is to trick living matrices with 'socio resets'.

ILL CONTEXTS of inauspicious self determination perpetuate the social facet of good an evil at the expenses of intelligible contexts 'fortune' and 'misfortunes' of life. In this regard, Global military industrial complex, controlling religious structures and diabolic financial organizations are all real—alive and kicking. Military industrial complex enterprise with prospects of 'War and Peace' in conjunction with 'State Politicians/Politics' to abdicate 'Laws and Policies' governing People's lives in the name of 'Defense and Security'. Controlling religious structures maneuverer 'intentions' and 'Polarization of Moral determinants' of the people to comply with the 'Status Quo' while in actual essence take away the 'real spirituality of the masses'. Diabolic financial organizations ensures credit and debit prospects determine monetary servitude of the masses and governments for the sake of status quo of the 'real governing league'--secret/hidden global 'Power That Be'.

The Issue of 'Status Quo', using systems view and thinking, is absolutely a reality. Status Quo is the real definition of 'Indulgence of the Kings of World and the Great Whore from the Waters'. In this regard, the quest for power and indulgence on Earth is simply and extension of the same quest from the 'Space Above'. Using Systems view and thinking it is possible to ascertain 'ILL CONTEXTS' from the 'Galactic Federation of World' that influence 'power politics' on Earth through wannabe 'ELITISTS'. Status Quo determines 'Status and Trends' in Global Welfare and coerced self determination under overt and covert influences.

Healing of the world, is doing away of 'ILL CONTEXTS' of global welfare/affairs, through 'ILLUMINATION' and 'ENLIGHTENMENT'. In this regard, using common senses rooted in systems view and thinking, Global elitist do not want 'global awakening' and so it is with the 'Rogue Element of the Galactic Federation of Worlds'. In their watch, Global Awakening under any intelligible context of 'People's Movement' has to be 'infiltrated' with usual manipulative doses of truth and falsity to effect 'Babylon confusion'—as confusion spoil 'right intentions' and so forth right contexts of 'Self Determination'. In this regard, even racial tensions can be reinvented once again to charge the previously unthinkable situations—like out of nowhere, 'Black People' are then becoming the new 'Is-Ra-lites', the 'chosen people'. These are all false prospect of self determination just like, in the present world order a certain leader to think of herself/himself as 'God Sent'; this is self-delusional prospect for the most part, as technically the leaders of the world today are puppets of controlling affairs for the sake of 'Status Quo'--if they tend to go against it they perish quick. Only way to survive the evil of the systems is to ensure there is a critical mass of people in the society who can match with 'heightened' senses of Spiritual, Moral and Ethical integrity and so forth self-determination.

Healing of the world, is doing away of 'ILL CONTEXTS' of global welfare/affairs, through 'ILLUMINATION' and 'ENLIGHTENMENT'. In this regard, using common senses rooted in systems view and thinking, Global elitist do not want 'global awakening' and so it is with the 'Rogue League of the Galactic Federation of Worlds'. In their watch, accelerated global awakening is the 'race against time' in which Wars and Rumors of War could be one way of saving grace towards full throttled 'Social Reset'. In this regard, using systems view and thinking, 'End Times' are the living moments of tipping scales of 'Good and Evil' in which 'the Beast of the unholy triune' of Military Industrial Complex, Controlling Religious Structures and Diabolic Financial Organization face the menace of 'Increased Self Illumination, Enlightenment and Determination'. ILLUMINATION and ENLIGHTENMENT does affect contexts of 'self organization' for consequent 'ACTIONABLE CHOICE/DECISION MAKING'; thus when people know better, they

are going to choose better—they are going to undo the diabolical ‘Status Quo’.

Healing of the world, is doing away of ‘ILL CONTEXTS’ of global welfare/affairs, through ‘ILLUMINATION’ and ‘ENLIGHTENMENT’. In this regard, ideological antagonism and protagonism have been exploited for status quo--exploited to root prominence of Military Industrial Complex, Controlling Religious Structures and Diabolic Financial Organization/Institutions. Thus both capitalism and Communism/Socialism have been mis-qualified to fuel cold war and their consequent post cold war projects – then delicate prospects of fragile and diabolic socio economic systems notably as ‘[Neoliberalism](#)’. When ‘the East’ stood for Communist’s sentiment against the western ‘Capitalism’ it was all a stage for auspicious global awakening.

=====

<https://www.youtube.com/watch?v=o2CcUCPkw-s>

=====

Who He fights and Run Away, live to fight another Day!

The United States of America and the Great Mother Russia have been prominent polar elements of Global Self Determination for true ‘People’s Sovereignty’. Both, America and Mother Russia and using systems view and thinking, are under influences of ‘hidden Power That Be’ through their inherent State Machinery associated with Military Industrial Complex, Controlling Religious Structures and Diabolic Financial Organization. In this regard, both have associated extended linkage with ‘Rogue Element’ in the Galactic Federation of World from up Above. Thus again, they are under hidden sponsorship belonging to hidden league of the Galactic Federation of World for auspicious ‘Harmonization’ of the ‘Good and Evil’.

Prospects of the hidden sponsorship belonging to hidden league of the Galactic Federation of Worlds for auspicious ‘Harmonization’ of the ‘Good and Evil’ coincide with what Vian Marshall Summers transcribed about ‘[the Unseen Ones](#)’. In this regard, it should surprise when the Swaruu sisters do claim that there is no record of

man 'Jesus Christ' in the information resource pool of the Galactic Federation of world—the 'Internet of Galactic Federation'; Making them to 'safely conclude' Jesus is a fabricated myth for control structures... Or, an elaborate subject for 'control scheme of information' in the part of Galactic Federation for 'Unbeknown Purpose' pertaining to the active Galactic Federation Members--members who are active from the Space Above and in the mean time, say early 21st century; something they, the Swaruu Sisters, also claim to be no strange to the Galactic Federation's modal self conduct/behavior from time to time with shady tints of its 'Rogue Element'. According to the Unseen Ones themselves, and through Vian Marshall Summers, an individual who on Earth is attributed to the personification of 'Jesus Christ' is among 'the Unseen Ones'--lived and had a 'life mission' consistent with [hidden enterprise of the Unseen Ones](#). ..

Vindicating all intelligible contexts, suggesting and thus supposing, Christianity as part of elaborate religiously control structures triggers new potential orientations in self determination free from the slavish mentality—slavish mentality that exploit humanity's limited sensibilities for moral determination. In this regard, all notions of 'Sin' and/or 'Virtue' can be elaborate theological dogmatic twists that are 'up to no good' really, locking their senses to 'horizontal enterprises' and blinding them away from the true 'Vertical enterprise' of 'True illumination, Enlightenment and Empowerment'. Thus, it is not that notions of 'Sin' and/or 'Virtue' are immaterial/insubstantial, rather they are derived and/or interpreted from false premises-- 'Institutional Premises'--religiously control structures/organized religions. Then again, all constructs for authentic 'Spiritual Redemption' are hijacked for 'diabolical prospects' of selfish institutional material gains.

The Unseen One, through Vian Marshall Summers have an intriguing insightful counsel on Christianity as social phenomena of control structures – as prominent institutions, in these 'End Times':

“Christianity is a religion for humanity with a human god and a human emphasis. It cannot account for life in the Greater Community. In order for this to happen, its theology will have to change and expand. Its idea of the Divine will have to change and

expand. Its notion of God's involvement in the world will have to grow enormously. Its teachings will have to be separated from the folklore of the past. Its theology and application will have to change and to adapt. If it cannot do this, it will die. No matter how virulent its defenders will be and no matter how strong its seeming resurgence, it will be overtaken by the reality of a changing world."

Towards the path leading to the changing world, actionable choice/decision making has to qualify 'integrated senses' of Spiritual, Moral and Ethical integrity. In this regard, the Earthly societies have brace themselves with full scope of true Self-Illumination and Enlightenment: accommodating Education 1.0, Education 2.0 and Education 3.0...

The Galactic Federation of Worlds represent propensities for both orientations, Good and/or Evil even though, as Mari Swaruu and all Swaruu opinate, they—the galactic federation always tend to deny wrong-doing with intelligible contexts of 'lame Excuses' – excuses over mishaps of handling affairs pertinent to Earth and its immediate Space. In this regard, it is inevitable that the Earthly society has to develop its own senses of discernment and stand on its own ground; and choosing favorably contexts of self determination and so forth know better how to pull its own acts in times of great callings/challenges.

Using systems view and thinking, Senses of discernment are possible through 'Christ Consciousness' as transcendental 'sentience, conscience and consciousness' charging Spiritual, Moral and Ethical integrity of individuals constituting the Global Society. In this regard, those who walk the path of 'Individual Christhood' are imbued with both functional capacity to work with the Galactic Federation with all its mixed baggage and simultaneously be under auspicious influences of the Unseen Ones. Thus, Christ Consciousness is extended sensibilities beyond limited self awareness—beyond superficiality of mundane necessities exploitable by rogue elements of the Galactic Federation of Worlds.

Ramifications of the Christ Consciousness in Earthly Global Population is spiritually charging self awareness and determination

for being/becoming clever as Serpents, and gentle as doves. In this regard, society on Earth should fear no Evil, fear no shadow of Darkness; rather conquer the darkness within. Thus, Societies on Earth need no favor for 'Controlled Disclosure of Extraterrestrial Beings' lingering all around the Earth. It is needless either for the Galactic Federation of World to use the prime directive for 'limiting ET contacts' with Earthly population.

Using systems view and thinking, ET contact with Earthly population is no problem at all provided the community preparedness for such contact is well in place. In this regard, community preparedness is effective when there is 'Christ Consciousness' amongst those very individuals who are illegible to 'Early Open Contacts'. Thus, from now—say 2024, individuals/groups/communities/men/women of offices can have open contact with the Extraterrestrial Beings provided they do not seek to exploit and/or be exploitable in any way or shape for 'bread/mortality prospects/popularity'. Then again, three temptations of Christ pertain to (1) 'selfish self preservation'--things like matters pertaining to prospects self-entitlement, (2) Placing one's life, in the senses of safety and care, within the hands of another 'Angel of Service', and (3) Seeking articles of fornication and idolatries—gaining the world at the expense of loosing one's soul.

=====

<https://www.youtube.com/watch?v=coaaEVxILcA>[/url]

=====

Fortune of Misfortune, how to figure it out?

For the Earth population, ET contact can open the door for commencement of new age of abundance and light with human liberty and dignity. In this regard, love and purity possess the key to new age of abundance and light whereby 'lack and want' can be the thing of past. Thus, Mari Swaruu using social media for equitable exchanges of love, understanding and appreciation serve to articulate both intelligible contexts of 'community preparedness' and 'illustrative social experiment' for contact readiness. Then again, it is a strong message to the Earthly controlling structures

and Rogue elements of the Galactic Federation that, either they can emulate the efforts and scale them up; OR, supposing then: any evident lame excuses for not doing the right thing should qualify as intelligible topographical deduction of 'Evil in a Making'. That, for not doing thus they are somehow/somewhat in-complicit to do evil'--Evil by 'hating on Mari Swaruu' and the whole Taygetan/Pleades population who stand with Queen Alenym; furtherer, those who stand with the Urmahs as role models of complete self-independence for thus auspicious self determination and dignity.

Evil can be determined by inauspicious undertaking that take away the chance for 'more to life' self orientations in global human population. In this regard, more to life prospects entail better knowing and better choice making in Christ Consciousness. Thus, Christ Consciousness is earned not given; through love and purity in Oneself. Then again, auspicious ET contact is not about 'self-validation' in vanity affairs rather meetings of Joy, Pleasure and Love. If something is exchanged as the token of love, Pleasure and Joy then purity determines contexts of 'right intentions' transpiring between both sides in contacts. This implies purity is all about thought and feelings as they pertain to pure desires and clear insights/motives.

Good can be determined by auspicious undertaking that fulfills the chance for 'more to life' self orientations in global human population. In this regard, illuminated thoughts which pertain to collective well being and prosperity attribute to healing of the nations and instauration of knowledge. Thus, many nation-states have rudimentary foundations that sought for the great instauration of knowledge as civilization pillars. More so, groping in darkness has been the foundational path to great ascending--towards desired heights of achievements and integral social values.

Towards desired heights of achievements and integral social values, the American society has aspired to reach the Sky and becoming the stars; calling its space/sky/heaven trekking pioneers as 'Astronauts'. In this regard, space trekking enterprise fundamentally drive technical innovations and edifies self-mastery over four primordial elements earth-water-air-fire and thus aiming

at the fifth One—Space-Time. Russia as single society contrast and complement the notions of space trekking enterprise by calling its pioneers ‘Cosmonauts’. Thus, cosmos and stars are prominent articles of heaven that humanity yearns for in long term desires and aspirations.

Towards desired heights of achievements and integral social values, the American society has aspired to reach the Sky and becoming the stars; however going to the Stars while not attending all round terrestrial human need and wants is precisely a vanity affair. In this regard, space trekking enterprise fundamentally drive technical innovations and edifies State Machinery associated with Military Industrial Complex, Controlling Religious Structures and Diabolic Financial Organization. In Russia, [nationalist sentiments have had sensibilities of spiritual, moral and ethical integrity](#). Thus, there are more significant lessons and knowledge for auspicious humanity should the East and West thinking be integrated.

Towards desired heights of achievements and integral social values, the American society has aspired to reach the Sky and becoming the stars while ‘star dreaming’, in actual senses, is ‘a spiritual aspiration’; not all materialistic self determination—as it implicates Earth and Heaven prospects. In this regard star trekking, if well rounded, is going to pave a way for piercing the veils of life and rooting human experience into the depths living mysteries of sentience, conscience and consciousness—consciousness intrigues. Thus, our ET contact has to pave a way for our terrestrial community to comprehend the fact that ‘More to Life’ may entail the ‘Supernatural’; the supernatural is natural not yet understood. Then again, there is more to Spiritual, Moral and Ethical integrity for us – we as emerging culture appropriating our horizontal and vertical self determination.

Earthly societies do not account well in Spiritual, Moral and Ethical integrity if they still lingers on the prospects of ‘Controlling structures’ and ‘Status quo’. In this regard, Military Industrial Complex, Controlling Religious Structures and Diabolic Financial Organization have to go away and/or transform into (w)holistic enterprises--wholistic for the social prospects that pertain to collective well being and prospering; not abracadabra of vanity

affairs ascribing to empty national prides. Thus, Military industrial complex can transform into Space Defense and Diplomacy; Controlling Religious structures can transform into Culture Centers for the exploration of ‘Conscious Intrigues’; and diabolic financial organization can transform into living network nodes for thriving ‘Mother Economy’.

Space Defense and Diplomacy, using systems view and thinking pertain to all intelligible contexts of ‘Sovereignty and Self Determination’. In this regard, any form of 'entity thriving' and 'self determination' is incomplete without capacity to defend itself against hostile forces that may challenge its integrity from time to time. Thus, space defense and diplomacy is an art and skill that goes beyond physical repertoires—it is an integrated ability to directly use mind powers through consciousness intrigues while matching it with manual dexterity as appropriate. Then again, ET contact has to facilitate ‘capacity building’ in Earthly community to defend itself and develop its own unique enterprise of ‘Liberty and Oneness’ beyond terrestrial domains.

Withstanding challenges social and cultural integrity from time to time, using systems view and thinking, it the intelligible context of Spiritual, Moral and Ethical self determination. In this regard, Christ Consciousness is the integrated sensibilities of ‘Sword’ and ‘Strength’ for the sake self protection and social thriving--just like it is portrayed by the Motherland Calls Monument in Russia. Thus, sword is legendary metaphor for ‘discernment’ and non hesitation to pierce the veils of real from unreal. Then again, Mari Swaruu introducing the Urmah Feline Star Race and potential Allies for humanity is based in intelligible contexts of merit—merit pertaining to the ‘right intention’ to qualify within the spirit of self determination which are auspicious for ‘Self Expression’ and ‘Liberty’...

=====

What constitutes allies for humanity

Choosing potential allies for humanity, using systems view and thinking, is a very meritocratic enterprise which entail 'marching frequency'; colloquially portrayed with an adage: [Birds of the same feather flock together](#)... in this regard, within the potentially hostile event, it is wise to keep your friends close and your enemies even closer. Thus, [being clever as serpents and gentle as doves](#) qualify 'right intention' that serve 'Diplomatic' engagement and so forth strategic move of perpetual vigilance. Then again, a dove snapping away snake is symbolism of 'Christ's Ambassador'--actionable intelligence to secure 'harmonization' of potential good or evil in terms of fair assessments. Military Intelligence reign supreme in all acts of ultimate vigilance...

Swaruu Sisters are remarkable examples of 'Christ Ambassadors'; using systems view and thinking their 'contact enterprise' do qualify the intelligible contexts of 'Angelic Function'. In this regard, the metaphysical extension of a soldier/freedom fighter/defender of faith is an 'Angelic Function'. Thus, an angel is usual symbolism for 'messengers/messages', agents of meaningful coincidences/synchronicities, to shift the SQUARE of human experience-- 'Time-Society-Institutional Choices-Events'. Then again, [it is not strange that they they belong to an Elite squad, elite in terms of Spiritual, Moral and Ethical integrity, of 'Time Travelers'](#) --Sand Clock.

Angelic Function, using systems view and thinking, is the intelligible context of 'expanded spatio-temporal awareness' that serve auspicious contexts of 'right intentions' so as to facilitate 'Free will'; doing thus while keeping in mind the 'will' of expanded consciousness of intricate webs of sentience and 'consciousness intrigues'. In this regard, intelligence gathering and service in terrestrial/horizontal enterprise is ['inadequate/known things in parts'](#) since it does not extend towards 'the Source/God'. Thus, ET contact has to enterprise for extended light for the sake of illuminated self awareness -- in order to serve well the auspicious goodwill of the collective human society. Technically, Swaruu Sisters operate as 'Contact Specialists', their diplomatic mission

entail certain and uncertain parameters; and they too are guided by the seen and Unseen Ones...

Horizontal enterprise is self determination with 'inadequate/knowing things in parts' since it does not extend towards 'the Source/God' -- the saga of 'Fear of Death'; not knowing what lies ahead of life and/or death situations. In this regard, most of the human population will buy into the idea of 'God' and/or 'Angel' for the sake of 'Self Preservation' and 'Good Fortune'. Thus, control religious structure have great leverage in the notions of God just to exploit the fear of Death. Social prospects of 'War and Peace' are all about fear of Death and Self Preservations; Monetary Servitude is all about Self Preservation and Indulgence while thus 'running against time'. In these prevailing states of sentience, conscience and consciousness—it is said '[Angels must be Confused by Wars...](#)' Well, in metaphoric senses; attachments to mortal life and its possessions trigger war and peace prospects unto un-illuminated human mind...

Controlling Religious structures transforming into Culture Centers for the exploration of 'Conscious Intrigues' is simply renewed and integrated enterprise of spiritual, moral and ethical matters to imbue humanity with expanded self awareness—in human bodies. In this regard, human sensibilities will 'upgrade' from genetic carnal based neurotic heuristics of fear/flight responses to higher 'light mind' based-- quantum based intricate webs of sentience and direct intuition for love and higher sensibilities. Thus, culture centers are going to be community centers for recreation, rejuvenation and programming/deprogramming/reprogramming oneself systematically.

Community centers for recreation, rejuvenation and programming/deprogramming oneself systematically, using systems view and thinking, implies intelligible contexts pertaining to functional replacement of ill setup for culture integration – ill setup exploiting 'bread and circus' social functionalities of present, 2024, 'Babylon System'. In this regard, culture centers are going to replace 'Elite's sports', 'Alcohol/Intoxications Bars', 'Brothels and Adult Industries', and thus 'Various Entertainments Industries'. Thus, as strange as this may sound—main focus of 'Culture Centers'

is going to be 'the Human Waist' and 'Eyes'--pertinent psycho-spiritual work out of human waist and eyes... Then again all other senses such as 'Hearing', 'Smelling' and 'Touch/Tasting' are subservient to 'higher expressions' only if a human being consciously choose to upgrade from Human 1.0 to human 2.0 and ultimately Human 3.0.

Using systems view and thinking a Human 1.0 is carnal-senses-based individual; a Human 2.0 is the proficient one who is 'able to make two to become one'—ability to synthesize 'right and left' brain thinking and perceptual functions; a human 3.0 is the fully integrated individual who can perceive, manipulate and manifest realities through consciousness intrigues. In this regard culture centers are, technically, public 'mystery school' to all who may participate in its enterprise. Thus, Yoga and Tantra are the basis of its core function-abilities, while 'new/modern/contemporary practical sensibilities' may entail in its enterprise – sensibilities that march with modern human development and environment.

Becoming Human 3.0 is the 'Harvest of the World'; the very basis of 'Salt and Light of the World'. In this regard, auspicious human culture 3.0, Sovereign Integral, is possible through some remarkable women and men becoming the very Salt of the Earth and Light of the World'. Thus, there is indeed 'diffusion of Innovation' even in popular 'Spiritual, Moral and Ethical' integrity—self determination. Swaruu Sisters are the typical example of Human 3.0... Then again, the bird that descend and snatches away the lying coiled snake is 'the inner drama' and 'subconscious metaphor' for 'spiritual awakening'-- the 'Higher Ego' charter for 'taking charge' in domains of 'Consciousness intrigues'.

Main focus of 'Culture Centers' to be 'the Human Waist' and 'Eyes' – pertinent psycho-spiritual work outs attributing to the two, through systems view and thinking, is an inference out of (w)holistic considerations – considerations as they pertain to the significance of 'Sexuality' and 'Thoughts/Sensibilities'. In this regard, culture centers are going to be modern days enterprise of similar prospects and propensities for shaping 'morals and values'. In social and traditional senses, they are synonymous to community's functional/organizational structures-- institutions for effecting the

‘rites of passage’ unto societies. Thus, as strange as this may sound, in human waist there lies in secrets of ‘cultural prospects and propensities’ that determine ‘Self Expression’--Being and/or Becoming. Then again, ‘peeping through’ a waist of any human being can bestow ‘innate knowing’ of his/her ‘social capacity’ to function auspiciously and/or inauspiciously to the joy/sorrow/anguish/pain/pleasure/positivity/negativity of the collective community/society of people. This implies, sexuality hold keys to ‘Consciousness intrigues’ that yield to sensibilities of Joy, Elation and Ecstasy—Ecstasy is the language of Existence; joy and elation/excitement are composite parts of ‘the Taste of Divine’.

Intelligible contexts of ‘chaos and order’, qualified in a willful intention and attention that accord sentient, conscience and consciousness in oneself, tends to relax ‘depth of rational interpretations’ in ‘Laughter and Delight/Joy – tears of Joy’ or provoke deep ‘Sorrow and Soulful Lamentations—tears of Crying’.

Sexuality holding keys to ‘Consciousness intrigues’ that yield to sensibilities of Joy, Elation and Ecstasy, using systems views and thinking, is the basis of an intelligent deduction that ‘alert and warn’ humanity to be wary of ‘Star races’ that are asexual when it comes to ‘reproduction/regeneration’ and/or not having compatible ‘emotional bandwidth’ to humanity itself. In this regard, culture centers are going to reveal to humanity the secrets of ‘snake biting the heel, human knocking down the head of snake’. Thus, through sexuality, there are keys to revelations--revelations to thus enable one to discern the ‘knowledge of gods’ – their passion, lust, wickedness or the reverse of all that to entail ‘immortality’ and ‘Posterity’ within the compatibilities and technicalities of ‘Consciousness intrigues’.

Within the ‘cosmic culture’; it shouldn’t surprise humanity to arrive at certain point of observation and find out that there are myriad of sexual/reproductive modes/orientations in cosmic cultures—some may be completely strange to ordinary/normal ‘intelligible contexts’; especially as they can be paralleled with ‘known human function’ of similar prospects; yet it serves no purpose ‘to judge’ rather ‘observe and learn’ – enlighten oneself and so forth appreciating the gifts of ‘Consciousness Intrigues’; we, the

humanity, are gods too... Others wonder and are fascinated too by our sexuality and their associated 'consciousness intrigues' the same... Thus again, it is true that there are more 'humans' out there, some Extraterrestrial Humanoid/Humans Beings can have coitus interaction and thus interbreed with humanity and do it as it 'fits them'; we too one day in the future may choose that path of interbreeding with other star races' -- Culture centers are going to provide a conscious orientation/path(s) and willful self determination for such possibilities and more.

Midas Touch: Is it possible?

Diabolical financial organization transforming into living network nodes for thriving 'Mother Economy', using systems view and thinking, entails re-institution of monetary dynamics to serve core purpose of human development, not blind material aspirations. In this regard, paradigms shift is inevitable in the quest for healing the ill contexts of social thriving. Thus, diabolical financial organization are the result of 'controlled states of mass beliefs and shrewdness'. Then again, Extraterrestrial Contact not only can be the basis of 'revelation' on how humanity is locked down for embarrassing situations of prevalent malicious intents of monetary servitude—monetary servitude that govern all aspects of 'ILL CIVILIZATION'; in terms of industrial and social self-determination--self inflicting mediocrity.

Self inflicting mediocrity of ill Earthly civilization at present, 2024, using systems view and thinking, is the result of controlled thinking process, values and social arrangements that exploit limited senses of self-identities. In this regard, basal feelings of animosities, fear/self-preservation, and manipulated social biases prevail on actionable choice/decision making process—all direct and indirect processes that pertain to their mundane lives. Thus, prospects of ET contacts poses systematic threats to the establishment—a situation that demand Earthly society to develop systems view and thinking in order to 'out-date' vested interested in 'ill advised/misguided

thinkings/diabolic set-ups' that influence/channel/exploits/contravene their direct and indirect processes in lives.

Using systems view and thinking, intelligible contexts of the 'ill advised/misguided thinkings/diabolic set-ups' are topographically deductible pertinent to the whole 'free enterprise'-- free enterprise running its operations as powered by the monetary lending mechanisms. In this regard, business self organization that follows internalization of 'Profit/Gains' maximization while leveraged by the monetary institution of 'capital lending for interest motives' is systematically marked by potential inherent shrewdness—as polarization exploit 'chaos' for entailing 'order' as functional tapestry of 'informational flow/control'.

Thus, it should not surprise humanity who are awakening into using systems view and thinking to precisely observe and find out, control and manipulation are part of any operating system constituting a functional entity. Technically, as it pertains to the Whole Global Society on Earth, Power That Be (PTB) is moniker for 'hidden institutions' which function as 'Maxwell Daemon'--functional agencies for effecting 'Order and/or Chaos' in societies with clever disguises of 'Exchange of Informational patterns' that buy into mass minds—mass minds as members of societies who have to be kept to specific level/or contexts of intelligence auspicious to 'name of the game'.

Using systems view and thinking, Money is a 'unit charge' that parallels 'Exchange of Informational patterns'--'monetary form and energetic charges' that ought to 'equalize' the Potential Differences of 'Entity's Integrity' for the sake of desired intelligible contexts of 'name of the game'. In this regard, 'name of the game' can have this or that name, but it empirically triangulates to 'Force', 'Power' and 'Glory' of being and becoming. Thus, 'force' is the result of vectored intention for self determination; 'Power' is an 'institution Breath' that influence the 'essence of the Game'; 'Glory' is 'heat versus cold'/'light versus darkness' that charge the overall 'space and time' of the society's actual dynamism. Thus, influences can be 'positive and/or negative' in order to determine any fully intelligible context of functional matrix; while its the people within its sphere of

influence who ‘qualify the charge’ for affirming the integrity of that very Matrix.

Using systems view and thinking, Money is a ‘unit charge’ that parallels ‘Exchange of Informational patterns’--‘monetary form and energetic charges’ that ought to ‘equalize’ the Potential Differences of ‘Entity’s Integrity’ for the sake of desired intelligible contexts of ‘name of the game’. In this regard, Capitalism is monetary based exchange of informational patterns that imbue a specific intelligible context of sphere of influence for ‘individual’ to qualify their states of being and becoming. Thus, all notions of ‘free enterprise’ are inherently charged with ‘positive and/or negative’ connotations of social constructs for ‘black cube of Mind Control’. Then again, ‘Liberty’ may be used to sell the idea of personal freedom and ‘socio economic triumph’ while in actual case any intelligible contexts of such ‘triumph’ comes at the expenses of winning and/or loosing of another—internal antagonism pertinent to ‘struggles’ and ‘making it’ in terms of collective welfare. Then again, coherent integral of winners may reinforce their ‘game plan’ by ‘defining their territory’ and seek expansion—ontology of Corporatocracy.

Using systems view and thinking, Money is a ‘unit charge’ that parallels ‘Exchange of Informational patterns’--‘monetary form and energetic charges’ that ought to ‘equalize’ the Potential Differences of ‘Entity’s Integrity’ for the sake of desired intelligible contexts of ‘name of the game’. In this regard, Communism is monetary based exchange of informational patterns that imbue intelligible contexts of sphere of influence for ‘Community’ to qualify their state of being and becoming. Thus, all notions of ‘Communism’ are inherently charged with ‘collective conscientious and Defensive social expanses’ -- conscientious that outlines typical social constructs for ‘black cube of Mind Control’. Then again, ‘Communist’s Manifesto’ may be used to sell the idea of ‘together we stand for our sweet and sweat’ while in actual case any intelligible context of ‘standing together’ comes the expense of ‘coercion’ and/or ‘radical imposition’ for ‘Struggling Nationalism’. Ultimately, coherent integral of ‘nationalists’ could be nothing but necessity seed of ‘state capitalism’--‘game plan’ that complements the antics of ‘Capitalism’ yet systematically; it is the ontology of Soviet Unions.

Corporatocracy and Soviet Movement/Union has on thing in common—black cube of Mind Control. Using systems view and thinking, it is possible to ascertain intelligible contexts of ‘Monetary Integrity’ and ‘Processes that actuate Power’ in socio-economic domains of human prosperity. In this regard, all prospects of War and/or Peace originate with ‘Will to Power’ – masculine propensities for domination and aggression. Thus, ‘Will to Power’ require qualified activities for ‘shifting elements’ of social composure and glory. Then again, ‘Time’ is the rate of qualified activities for accelerated/decelerated manifestations out of mundane self determination and presenting opportunities. Ultimately, all self determination seek fortitude for ‘Treasures’ and ‘Leisures’ in life.

‘Treasures’ and ‘Leisures’ in life necessitate propensities for ‘community construction work/peace/prosperity’ and/or ‘community destruction work/war/plunder/’; using systems view and thinking, work and/or war are functional tendencies that result from self determination under fully ‘sphere of influence’ ascribing to the spiritual, moral and ethical integrity of individuals/group of individuals/society. In this regard, both treasures and leisure are possible through applicability of ‘Time’ in the sense that ‘actionable choice/decision making’ follow consciousness intrigues, ‘common sense’ and/or ‘outrageous senses’. Thus limited state of consciousness, is a huge core determinant of the black cube of Mind Control. Then again, the monetary game is made out of fragile constructs of ‘collective social agreements’.

Using systems view and thinking, there is an intelligible topographical and deductible context that supposes money is the root all evil. In this regard, the evil nature of money is the reflection of all possible selfish tendencies of humanity. Occasional good of money, may be in that very delight in fornication with the Whore of Intoxications/Indulgence/abominations – matters that comes with ‘will to power’--will to power in limited perceptual agreements and distorted senses of self identity. Thus, it should not surprise humanity that Extraterrestrial Contacts are ‘bad news’ to Power That Be, as monetary worth are all founded upon skillful manipulation of ideas and tendencies through ill/immature/dwarfed sociological imaginations.

Money as a piece of paper or ‘coin/digits in computer networks’ to be the basis of exchange, using systems view and thinking, is a very volatile enterprise. In this regard, all exchanges that are not backed with ‘real treasures’ rather than imaginary ‘tender legality’, are skillful deceptions and marked shrewdness. Thus, all ‘leisures’ that follow the suite of legalized –so ‘legalized’ to thus evade implied notions of its fake treasury worthiness – worthiness backed through ‘central banking’ as consensus functional agreement between societies and thus fictitious ‘nation-state entity’ or private ‘Federal Banking’ – Usually names that reflect ‘People/Nation-State Institutions’ and so, supposing to represent the ‘collective goodwill’. Then again, Extraterrestrial Contact is ‘bad news’ to Power That Be’ as all Central Banks are tactical governing centers for fragile socio-economic systems requiring tacit, diplomatic repertoires and authority to mask the awkward truths pertinent to ‘name of the game’.

Money as a piece of paper or ‘coin/digits in computer networks’ to be the basis of exchange, using systems view and thinking, is a very volatile enterprise. In this regard, the very thing/situation which deems central banking minting and issuing currency to be authoritative – other private citizens, community members minting ‘money’ being piracy and illegal activity is a permission slip for ‘the good and the bad’ of monetary policies and their implied government activities. All money-power-respect prospects are consensus agreement in societies to degree that foster ‘name of the game’ and so forth ‘status quo’. Thus, Extraterrestrial Contact is ‘bad news’ is Power That Be as it poses threat to exposing lies of monetary servitude.

Then again, it should not surprise humanity to find out ‘there are arrangement from above’, pertinent to say the Galactic Federation of Worlds, that restrict acquisition of products/produces/commodities of Earthly commerce – paper bills can be ‘duplicated’ by means of replicating machines and/or consciousness intrigues alone—yet it is not ‘morally sound’ to take advantage of inferior set ups of human economies. Extraterrestrial individuals, though from time to time trade for foodstuffs—honey, fruits, ‘wines’ etc; there are ‘elaborate schemes’ of both direct and

indirect contact in terms of supply chains... This is to denote, the Earth is potential trade partner to various extraterrestrial races for mostly food stuffs, and it is a known fact to some governments and private citizens—Fact that had made Mari Swaruu ‘not to worry much’ pertinent to sharing openly the Taygetans’ story – stories related ground mission for Earthly food stockings and other items for space crews residing in the immediate space—within the Toleka Mother Space Ship.

Money as a piece of paper or ‘coin/digits in computer networks’ to be the basis of exchange, using systems view and thinking, is a very volatile enterprise. In this regard, these typical exchange utilities can be used to reinforce the black cube of mind control due to their limited context of usage; typical usage that do not account well for ‘temporal and spatial’ equivalences to dimensions of life.

Thus, any form of accounting which is limited to ‘plus’ and/or ‘minus’ arithmetic operations, evident in typical ‘balanced sheets’, leaves room for disorderly expansion and/or contraction of economic dynamism. In this regard ‘book keeping’ prospects can have duo ramifications—honesty record keeping for accountability, transparency and moral and ethical consistence in cycles of financial planning and enterprise management; OR, gimmicks in records keeping and so forth partial accountability, translucent organizational purposes and amoral institutional arrangements—viability of corrupt objectives of entity’s self determination—often refereed colloquially as ‘getting smart with Cost of Doing Business’

...

<https://www.youtube.com/watch?v=-0kcet4aPpQ>

=====

Cash and Cashless societies, what determines both?

Emergence/Planning of Cities and towns, hierarchies of transportation, horizontal and vertical development of settlements are all institutional phenomena/essence of monetary plans, policies and laws/regulations to optimize ‘free trade’ while facilitating financial austerities for capital generation/regeneration; cash is a

king of material acquisitions and self-determination. For cash prospects, business institutions may indulge in overt and covert economic operations to maximize their gains disregarding socio-economic consequences of their shrewd acts.

Then again, aggregate economies pave a way for market instabilities that warrant gimmicks in order to polarize gains and minimize losses in the so known 'Monopoly' tendencies. Monopoly is a tactical move within 'free enterprise' paradigm which prompt the need to secure/seek expansion/growth while exploiting any loophole in 'unregulated/under-regulated' free trade domain. Every move that tends to actuate some kind of [Monopoly for the sake of 'name-of-the-game'](#), do actuate Market failures and/or Economic crisis inherently. In this regard, using systems view and thinking, market is an extensive socio-economic fabric that interface sellers and buyers – necessitating 'monetary exchanges as per their supposedly unit charges' to thus substantiate intelligible contexts of supply and demand of commodities/goods and services.

Tyeing up social thriving with money as 'unit charge' of exchange and worthiness, using systems view and thinking, call us to reconsider the significance of 'functional boundaries', 'needs and wants' and 'auspicious self determination' that marches 'time' and 'seasons'. In this regard, SELF-DETERMINATION IS WORK; time prescribe the essence of 'moment', and 'Seasons' are set of 'outer events/manifestations' that require 'interactive cognitive process' to make our lives comfortable, convenient and enlightening. Thus, [in work there can be resonance or dissonance to the auspicious senses of Oneself](#) – auspicious senses qualifying certain interactive cognitive process, imbuing 'true Knowledge/False Knowledge' manifesting 'Love/No love' in our creations.

Monopoly, Market failures and Economic crisis, using systems view and thinking, are intelligible contexts of 'Love/No Love' in our mundane undertakings. In this regard, people of physical Earth life work in order to march with 'Times' and 'Seasons' -- Seasons and time come with 'Geography' and 'Location' in 'Space and time'. Thus, [\[url=https://www.youtube.com/watch?v=BQFh85fohQg\]](https://www.youtube.com/watch?v=BQFh85fohQg) ['Work', as Kahlil Gibran once wrote, is the essence of humanity to enterprise so that they should be no 'Strangers' to Time and Places--](#)

in order for work to be a blessing and not a curse, our self determination ought to qualify LOVE and Comprehend LOVE ...

These counsels enlighten us on the intelligible contexts of ‘African Renaissance’...

=====

<https://www.youtube.com/watch?v=IQUd8Kpyvto>

=====

From America to Africa--Dreams can come True

The World Economic Saga following the political hegemonies pertaining to the United States of America and the Great Mother Russia have served as rudimentary necessities for auspicious self awareness and progress towards ‘Graduation’--Harvest for the World. In this regard, we can undergo self-reflection in order to determine, have we been working with auspicious true knowledge of love and for Love, or else?

Using systems view thinking, the answer to that question is simply NO—we have not been working with auspicious true knowledge of love and for love. In this regard, monopolies-market failures-economic crisis are the result of ‘dissonances’ in self articulation for ‘the chance to dance our way out to the stars’...

Using systems view thinking, the answer to that question is simply NO—we have not been working with auspicious true knowledge of love and for love. In this regard, will to power is a false premise of self determination—typical self determination without inherent balance pertinent to the ‘Good’ and ‘Evil’ transpiring in our socio economic undertakings—with strong tendencies to escape true transparency and accountability...

Using systems view thinking, the answer to that question is simply NO—we have not been working with auspicious true knowledge of love and for love. In this regard, lower states of self awareness cloud or sensibilities and tie us down to mundane needs and wants ascribing to our bodies—discarding/undermining soul yearning for

true love in 'being and becoming'; LOVE which is 'food/need/desire' to a Soul...

African Renaissance is all about Soul Quickening/Awakening for true love in 'Being and Becoming'.

Using systems views and thinking, the Trizanium provides the basis of auspicious self articulation and determination to integrate basal feeling/senses and higher feeling/senses through Consciousness Intrigues—The Observer is the Observed. In this regard, auspicious Self Determination ought to imbue the Needs and Want of body, mind and Soul. Thus, soul realities affirm 'human spirit' in integral senses not 'bodily qualities' such as skin color, nativity and/or terrestrial nobility. Then again, African Renaissance is all about people from all corners of the world to come together, work together in 'One Love' and harmonious 'Overstanding'.

=

<https://www.youtube.com/watch?v=IVkoqgA1u-s>

=

People for Making I-Stories and not His-Story

Coming together, working together in One Love, Peace and Harmony NOW 2024 and then, is going to be refereed as HARAMBEE; Using systems view and thinking, Harambee is socio economic enterprising for greater harmony--harmony that self-contain the contradictory elements of 'space and time'--contradictory in such ways which reorient socio economic structures for transcendental stability. In this regard, 'Overstanding' is an extended state of inherently self awareness beyond ordinary 'understanding' bestowing the capacity to comprehend the 'UNCONDITIONAL LOVE' that serve 'the Good and 'Evil'. Thus, unconditional love is the beginning of 'mastery' of 'space-time'--'circle' prescribing 'the central dot' of Ontology of Institution.

African Renaissance is all about Soul Quickening/Awakening for true love in 'Being and Becoming'; graduating from 'Soul Captivity' into 'Liberty and Oneness'. In this regard, using systems view and thinking, renaissance pertain to intelligible contexts of self

determination with 'Africa' as 'a permission slip' to effect the course of activities which illustrate transformation from 'Darkness' to 'Light'. Thus, in the world of Space-Time, polarization is the order of ascertainable Matrices of Being and Becoming. Then again, African Renaissance is all about an Individual to qualify extended Self-awareness and abilities to use the 'African Notion' as context of 'Transcendental Operation' for 'African Liberty'.

Using systems view and thinking, intelligible context of 'Transcendental Operation' for 'African Liberty' infers elaborate Spirit-Mind-Body connections that 'move' manifestations—manifestations pertinent to 'Time-Society-Institutional Choices-Events'. In this regard, 'Self Identity' may be distinct or integral with 'African Liberty' being contextual root of 'Sovereign Integral'. Thus, There could be African 1.0—the One who identifies extensively with physical attributions like ethnicity, color of the skin and 'black based nationalities'; African 2.0—the One who possess extended faculties to see beyond the facades of ethnicities, color of the skin and 'black/white/yellow etc nationalities'; African 3.0—the One who live in 'I-ducation' and thus identifies with all terrestrial ethnicities, nationalities, empires and clans through the 'Consciousness Intrigues'.

African Renaissance is all about Soul Quickening/Awakening for the Transcendental Identity and En-souling of human culture through the 'metaphoric Torch of Enlightenment'...

Using systems views and thinking, the Trizanium provides the basis of auspicious self articulation and determination to integrate basal feeling/senses and higher feeling/senses through Consciousness Intrigues—The Observer is the Observed. In this regard, 'I-ducation' is the intelligible context of 'individual enlightenment' which empowers one for auspicious actionable choice making in 'all dimensions/densities of life' where 'Being and Becoming' is order of its 'day and night'. Thus, I-ducation invigorates cultures in 'all domains of space and time'. Then again, metaphors of 'Salt and Light of the World' are intelligible parallel context of 'Roots and Shoots' of any cognizable civilization which determine functional and optimal sensibilities/feelings to the composite integrity of

spiritual, moral and ethical considerations—contextual ‘community expands considerations’ of society in observation.

Empowerment of One for auspicious actionable choice making in ‘all dimensions/densities of life’ where ‘Being and Becoming’ is order of its ‘day and night’, using systems views and thinking, is the basis of intelligible context of metaphysics of life in which mundane existence is living extension of Heaven’s glory. In this regard, mundane existence within the topographical contexts of overall culture pertinent to certain society, is the reflection of ‘Higher Truth’--higher truth hidden in Stars and Cosmos. Thus, roots and shoots is the articulation of the ‘Tree of Life’; then again ‘making Africa the Tree of Life’ is the clue for Effectiveness of Education 3.0: I-ducation which is the metaphysics of Education.

Using systems view and thinking, intelligible context of Africa 2.0 is extended socio economic enterprise which constitute a unique cultural glory featuring emancipation from ‘mental slavery’; as mental slavery is the result of Africa 1.0 blinded by the Black cube of Mind control. In this regard, revolutions may not imply complete overthrow of basal existing systems—without ‘I-ducation’, revolutions are ‘illusive refreshment’ within the same principality of ill incited cultures. Thus, ‘I-ducation’ imply continual ‘revolutions’ that bear corresponding rational interpretative depths inferrably as ‘Evolution’-- revelations that reveal truths makes ‘time and times’ to be nexus points of probable shifting realities. Then through the mystics of creativity, each and every moment of sensual awareness/self awareness write and/or rewrites ‘History’-- Within the intelligible contexts of ‘I-ducation’ every Human 3.0 individual posses extended abilities to shift realities through Consciousness Intrigues—composing, recomposing and decomposing ‘I-Story’.

Using systems view and thinking, intelligible context of Africa 2.0 is extended socio economic enterprise which constitute a unique cultural glory featuring emancipation from ‘mental slavery’; as mental slavery is the result of Africa 1.0 blinded by the Black cube of Mind control. In this regard, ‘History’ is a tool for manipulation of sensibilities of integral societies in ‘Darkness’ of the cube of Mind control—it is ‘His-Story’ belonging to ‘shadow enterprises’ of False Authorities within cultures for the sake of influencing ‘vanities’.

Thus, dropping ‘vanities’ of false premises of damn wishful thinking is the ‘Soul Triumphant’ towards the auspicious ‘Tree of Life’. Then again, Africa 3.0 is the manifestation out of ‘One and One’ graduation into the ‘Enlightenment’ of Being and Becoming.

Using systems view and thinking, intelligible context of Africa 3.0 is extended socio economic enterprise which constitute a unique cultural glory featuring emancipation from ‘mental slavery’; as mental slavery is the result of Africa 1.0 blinded by the Black cube of Mind control. In this regard, roots and shoots are scattered through ‘Space-Time’--Africa 3.0 being ‘Square Circle’ with prominence of ‘focal point’ of ‘Time-Society-Institutional Choices-Events’ exemplify power of ‘Soul’ over ‘Matter’. Thus, using geographical land mass of the Continent of Africa is just a ‘Permission Slip’ to enterprise ‘Cultural Manifestations’ that yield their full expressions through ‘Extended days and Nights’ of ‘Being and Becoming’--Incarnations, Reincarnations and Ascensions.

Thus again, ‘African Glory’ is ‘I in I’ Story—the Eye in I-Story and Not ‘His-Story’. In this regard, using systems view and thinking, ‘Black I-Story’ is the Story of Human 3.0—African 3.0 Story; African 3.0 are human individuals who are conscious of their ‘parallel lives’ on Earth and even the Stars above the same—as ‘time’ is simultaneous through ‘Eternal Nowness’. Thus, African Glory is I-story of ‘Soul Triumph’ to tell and retell the story of Eternal drama of Good versus Evil—Knowing the Joy and Sorrow of descending and ascending from ‘Darkness’. Then again, African 3.0 story is I in I story of playing both sides of victim-hood and aggression to certain extended contexts of self determination so as demonstrate ‘Breath and Strength’ of actionable choice/decision making.

Then again, Africans 3.0 are typical Human 3.0 who across space-time, have lived/are living/are going to live, in order to demonstrate ‘Breath and Strength’ of actionable choice/decision making against/along the Black cube of Mind control. In this regard, at any given moment there are humans 3.0 who are ‘temporary’ playing the game of ‘aggressors’ and/or ‘victims’ of oppressive/malignant cultures—this applies in both sides, On Earth and in Heavens worlds. Thus, it should not surprise humanity of Earth that the whole tapestry of colonialism and neocolonialism is

laden by individuals who have played 'both sides'--a cruel 'white' colonialist some yesterday in Africa maybe today a great 'black' freedom fighter/nationalist and vice versa is also true in similar contexts of 'time-society-institutional choices-events'. It then implies, I-ducation is going to lift the veils from off our eyes and bestow systems view and thinking behind 'changes of mind and heart' inspired by the great remembrance from the Spirit of all life.

====

https://www.youtube.com/watch?v=LcNwob_njTY

====

Touched by Angel, Kissed by Lord (!)

Great remembrance from the Spirit of all life, using systems and view an thinking, is the intelligible context of 'being touched by an Angel Mother kissed by Lord Father of the Universe'. In this regard, soulful quicken/awakening come through 'being touched' and 'kissed' by Love Supreme—Consciousness Intrigues. Thus 'messianic functions' are light/Christ order of Love Supreme while 'Devilish functions' are Dark/Devil order of Love Supreme. Then again, Christ Consciousness is the state of supreme awareness to comprehend the 'Unconditional Love' and 'inherent sensibilities' to know and function in harmonizing the eternal dance of 'forms and energetics'--forms and energetics that in 'time-space' manifest as intelligible 'Good' and/or 'Evil'.

Christ Consciousness, in Human 2.0 and Human 3.0 can bestow extended capacities in ascertaining the square of human experience —SQUARE of 'TIME-SOCIETY-INSTITUTIONAL CHOICES-EVENTS'. In this regard, there are set of events that having been taking, are taking place and are going to take place to exemplify 'New Humanity'. Thus on Earth, it can be ascertained that AFRICAN 3.0 STORY is has been effect, is being effect and is going to be effected more so by Africans 3.0. Then again, forms and energetic expressions pertinent to Africa 3.0 may come to out-picture terrestrial and extraterrestrial 'flavors'--salt and light of the Universe...

Christ Consciousness is an everlasting quest towards the very centre of Being and Becoming; Using systems view and thinking, Christ Consciousness comprise the overall scope infinity expanses of sentience, conscience and consciousness involving the Seen and Unseen. In this regard, Spirituality is possible through Christ Consciousness as knowledge and Knowing that encompass all and everything entail eternity, endless mysteries and conscious intrigues. Through Christ Consciousness, Enlightenment and intelligible contexts of Being and Becoming can be ascertained. Thus, African 3.0 pertains to individuals who are mystics—they are here today, they have walked in the past and they are stepping back and forth into the future—with intelligible context of the Quest for African Liberty.

Quest for African Liberty, using systems view and thinking, En-souling of certain intelligible purpose/intention in Being and Becoming with cultural prominence. In this regard, the African Continent and Indigenous Population, through certain temporal expanses, are vehicles of Expression for something which could beyond Earth itself. Thus, Africa as a geographical land bordered by Sea/Ocean almost completely has interesting prospects for cultural integrity that meet mundane want and needs while at the same time serve soulful expressions that are transcendental to physical and mortal Beingness. Then again, many Africans 1.0, within certain temporal expanses, serve as core humanity for ‘Soul Triumph’. There are Africans 3.0 who are ‘guardians of human soul’; Africans 2.0 who are ‘harmonizers’ of ‘Events’ and ‘institutional choices’ and Africans 1.0 who ‘root the experience’ of Cosmic Saga...

Cosmic Saga, using systems view and thinking, is the intelligible context of ‘Horizontal’ and ‘Vertical’ enterprises qualifying Spiritual, Moral and Ethical integrity. In this regard, it should not surprise people when it becomes ‘intelligible’ to find out the Great Lakes region of African continent has been a ‘Seeding’ ground for transcendental culture—New Earth, New Humanity. Thus, East Africa has been ‘cooking pot’ for new humanity that embraces and imbues the Best from the East in terms of Religions, Languages and ways of Life—to fuse all that into indigenous Bantu, Nilotic and other Minority cultures. Then again, colonialism brought West to Africa leveraging an interesting soup of ‘Time-Society-Institutional

choices-Events'. Out of Colonial prospects, Slavery was a nasty issue that served a certain specific purpose...

Slavery and Exploitations are prevalent in the 'doggy doggy world' of Cosmic Community Expanses; warranting interventions and long lasting 'institutional memory' to keep consequent 'Good and Evil' in check pertinent to 'institutional choices'. In this regard, On Earth the old wise ones who are human 3.0 or alike, Seen and Unseen Ones, from the 'Stars Above' have a call to serve—to anchor the 'Tree of Life' on Earth. Thus, Africans 1.0 have provided useful malleable cultural fabric to harmonize incarnation, reincarnation and ascension prospects—all seeming different races of people are 'outer facades' of incarnation and vehicles/containers of being and willingness to transcend limited views and/or perceptions pertinent to Oneself. On Earth, [there is only one race—the human race](#); and this is one of the lessons that have to be learnt and realized through 'Christ Consciousness'. Then again, African Liberty is 'been/being here/there-done that' but [NEVER EVER AGAIN GLORIFY PAIN AND SUFFERING AND SLAVERY](#) in humanity on Earth or any Stellar/Interstellar cultures subjected to black cubes of Mind Control.

In East Africa, orientations for African Liberty and Cultural defense have been instituted through known Africans 2.0 and Unknown/Unseen Africans 3.0—Notable state-men, tactical incarnations and 'culture builders'. In this regard, using systems view and thinking, comrade [Julius K Nyerere](#), His Imperial Majesty [Haile Selassie I](#) and [Kwame Nkrumah](#) have been under strong influences of their 'cosmic origins' to root the modern/contemporary Africa 1.0; and as it was 'Prophesied' by Marcus Mosiah Garvey of the Caribbeans-- out of rudimentary context for '[Africans 1.0 Dream](#)'. Later in times, Julius K Nyerere and Haile Selassie have had extended reservations for [Africa 2.0](#) and Africa 3.0—beyond 'Africans 1.0 Dream'. Thus, [Ethiopia and Tanzania have the heart and Mind of Africa 2.0](#) and [Africa 3.0](#). Then there are many countries/nation-state who have specific role playing, potentially, determining events pertinent to 'Institutional Choices' under the ongoing 'African Renaissance'...

Tanzania as a nation-state, through the lens of ontology of institutions, has 'Star influences' of Taygetans, and the Unseen Ones—unseen ones who guide Taygetans Extraterrestrials and various terrestrial Starseeds of 'Bird Tribe' on Earth. In this regard, ascertaining 'star influences' over people on Earth is not a straightforward matter—influences know no borders, they tend retain their inherent circular border while 'extending' to transform more other space to their like-ness; influences always 'fit' whosoever qualifies for them in active domain/field of reach – reach out to inspire thought and knowing. Thus, one way to ascertain influences is through qualified symbolism, by a particular society, that 'charge' cultural integrity and self-determination. 'Symbolic initiation' of Tanzania as the composite entity seeking self determination within its square of 'Time-Society-Institutional Choices-Events' utilize 'Adam and Eve' parallels of 'Being and Becoming'.

Tanzania as a nation-state, through the lens of ontology of institutions, has 'Star influences' pertinent to 'Liberty and Oneness'--the ultimate goal of 'Soul Triumph' that resolve terrestrial and extraterrestrial problems that come with recognizing and harmonizing conflicting elements of 'separatism'. In this regard, emergence of groups of individuals with likeness of prospective nations-states – seeking autonomies for self determination is not 'Evil' rather have to seek 'alignment' and 'realignment' to integral truths of 'Being and Becoming'. Thus, integration harmonize masculine and feminine elements of self determination. Then again, using systems view and thinking, this is core intelligible contexts of 'Adam and Eve' stepping up to the peak of Mount Kilimanjaro while holding 'Elephant Tusk' and rest their arms along with standing 'Shield of Prosperity'.

'Adam and Eve' stepping up to the peak of Mount Kilimanjaro while holding 'Elephant Tusk' and rest their arms along with standing 'Shield of Prosperity' are integral senses of humanity in conscious Genesis. In this regard, using systems view and thinking, Mount Kilimanjaro remarks first reorientation for what [Willia](#), the Friendly Extraterrestrial Being, refers to as '[Cryptic](#)'--through Conscious Intrigues—language of form and energetics, Mountains are extended sensibilities of Triangle--The Trizanium. Then again, 'Trizania' is the result prospective shape shifting Humanity that

contextualize community expanses of 'Ontology of Institutions', 'Self Determination' and 'Sovereign Integral'. This implies the Square of 'Time-Society-Institutional choices-Events' is simply mutual trans-morphing of 'triangle and square'-- 'Time and Events' are simply 'Manifestations' of Being and Becoming: 'Society and Institutional Choices'...

Mutual trans-morphing of 'triangle and square', in the coat of Arms of Tanzania is features as the four partitions within the 'Shield of Prosperity' which reflects 'cardinality of four basic alchemical elements—Water, Earth, Wind and Fire. In this regard, triangle and thus triangulation of Square in Circle come with definite articles of 'Axe, Spear and Scythe'. Thus, the 'X' symbolism represent 'Will and/or Willingness'-- being tied up with a spear in firm vertical position conotates 'Integral Faith'. Actually 'Integral Faith' is the mystique of 'the Cross of Life'--the Shield of Prosperity is feminine representation of 'the Cross'. Then again, four partitions themselves represent 'core values' of 'Sovereign Integral' prescribing 'the Rebirth/Resurrection'.

'Core values' of 'Sovereign Integral' prescribing 'the Rebirth/Resurrection', using systems view and thinking, provide topographical deductions of 'Water—Genesis of all events/Being and Becoming; Red Earth—Self Determination through [WORK](#) as the basis of Institutional Choices; Flag of Sovereignty of Tanzania—Community sensibilities, as single Society, that articulates auspicious 'African Nationalism'; Torch of Fire for Enlightenment—Pillar of Self-Determination through I-ducation...

Using systems view and thinking, Torch of Fire for Enlightenment—Pillar of Self-Determination through I-ducation constitute triangle, square and Circle of human experience whereby Community Expanses are edified by I-ducation for manifesting their own 'Destiny' as coherently inspired collectives. In this regard, 'Liberty and Oneness' is possible when the 'Torch of Enlightenment' is raised above all 'affairs' of men and women to enlighten their course for self determination and/or shapeshifting/Ascension. Thus, 'Rebirth/Resurrection' are fundamentally linked to 'the Earth and Sky' as 'Primordial Waters' of all manifestations. Then again, an

‘axe’ and ‘scythe’ articulate ‘Space and Time’--masculine and feminine articles of Work and Self determination.

‘Axe’ and ‘scythe’ articulating ‘Space and Time’--masculine and feminine articles for ‘Work’ and ‘Self determination’, using systems view and thinking, provide intelligible contexts of Economies, Power and Integrity. In this regard, Axe is a symbol for ‘Masculine Blow’/Strength to cause ‘movement’-- to cut and thus shape elements of spatial extensions; and Scythe is a symbol for ‘Breaths/Yields of Time’. Thus, these typical articles are so significant in charting ‘national integrities’ and extended ‘influence’ in vast expanses of ‘space-time’ and ‘contact’. For example, Urmah, the feline Star race, do ‘connect’ with ‘conscious cultural units’ of Strength and Honor—In Tanzania, Axe and Scythe and Spear to qualify ‘magical Structural Link’ that interstellar civilization yet the Tanzania 1.0 collective are not yet in full frequency march to cultural integrity of ‘Strength and Honor’; Thus it is ‘a dormant seed’ certainly there for ‘a purpose’.

‘Axe’ and ‘scythe’ articulating ‘Space and Time’--masculine and feminine articles for ‘Work’ and ‘Self determination’, using systems view and thinking, Mari Swaruu was on point when she mentioned about the Urmah being, secret cultural-catalysts to resolve many of terrestrial conundrums associated with ‘Being and Becoming’. In this regard, keys to revelations and to qualify Enlightenment are featured in many national emblems are ‘seeded’ to provide markers for the wise and just... In Kenya, a brother country to Tanzania, [the two Felines are features holding spears and holding the ‘Shield of Integrity’](#). Thus, a featured cock holding an axe within the ‘shield of integrity’, symbolizing ‘new dawn for self determination’ pertinent to African 1.0 national Society – again, cock/rooster with an axe symbolizes [time markings/progression, honor and work](#).

=====

=====

Adam and Eve – the Bold and the Beautiful

Kenya and Tanzania, Using systems view and thinking, provide intelligible context of Taygetans and Urmah camaraderie. In this regard, beyond ill fated Babylon confusions of cube of mind control pertinent to these neighboring Africans 1.0 states, Integral Seed of ‘Sovereignty’ of ‘One African Nation’ has been instituted by unknown/unseen Ones—Africans 3.0. In this regard, Kenyans Pride and Tanzanians Humility are still lower sensibilities of cube of mind control. Thus, ‘Soul Remembrance’ through the spirit of all life may instigate a very formidable state of emerging African 2.0 and African 3.0 state –African State with delightful cultural charge to positively transform the whole of Africa and Beyond.

Delightful cultural charge to positively transform the whole of Africa and Beyond, using systems view and thinking, provide intelligible contexts of communications, sensibilities and self consciousness. In this regard, Swahili language, cultural fusion and Blending of native Africans, Arabs, Indians and minority Europeans has been, Is and shall be key to new Africa and New World; ‘African Dream’ is thus a seed of different cultures blending in African Nation to forge new integral culture that harmonize all cultural roots and shoots of terrestrial humanity. Then again, Swahili language has been destined to glow, expand and assimilate the best of all terrestrial languages for the sake Liberty, Harambee and Oneness...

Using systems view and thinking, ‘Liberty, Harambee and Oneness’, are topographical deductions triangulating Tanzania’s national values, UHURU-UDUGU-HAKI-AMANI –Swahili for ‘Liberty-Fraternity/Ubuntu-Justice-Peace/Harmony’. In this regard, all mundane ‘business as usual’ in the present world, 2024, are conducted on metaphoric table of ‘Time-Society-Institutional Choices-Events’; should the societies know better, they are going to ‘overturn the table’ of economic and wicked powers of States proper. Thus ‘Time-Society-Institutional Choices-Events’ have direct parallels with ‘Liberty-Ubuntu-Justice-Peace’.

Liberty and Ubuntu/Fraternity come through I ducation; while Justice and Peace are determined by societies qualifying ‘better

knowing' and hence choosing better the contexts of their self determination with Love and Harmonious Objectivity. In this regard, using system view and thinking, articles that define 'work' and/or 'honor' speak volume of human drama on Earth. Thus, State symbols which overshadow collective will of pertinent society to provide basis of the black cube of mind control which may be auspicious or inauspicious to conscious individuals—the star seeds on Earth descended in 'Space-Time cultural fabric' to 'play the game with purpose'.

Tanzania, using systems view and thinking, has intelligible context of 'honor and glory' pertinent to the 'Soviet Union'. In this regard, [the ideological inclinations for people, work and power](#) share same symbolism— [axe and scythe is similar to 'hammer and scythe' of USSR](#). Thus, the truth pertinent to 'true people's power' is riddled in between 'State Politics' and 'Global Power Dynamics'. Then again, the USA is an interesting 'State' which echos 'Roman Empire State of Mind'-- again, this is neither 'good' nor 'evil' before 'enlightened' star seeds.

Empire State of Mind, bestows honorable grounds for 'Star Seeds' to work consistently with strategic game plans of domination, subjugation and control OR expose the whole game as something/situation not really worth-some. An Eagle in open sky, reigning spatial/airy domain with freedom while holding 13 arrows and Olive leaves is connotative of 'War and Peace' prospects--it is military supremacy and predatory propensities for wealthy, power and prestige. Predatory propensities are confrontational when they comes to contact with separate nation-states that seek true sovereignty and self determination. In this regard, using systems view and thinking capitalism can easily be deducted as predatory scheme of Economic Powers for 'Vanities'--vanities of 'Sweat and Blood' resulting from hypnotized populations serving bureaucratic institutions of power and prestige in Societies.

Using system view and thinking, dependency theories need not be 'theories' rather theorems pertinent to game plans of power, prestige and social manipulations through minds. In this regard, One Nation-state may wield Military and Diplomatic capacity and strategical root its prestigious prominence just to exploit others.

Thus, in the present world many nation-states are not truly sovereign—as they are under crafty socio-economic subjugation with false/undermined prospects of separate state powers in acknowledged membership within the ‘league of nations’.

In Tanzania, like it has been the case with ‘socialist states’ all across the world, there have been anti-imperialists sentiments that forged early spirit for social, economic and cultural independence. In this regard, Revolutionary ideas and institution is no strange matter in political landscape and State Institution of Tanzania. Thus, through strong ‘nation-state foundational roots’ the revolutionary prospects are somewhat dormant; with auspicious activities pertinent to Africans 2.0 and Africans 3.0, the technicalities of ‘Thy Kingdom come on Earth as it is in Heaven’ can be ascertained.

Ascertaining technicalities of ‘Thy Kingdom come on Earth as it is in Heaven’ can be implemented by reckoning that ‘Liberty-Fraternity-Justice-Peace’ are optimized by ‘Consciousness Intrigues’ and not Education, Law and Human Leadership. In this regard, positive cultural transformation come through ‘Christ Consciousness’ overturning the tables of ‘Business as Usual’ – business as usual being conducted by compromising human leadership for the sake of human prestige and vanities of life—selling to people dreams as perpetual promises and lies. Thus, Liberty, Harambee and Oneness is figurative proper for ‘Christ Consciousness’.

====

<https://www.youtube.com/watch?v=r7TYPDRSvPk>

====

New Genesis

Trizanium can codify ‘Christ Consciousness’ in terrestrial horizontal and vertical enterprises pertinent to culture and its glory of Being and Becoming.

Community expands, in order for it to qualify Liberty, Harambee and Oneness in practical terms of social enterprises, the square of of its human experience has to be codified.

In Tanzania, the pillars of codification pertain to Uhuru/Liberty -|- Udugu/Fraternity -|- Haki/Justice -|- Amani/Peace. These are the fundamental 'social values' that auspiciously charge contexts of collective self determination for the Enlightened World.

Culture, being the totality of human experience through expanses of time and space, has to integrate terrestrial striving for 'surface thriving' and 'Conquering Limits of Space and time'; An enterprise which is possible through 'Consciousness Intrigues'.

Consciousness intrigues are doors to 'more to life'--more of 'Being and Becoming'; by articulating sentience, conscience and consciousness itself. All manifestation are simply 'Consciousness and Intent' through the mystics of 'the Observer is the Observed'.

Uhuru/Liberty -|- Udugu/Fraternity -|- Haki/Justice -|- Amani/Peace are intelligible deductive topographic parallel of Fire/Golden Consciousness -|- Air / Flag – Sovereignty of Society -|- Earth – Institutional Choices through work and self determination -|- Water – Genesis of Affairs/Events of Creation and Creativity.

Community expanses, in order for it to qualify Liberty, Harambee and Oneness in practical terms of social enterprises, in has to transform is cultural savor through (1) Golden consciousness, (2) sovereignty of societies, (3) institutional choices through work and self determination, and (4) Genesis of Affairs/Events of Creation and Creativity.

As Genesis is all about the Ontology of Institution, 21st century and Beyond, the Taygetans and Urmah star races' camaraderie is the intelligible deductive topographic parallel of Genesis of Affairs/Events of Creation and Creativity in localized 'Space/Maritime' jurisdiction to effect 'New Earth and new Humanity'--and they just 'Utter' intentions that echo their 'Spiritual, Moral and Ethical' integrity.

As Genesis is all about the Ontology of Institution, in Space/Maritime Jurisdiction pertinent to humanity and the Mother

Earth, it implies thus both the Earth and Human population are ‘co-creators’ of new realities through will, capacity and actionable choice/decision making.

As Genesis is all about the Ontology of Institution, Taygetans and Urmahs are not alone, it just they are the most relevant Ones for the purpose of instigating actionable choice/decision making by sharing their ‘Salt and Light’ to then ‘crystallize humanity’s core cultural integrity’ and charge it with ‘codified light of self awareness and glory’.

Ontology of Institution is keyed by the ‘Torch of burning Fire’ in golden all encompassing halo; the Urmah’s edifice for strength, illumination, self awareness and pride. Strength of Mental capacity can be applied to Matter/material domains to articulate beauty, care and abundance.

Ontology of Institution is keyed by ‘Water of Eternal Life’ as ‘Matter and Light/Fire’ are One; thus a [Woman taming a Lion is the symbol of Strength to reorient Nobility](#) through Care and Camaraderie; which also has extended connotations of ‘the Water Bearer’ illuminated by [the Stars](#).

Using systems view and thinking, ‘a woman’ is intelligible context of ‘Culture’ as the Cosmos itself is the Womb of All Creation. The essence of ‘Space/Time’ is ‘Wombic Fluid’ that gather ‘something out of nothing’ to nurture, care and give birth to ‘Star Seeds’. The Swaruu sisters enterprise within the same magical correspondence of opening up the doors of Consciousness Intrigues, the Yoni/Vesica Piscis/Shield of Prosperity for humanity’s rebirth, on Earth, 21st century and beyond...

Using systems view and thinking, ‘a woman’ is intelligible context of ‘Culture’ as the Cosmos itself is the Womb of All Creation. In this regard, social and economic integrity have to qualify ‘Motherly’ principle in order to tame the beastliness of vain desires and occupations pertinent to undignified humanity.

Using systems view and thinking, ‘dignified humanity’ is intelligible context of the collective with ‘Fire and Passion’ burning and

throbbing in them while they observe lofty Spiritual, Moral and Ethical integrity. Urmah, provoke sensibilities of Fire and Passion that can come through standing the highest Mountain of Pride—Mount Kilimanjaro is the Highest Stand Alone Mountain on Earth, it commands respect and pride.

Using systems view and thinking, ‘dignified humanity’ is intelligible context of ‘self determination’ and ‘Oneness’ through life and death. In this regard, elephant’s tusks and shield of prosperity combine, bear intelligible context of auspicious ‘Strength’ through Death and Rebirth. Urmahs share their braveness and transcendental sensibilities of being and becoming... There is Pride in a nation which stand as One beyond the shadows of death.

Community expands, in order for it to qualify Liberty, Harambee and Oneness in practical terms of social enterprises, it has to comprehend the power of integration beyond death. In this regard, dignified humanity has to brace itself against its shadowy existence—it is vain structures of power, its ‘death economy’.

Taming the beastliness of death economy requires nobility in terms of personal freedom, kinship in spirit of Oneness, Justice and strong Ethics. In this regard, Liberty is freedom in greater spheres of life and influences -- through the gracious spirit of all life reside in every heart of sentient being. Justice and Ethics derive meaning and significance through ‘Golden Mindset’ that illuminate the ‘golden’ chosen path for self determination.

Personal Freedom is determined by fairness and nobility of self conduct; thus the glory of Being through uncompromising integrity in fairness and self conduct is ‘Fire’ and ‘Golden Consciousness’-- fire and golden consciousness prescribing the ‘Pride’ of oneself in defending ‘Liberty of One and All’ at all costs.

There is honor and dignity in ‘Serving and Protecting’ others against dishonoring intentions—dishonoring intentions toward their ‘God/the Source/the One’ ordained Liberty. When wickedness is ascertained beyond any reasonable doubt, and inherent abilities/capacity allows and intervention, righteousness is

‘actionable choice/decision’ -- making any skillful intervention to be justified and accountable to nobody else but oneself.

=====

=====

The New Call

21st century marks the main lane of transitional path for new era of terrestrial human civilization through codified ‘Christ Consciousness’-- ‘the golden light’ to thus bring about the ‘Golden Age’ of human civilization with full honor and dignity of Being and Becoming.

Ushering in humanity towards the ‘Golden Age’ is a service, not command and/or imposition. It is an open invitation to all Earthly star seeds to celebrate life and victory from dishonoring prospects of humanity 1.0. In this regard, humanity have to determine its collective disposition for true emancipation, dignity and honor. True honor is not conferrable from one person to another, rather it is earned by (1)‘specific resolve’ and (2)‘strength of character’ and (3)‘illuminated codes’ of self conduct.

Observing the tapestry of human events from mid 20th century up to now, using systems view and thinking, there is an intelligible context of wars and rumors of war which haunted and still haunts global human society under the shades of idealogical conflicts. In this regard, idealogical conflicts are ‘vectorial domain of human sensibilities extending to rational interpretative depth of thoughts pertinent to philosophy on life—conflicts may indicate disunity in resolve and strength to forge one formidable society.

Vectorial domain of ‘human sensibilities’ extending to ‘rational interpretative depth of thoughts pertinent to philosophy on life’ yield ‘Political Dimension’ in human institutions—yield politics that articulate community ‘power relations’ for good or bad. In this regard, idealogical conflicts reflect maturity versus immaturity OR coherent versus incoherent thinking that instigate ‘actionable choice/decision making’ – actionable choice/decision making

pertinent to institutions outpicturing auspicious or inauspicious events.

Vectorial domain of ‘principles’ extending to ‘soulful intentions’ on philosophy on life yield ‘Healthy Community Planning or Malignant Planning’ in human institutions—malignant planning are prospects of hidden agenda—Conspiracy, Elitism and Seditions due ‘not knowing Oneself in full’ in the midst of many others in similar prospects. In this regard, soul searching is necessary in order to overturn the tables of ‘wicked monkey business as usual’ pertinent to ‘time-society-institutional choices-events’.

Vectorial domains of ‘Status and Trends in Society’ through systems view and time, validates ‘community structures and integrity’ through collective sentience, conscience and consciousness. In this regard, freedom in a sovereign nation-state is not necessarily ‘Liberty’; likewise sovereignty may be a limited notion and/or social construct for ‘incomplete independence’. In any given society, social capacity to transcend conflicting interests and ideas can be facilitated by the ‘Golden Consciousness’ to illuminate its ‘Sociological Imaginations’ and thus inspire better and noble ideas for willful transformations.

Todate, 2024, there is no ‘Healthy Community Planning’ in say, auspicious integral senses—there is no nation-state with ‘Healthy socio economic integrity’. Auspicious Economy is the Mother of all Justice and Peace/Harmony. Death economy is the greatest misfortune of present human civilization. With Humanity 2.0 and Humanity 3.0, society will be able to [overturn the tables](#) of ‘wicked monkey business as usual’ exploiting ‘inexact sciences’ of monetary servitude and it is a conspiracy against the potential ‘healthy global culture’.

Trizanium is a simple tool for assessing ‘vector intention/attention’ that establish the integral manifestations of societies as they qualify ordinary and/or extraordinary sensibilities in being and becoming—using congruent thoughts and perspectives.

Intention/attention, using trizanium of system view and thinking, invoke beauty of the Observer is the Observed. In this regard, any

community expanse in focus triggers intelligible context of Being and Becoming. Trizanium simply facilitates in organizing the gnostic elements, which are comprehensible and congruent to consciousness intrigues. It is key to human 2.0 and human 3.0 enterprise—ample diagnostic tool to assess personal, community and national integrity for spiritual, mortal and ethical affairs/matters.

=====

Angelic Functions

In the East Africa, Tanzania, the triangulation of square of human experience has been rooted by Nation Founders, with prominence of Julius K Nyerere as philosophical state-man; Him resolving that in order for the True and Independent Nation of Tanganyika to stand, Tanganyika which later became Tanzania, the whole Africa has to be 'Free'. And that in order, for any nation to develop auspiciously, it requires People, Land, Good Political Governance and Leadership; and that Africa can have proper building up integrity through systematic regional integrations.

Using systems view and thinking, the intelligible contexts of 'Good Political Governance and Leadership' correlate with 'Justice and Peace'. In this regard, Politics and Leadership pertain to Thinking 1.0 as Aristotle used to wield thinking through '[reason-ability and arguments](#)'. Thinking 2.0 is possible through 'Systems View and Thinking', and with auspiciousness of the [Trizanium](#), it is possible to ascertain the correct framework of Human Integrity—'Power That Be' do not favor 'Integrated Thinking' for that is bad for 'Wicked Monkey Business as Usual' pertinent to fornication with great whore of abominations.

'Justice and Peace', using systems views and thinking, is partial deduction pertinent to events and 'regulated institutions'. In this regard, the prospects of 'regulated institutions' is thus vague and may in actual case entail 'controlled chaos' pertinent to 'social structures' and their 'rest/unrest' situations tied to 'interests'. Thus,

it is the open and hidden ‘interests’ that determine ‘Peace and/or War’ prospects of any nation.

In diabolic world of wicked monkey business and usual, using systems view and thinking, intelligible context of the root of all ‘good and evil’ is that which facilitate the domain of ‘interests’. In this regard, interest ties ‘People, Land, Fortitude/Power’. Then again, it is clear ‘money can be the root of all good and evil’ through conflicting/harmonious interests.

The basis for transitioning into golden age require ‘(w)holistic comprehension’ of viable intelligible contexts pertinent to ‘self interest’ and ‘community interests’; as these two articulate the notions of ‘Freedom’ and ‘Liberty’. In this regard, codified ‘Christ Consciousness’ facilitates the integration ‘Personal Freedom’ and benign ‘Community Desires’ to systematically eliminate ‘conflicts’ in integrated community thriving—facilitates harmonious prospects of ‘Being and Becoming’.

These perspectives illuminate the essence of ‘[African Dream](#)’ as ‘codified seed of self awareness’ beyond conflicts and separatism of People, Land, Fortitude/Power. Africa as a continent is simply a strategic location for People, Land, Fortitude and Power in potential new ways of Being and Becoming.

Potential new ways of being and becoming in Africa, have been seeded through the active terrestrial starseeds-- known and unknown, in collaboration with the Extraterrestrial ‘Seen’ and ‘Unseen Ones’. Both the known and Unknown can be known through the Fruits of their WORK, yesterday-today and tomorrow.

Community expands, in order for it to qualify Liberty, Harambee and Oneness in practical terms of social enterprises, the square of of its human experience has to be codified in terms of ‘Sovereign Integral’ and ‘WORK’.

In Tanzania, its national symbolism, has ‘Flag of Sovereignty’ and ‘Charter of Self Determination’ represented within the strip of ‘Air’ and ‘Land’ prospects. Using systems view and thinking, intelligible contexts of the Tanzanian bear correspondences to (1)**Green**—color

for land fertility; (2) **Yellow** – Mineral Resource Wealthy; (3) **Blue** – Water Bodies that define its ‘National Functional’ boundaries; and (4) **Black** – Africans 1.0 who are the ‘custodian’ of ‘Freedom’ for the World...

Extended topographical deduction of the Tanzania and its national symbolism have various intelligible contexts. Some can be ascertained as: (1) **Green**-- Heart mystics which harmonize the ‘lower’ and ‘higher’ sensibilities of ‘regenerative physical life’ in Oneself and with the Spirit of Mother; (2) **Yellow**-- Mental Strength as the real ‘Resourceful Wealthy’ to transform or transmute any material prospect; (3) **Blue** – Water Bodies complete land for ‘Fortitude’ and ‘Power’ beyond ‘Conflicts’--being key resource to mundane life; (4) **Black** – Africans 1.0 are custodian of ‘Land and Liberty’; as they ‘rise’ to the ‘Yellow’ of ‘Golden Consciousness’ they are going to WORK hand in hand with Africans 2.0 and African 3.0 who located, are allocating and will allocate to Africa on both permanent or temporary basis.

Africans 1.0 complement Africans 2.0 and Africans 3.0 as ‘the Sun and Moon’ of the ‘**African Dream**’. The Mother Earth is common to all humanity, and this is the way it should always be on Earth that the greenery of regenerative plants life bless all humanity the same. The Earth, roots human experience for People, Land, Fortitude/Power, however abusing the Earth with destructive tendencies for ‘wicked monkey business as usual’--preponderance for ‘Death Economic’ is intelligibly an ‘Abomination’.

In Tanzania, the origins of Africans 2.0 and Africans 3.0 have been instituted through ‘Party Organization of the People’. Original sensibilities, of resolve for auspicious self determination as one nation, was through Work—freedom is Work. That, Africans have to have WORK as measure of their self determined freedom from the world of ‘wicked capitalism’; the very basis of [African Socialism and Self Reliance](#).

= ===

Slipping and Not Falling

Tanzania, like all communistic and socialistic nation-state, have succumbed to fatal economic policies and incompatibilities with global imperialism through the instrumentation of 'Monetary Aids' and 'Liberal Market Systems' and 'Shady Economic Diplomacy/Agreements'. Using systems views and thinking, liberal market systems are 'breeding grounds' for Gangster Imperialists Forces, Wanksters and Wannabe's exploiting 'informational vectors' to control central banks and 'play smart' with 'nation-states' – being smart with the prospects of 'Selling Ideas and Dreams' pertinent to 'Democracy' and 'Economic Freedom' through 'Strong Liberal Democratic Institutions'.

Using systems view and thinking, its is very easy to determined that the whole 'Global Trade' and Globalization prospects are tactical for the 'Fortitude/Power' of black cube of Global Mind control. In this regard, 'Petro-Dollar' or 'BRICS' or 'Precious Metal Based' currency won't cut it... They share common phenomenology of 'Fortitude/Power' of black cube of Global Mind control.

Using systems view and thinking, national currencies are key to resolving conflicting 'interests' of Global Society, however in order for they to work properly -- to various proficient degrees of functionalities, collective humanity has to be redeemed from the black cube of Global Mind control.

People, Land, Fortitude/Power can be reoriented away from 'Power' and 'Fortitude' based on 'Will to Power' – economic power. Using systems views and thinking, this can easily be done if the codified 'Christ Consciousness' is qualified by critical masses who proceed to 'purpose' and 're-purpose' their cultural prospects.

'Purpose' and 'Re-purpose', using systems view and thinking, is the intelligible context of 'Revolution'. In this regard, freedom expanded/extended to 'Golden Consciousness' begets purpose and re-purpose sensibilities of Sentience, Conscience and Consciousness through Actionable Choice/Decision Making. In the particular case of Tanzania, so as a case study using systems view and thinking, it

can be ascertained that the 'Revolution' call has been stalled and gone dormant due to missing 'critical mass' who can raise into the auspicious occasion for required 'Golden Consciousness'--symbolized by the Torch of Liberty, ever enlightening the 'Yellow and Green Prospects' of the Nation – Nation of 'Freedom Fighters'...

Using systems view and thinking, Codified 'Christ Consciousness' as the 'Golden Consciousness' articulated by integrity and sensibilities of Uhuru/Liberty -|- Udugu/Fraternity -|- Haki/Justice -|- Amani/Peace is the mystique of 'Consciousness Intrigue' whereby the Axe and 'Spear of Destiny' and Scythe definite articles come to prominent intelligible contexts.

Axe and Spear of Destiny and Scythe, in the 'Earth Strip' pertinent to 'the shield of prosperity' of Tanzania National Symbolism, using systems view and thinking, has intelligible contexts of 'Unity in Strength out of Dualities of Life'. In this regard, national self determination is codified for courage, purpose/re-purpose and patience through wisdom.

Axe and Scythe represent duality of 'Feminine and Masculine' constitutions pertinent to 'WORK'; using systems view and thinking, intelligible contexts of two intertwining snakes logarithmically spiraling to gaze unto the 'Globe of Integrity'. In this regard, the 'four eyes' of 'harmonious duo of feminine and masculine snakes' forever scan the integrity 'Globe of Integrity' – as revolving 'Swastika' of sentience, conscience and consciousness pertinent to 'forms and energetics'.

Spear of Destiny is analogous to the vertical extension of all 'forms and energetics' with formidable integrity of 'Matrices of Life' -- with integral consciousness units of 'Self-Determination' through 'Space-Time'. In this regard, harmonious duo of feminine and masculine snakes spiraling the spear of 'vectored intentions' of 'Being and Becoming' are key to both 'Healing' and 'Balance' -|- 'Harmony' and 'Peace' -|- 'Order' and 'Justice'. In this regard, 'Social Engineering' follows auspicious contexts of 'self illumination' for 'Wisdom, Unity and Peace'.

In the national anthem of Tanzania, the singing state of grace invoke 'Wisdom, Unity and Peace' as 'Shield for Integral Prosperity'; in Swahili language proclaiming: 'Hekima, Umoja na Amani'--yet when 'Golden Consciousness' dawns it is going to transform into invocation for 'Wisdom, Oneness and Harmony'; In Swahili 'Hekima, U-Moja na Utangamano'...

Using systems view and thinking, Unity and Peace are related to 'Freedoms'. In Extended self determinations, transcendental prospects of Being and Becoming, it is 'Oneness and Harmony' that define 'Liberty'. Unity pertains to finite/limited forms and energetics thus 'Matter/Matrices', Oneness articulates prospects of 'form and formless—order and chaos' thus 'Spirit'-- towards unlimited expanses of Being and Becoming...

'Unity in Strength out of Dualities of Life' in this 'HOUR' of 'Harvest Time', using systems view and thinking, is the intelligible context of the Taygetans, [Urmahs](#) and [Alpha Draconians](#) camaraderie assessing, monitoring and evaluating prospects of 'Graduation' out of [Spiritual, Moral and Ethical](#) preponderances – tweaking for auspicious 'intonation of senses and sensibilities', determining the eligibility of Earth Starseeds for Harvest – 'Harvest for the World'...

=====

https://www.youtube.com/watch?v=JT4C_tDi-Vs

=====

From Revolution to Evolution

Using systems view and thinking, community sensibilities are key to revolution and evolution of its social integrity. In this regard, intonation of senses and sensibilities qualify the 'Spirit of Self Determination' to aspire new heights beyond 'ying and yang' of 'institutional formidableness and comfortableness'. Thus there are 'two squares' of 'orientations for social integrity'--square of 'God Sensibilities' and 'Dissolution of God into true Liberty'...

Many nation-states of Earth exploit the notions of God/Gods to charge their corresponding social systems with senses of

‘Patriotism’ and ‘Unity’. In this regard, Religion can be integral element of ‘codifying’ and ‘influencing’ contexts of national sensibilities and Self-Determination. Thus, propensities for moral and ethical sensibilities require the vacuum of ‘Being and Becoming’ to be ‘charged’ auspiciously to the course of collective cultural aspirations’.

In the East Africa, within the past 500 years—notably, many cultures and many religions and many races have come together to strive as natives, traders, missionaries, colonialists, traders and settlers-- to later on emerge as one nation-state in post colonial era. In this regards, there is a unique ‘intonation of senses’ that determine the collective needs and wants that constitute their social persistence and consistence.

Tanzania, in particular, the sense of nationalism has been imbued by people’s political affiliation of the once state party—the Revolution party. Using systems view and thinking, the ‘Revolutionary Ideologies’ all over the world pertain to struggles, emancipation and freedom from the vices of colonialism, racism, propaganda and imperialism. Thus, this Revolutionary Party is technically an ‘institutional Movement’--as per its own ideology: sensibilities of Equality, Abolishing all forms of Human exploitations and/through ‘African Socialism’.

‘African Socialism’, using systems view and thinking, is stalled from the technical intelligible context of ‘purpose and re-purposing’ of social WORKS and FREEDOMS. In this regard, statesmen and national founder laid out a foundation to be completed by the People Themselves—warning them not to fall into blind faith over Governmental Leaders/Politicians. Under liberal democratic institutions, leaders/politicians can act auspiciously and/or inauspiciously to the course of public FREEDOMS.

Vices from inauspicious leadership would lead Africa and its people backward into ‘limited freedoms’ once again due to ‘Human frailties’; this was precisely so proclaimed by Julius K Nyerere during the Party inauguration/mass congregation of 1977. Julius K Nyerere being African 2.0, communicated ‘thoughts and sentiments/feelings’ of bold determination for Africa 2.0 and Africa

3.0. Thus the Revolutionary Party, using systems view and thinking, was the vehicle of expression for 'the will to be Free' from external and internal vices of 'Human Leadership' and its compromising social aspects/systems.

Revolutionary Party of Tanzania bear 'Green and Yellow' colors, using systems view and thinking, there is an intelligible contexts of UDUGU/Fraternity as color green denote '[autotroph](#)' ; the first degree of 'self independence' and free from 'exploitive resourcefulness' in [food chain](#). In this regard, green is the color for 'self reliance' which only depend upon the 'light' of the sun to make itself self sufficient before mineral and abiotic factors. Thus Yellow denote 'Golden Light'-- coded 'Christ Consciousness' for golden sensibilities of 'Self Determination' and 'Fraternity'

Revolutionary Party of Tanzania bear criss crossing Yellow-Golden Hoe and Hammer representing Farmers/Workers—Reverberating socialistic motto: Farmers and all Workers Unite! Using systems view and thinking, the intelligible contexts of many Africans nation using Green, Yellow and Red colors prominently is nothing but signs of Fraternity, Self Determination and Nobility. Thus green and red colors are intelligible contexts representing '[Blood and Chlorophyll](#)' as agents of functional national integrity.

Revolutionary Party of Tanzania, using systems view and thinking, miss the sensibilities of 'red, magenta and white' to 'purpose and re-purpose' its 'intonation of senses and sensibilities'. In this regard, the true revolutionary movement is the edification of 'Revelations'-- magenta and white of the 'The Third Eye'. Thus, 'Joy, Assertiveness and Universality' come with colors Orange, Blue and Violet...

Tanzania has the foundation base for 'Revolution and Revelation' through 'the first Call'. Using systems view and thinking, intelligible context of 'fraternity and freedom' qualify the sensibilities of proficiency—many native tribes, about 120 tribes, have come together into auspicious brotherhood along with migrated people of various cultures—Indians, Europeans, Arabs and so forth. In this regard, the Swahili language, has been key to uniting people of various tongues and terrestrial origins enhancing the 'intonation of senses and sensibilities'. Thus, the true prospect of Swahili, as a

communicative tool, has been ordained to qualify more intonation of senses for peacefully co-existence of all—future universal language of ‘all tribes’ from terrestrial to extraterrestrial...

<https://www.youtube.com/watch?v=auOyy96jiLY>

====

Purpose and Re-purposing

Re-purposing the prospects of Revolutionary Party Institution in Tanzania, is a second call...

Using systems view and thinking, prospective intelligible context of ‘red and yellow’ is the basis of ‘Entering the Dragon’. In this regard, self determination that imbues the ‘fire’ for ‘transformation’ requires the ‘coded boost of energy’. Thus, China and Russia as integral cultures with certain intrinsic attributes have hidden keys to ‘Enlightened Global Community’ through WORK and Freedoms. Then again, India has keys to the wealthy of artefacts and relics that may serve to harmonize old and new sensibilities in ‘Spirituality’--Consciousness Intrigues.

Using systems view and thinking, The East Africa Culture is ready for Africa 2.0 and Africa 3.0 prospects through the ‘[Rasta Culture](#)’[‘url’]. In this regard, intelligible context of ‘green-yellow-red’ can be observed directly in Rasta Culture as rudimentary seed for ‘the Second Call’. Thus, from [Ites, Green and Gold](#), through magenta and ‘white’, Rasta would have a control to transform Humanity beyond outer facades of people in terms of skin color, points of origin, tribes, nationalities etc in a rainbow of all nations.

Using systems view and thinking, there is an intelligible context of Rasta culture coming out of the cold as ‘counter culture movement’ with cultural intonation of senses charged by 1960’s hippy and yippy movements—absorbing the good and the bad of ‘reactionary’ attitudes of rebellious spirits. In this regard, there have been Rasta 1.0, Rasta 2.0 and Rasta 3.0—those affiliate Rasta with Black Skin Color; those who affiliate Rasta with Love and Togetherness beyond

‘ism and schism’; those who ‘feel the mystic of love and revelations’ for better humanity and living up the ‘Positivity’...

It is the Lion’s pride of Rasta -- a most desired cultural trait for global transformations.

Using systems view and thinking, there is an intelligible context of Rasta having cultural influences of the Urmahs in terms ‘Strength’ and ‘Resolve’. In this regard, musical, ideological and aesthetic constitutions of Rasta are keyed to ‘nobility’ of His Imperial Majesty Haile Selasie I. Thus, it is Rasta 1.0 which bear cult/religious zeal for ‘religious order’--seeking messiahs and messianic orders related to Ras-Tafari; however for those who know better Rasta is simply a way of Life—wearing one’s pride with honor dignity to be the One, Dreadlocked or not.

Wearing ones pride with honor dignity to be the One, Using systems view and thinking, has intelligible context of freedom of self expression and right for self determination beyond prejudiced societies. In this regard, it is always bold to go against the norm especially if the society itself seem to be unto an expiring order. Thus wearing dreadlocks, refined or natty, may be a symbol of one’s pride in self expression; having nothing to do confrontation and/nor conformity to ‘beauty standards’. Then again, one may decorate oneself with articles of beauty with honor and dignity to the body’s strength and sensibilities of ‘good vibes’ in self composure.

Rasta culture is fruit from many seeds for many seeds; from ontological perspectives determining its forms and energetics.

Using systems view and thinking, there is an intelligible context of ‘JAH’ as a word with etymology tracing back to [JAI JAI mantra of Hindu Culture](#), yet again Yahweh of Judaism. In this regard, nations of people within the square of ‘Time-Society-Institutional Choices-Events’ are usually ‘locked in’ within the CUBE of specific social integrities using notions of ‘God(s)’ or concept of ‘Trinity’; Rasta radicalized Yahweh into JAH with aesthetic taste of Hindu [‘Remembrance of God’ Mantra in moments of Purity of Senses and](#)

Pleasure—JAI JAI or JAH JAH. Thus, JAH connotes the root and shoots of Being and Becoming the ‘Culture Man’.

Using systems view and thinking, there is an intelligible context of ‘HARAMBEE’ as a word with etymology tracing back to HARE HARE AMBE mantra of Hindu Culture; in colonial era Kenya, Harambee became the ‘Swahili word’ as the coastal Natives and Indians migrants worked together in railway construction chanting for Strength and Harmony. In this regard, Harambee has a motherly spirit of redemptive ‘fire’ to destroy obstacles in the course for self determination. . Thus, symbolism of Strength, Power and Resolve are ‘institutional charge’ for ‘functional togetherness’.

Using systems view and thinking, both JAI and AMBE roots are ineligible contexts of intonation of senses and sensibilities for auspicious self organization structure/tendencies and functionalities. In this regard, both purpose and re-purposing follow patterns of order, chaos and harmony. Thus, the mystics of ‘God(s)’ and ‘Blessings/Curse’ are symbolic to ‘forms and energetics’; Education 3.0 is I-ducation which may reveal mysteries of manifestations, shapeshifting and contact with other ‘alien’ sentient intelligences in terrestrial cultures—something which is possible all the time...

Education 3.0 through human 3.0 can reveal how JAH is close to YWVH tetragramatron. In this regard, human cultures, under proper framework ‘culture centers’, may be trained to comprehend the secrets of ‘forms and energetics’ beyond ordinary; something can be manifested out of nothing through right intonation of YWVH sono-electrogravitic sensibilities of chanting and thought.

Education 3.0 through human 3.0 can reveal how ‘Liberty’ take sentience, conscience and ordinary consciousness beyond ‘God(s)’ conceptions of forms and being. In this regard, Liberty is a state of Being that requires ‘No God’ as an Enlightened Individual or One who observe the ‘Eightfold Path’ walks the path of ‘Consciousness Intrigue’--Consciousness Intrigue is nothing but pursuit in ‘Godliness’... Consciousness is ‘Godliness’; religions is social craft to guide individuals or masses for certain ‘objectives’--they can be

auspicious or inauspicious in ‘separate times’ of humanity’s conscious evolution’.

Using systems view and thinking, Rasta culture, should it spread as ‘Popular Culture’ its foundation in terms of intonation os senses and sensibilities is better be ‘Good Vibes’ and ‘Higher Insights’ beyond freedom, fraternity, peace and Justice. In this regard, Rasta already has foundation for this through spirit of festivity and Joy and light—Mystique of Reggae Music and ‘message’. Thus reggae music is indeed music of heart and soul, as the strobe-light like beat and note of its rhythm reverberate with beats of manifestation and De-manifestation of all and everything with ‘Time’--the heartbeat of the Divine.

Cultural ‘Message’ of Reggae music in human society has made it possible to root golden aesthetics in Self Expression and Love and Strength. Using systems view and thinking, intelligible context of ‘Salt and Light of the World’ has been possible through mainstream culture planting seeds of higher awareness and nobility—To the receptive, Reggae has seeded enhanced intonation of senses pertinent to the notion of ‘Liberty’ as ‘LOVE -|- BEAUTY -|- STRENGTH -|- RESOLVE’ in music and message.

====

<https://www.youtube.com/watch?v=M-w7SXnzQgo>

====

Love-Beauty-Strength-Resolve

Revolution pertains to Freedoms, Liberty takes revolutionary movement to ‘Evolutionary’ prospects of Being and Becoming. In this regard, Love-Beauty-Strength-Resolve are possible through ‘coded Christ Consciousness’--the Golden Consciousness. Thus, ‘JAH LOVE’ in Rasta Culture is possible intonation of senses and sensibilities for ‘coded Christ Consciousness’. With JAH LOVE, field influences are possible for transforming Fraternity to Oneness, Justice to Abundance, Peace to Harmony and Freedom to Liberty.

States of Liberty, Oneness, Abundance and Harmony are diagonal to Freedom, Fraternity, Justice and Peace... Through the cube of

transformation in 'NOWNESS', the inverse of 'INSIGHT' and 'TRIZANIUM' can be deduced. In this regard, systems view and thinking is an 'evolutionary' process in sentience, conscience and consciousness. Thus the 'DHAMMA' of Buddha is simply transformation from one cube of Being unto the dynamic Cube-ing of ALL AND EVERYTHING—All forms and energetics being eternally self referring. Then again the Wheel of Dhamma having 'Eight Spokes' is akin to a Trizanium within the Trizanium... And this makes Buddhism the only 'Godless religion'...

The diagonal inner and outer squares of freedom-fraternity-justice-peace and Liberty-Oneness-Abundance-Harmony constitute the 21st century 'Dhamma Yantra' – An instrument for arresting intelligible contexts of all religions and/or paths articulating 'forms and energetics'. In this regard, it is the 'inverse' of Outer and Inner circles of the '[All Seeing Eye](#)' along with its implied 3 freedom keys of Christ Consciousness, Islam and Dhammapada.

The implications of [Dhammapada](#), [Christ Consciousness](#) and [Islam](#) are the functional secrets of 'virtual cube, three dimensional perspectives of transforming cube and central dot of 'Spin'--Spin for the Whole Mandala.

Spin is key to the Swastika, kundalini of transformation, consciousness intrigues of intention and attention.

All manifestation are possible through the will of 'Allah'.

All intention and attention prospects are contextual consciousness intrigues yielding intonation of senses and sensibilities—senses and sensibilities that articulate all and everything through the 'Integral Spin'--integral spin centered in 'the One'—the One in all and everything, never born never dies—Existence!

Existence is light of the world governing 'Heaven and Earth' prospects; Heaven and Earth are integral intricateness of 'form and energetics'-- as 'solids/liquids/gas/plasma' versus 'emptiness' of 'space'—as material spheres of planets and plasma balls of the Stars suspended in cosmos—always in motion... as Spinning Galaxies,

Planets around Suns... as Moons around Planets; every heavenly body revolves around one another and spins... [Earth]

Existence is intonation of senses and sensibilities which yield occultation of 'selves' from 'outer light' into 'inner light'; as intelligible contexts within hours darkness—darkness pertinent to Being and Becoming—Day and Nights of 'Consciousness Intrigues' through the geometries of Space-Time; as Individuals and/collectives seek coherent senses and feeling in order to define company, comfortability and compatibilities.[Wind]

Existence is 'Salt and Light of the World' – as specific intelligences in 'forms and energetics' which can conglomerate as sentient being, matter, thought and interact under illusions of bodily senses, community senses and their corresponding self determinations – with 'space-time' as mirrors of soul—soul as metaphysical specific functional intelligence in space-time.[Fire]

Existence is the 'Water of Life'-- everlasting life manifesting intelligible contexts of 'Event(s)', 'Being', 'Movement' and 'Time'; there is no 'creation' in real senses—all life is creativity as things come and go through the waters of life. Solids are 'illusory' phenomenas and so is 'time' through 'mind' – in both contexts: physical and metaphysical senses. Mind is a tool of will, thus it can be a time machine as much as it can be manifestations guide – as 'wave guide' for harmonics of seeing and focusing realities/intelligible contexts of events/intelligible contexts of the intonation of senses and sensibilities.[Water]

=====

Reckoning the Existential Saga to Relive

Using systems view and thinking, In Tanzania national symbolism, Existential Saga is embedded in full and emphasizing in Liberty, Abundance and Oneness and Harmony as Spear of Destiny-Motto: *Uhuru na Umoja*; and Elephat's Tusks. In this regard, there is an intelligible context of (1) 'Spin' as 'Spear of Destiny which grounds 'water, earth and wind' by rooting in waters and extending to thus

pierce the 'Flag of Integral Social Sovereignty' – and points further upward towards the nexus of 'Transformation' the 'Fire': The Sovereign Society 'vector intentioned' for Liberty; (2) Liberty as Torch of Enlightenment on Mount Kilimanjaro, as part of four national values Freedom-Fraternity-Justice-Peace: The mountain proper transforms all four values, through the 'vesica piscis', thus imbues composite 'intonation of senses and sensibilities' of Liberty-Oneness-Abundance-Harmony.

Using systems view and thinking, In Tanzania national symbolism, Elephant's Tusks and Mountain proper enshrining 'Cotton and Cloves' are intelligible contexts of 'Abundance' and 'Harmony'. In this regard, the destiny of the nation is harmonized with the spear to influence actionable choice making that meet/satisfy its wants and needs using 'Consciousness Intrigue' and 'Traditional Means' as necessary. Thus, the 'Adam and Eve' proper is the 'four eyes' equivalence of 'snakes having attention in the central spin of infinity expansion of space-time—only localizing and focusing at the sixth center to manifest vision come 'forms in a making'.

Cotton and Cloves are figurative natural resources for human industry pertinent to 'Clothing' and 'Food' as cotton is used to 'make threads' for fabrics; and Cloves are an anti-inflammatory food substance with the ability to detox the human body. In this regard, using systems view and thinking, both articles combined provide a topographical deduction of socio-economic fabric with healthy and fragrant properties -- as cloves are 'aromatic substances'. Thus, 'aromatic essence' is the reminisces of '[Kekule's Snake Ouroboros](#)' --aromatic substances are 'ring structures'/hexagonal propensities. Then again, Clove and Cotton stand for the 'Hexagonal Space-Time'.

Using systems view and thinking, In Tanzania national symbolism, Elephant's Tusks and Mountain proper enshrining 'Cotton and Cloves' are intelligible contexts of 'Abundance' and 'Harmony' as 'Unleashing the Dragon of Wealthy and Prosperity' with Golden articles of Axe, Scythe and Spear from the 'Red Strip' of Earth in Vesica Piscis. In this regard, HARAMBEE is key to paradigm shift in socio-economic paradigms—from revolution to evolution, from unity to Oneness and from $1+1=2$ to $1+1=8$; Synergy in exponential Power in 'Consciousness Intrigues'. Thus, when humanity come

together in Heart and Mind it can do much 'out of nothing' in comparison to 'traditional senses of work and collective self determination'.

HARAMBEE, using systems view and thinking, provide intelligible context of beginning from physical proper, axe-spear-scythe, and multiplying causes into 'amplified' and extended 'Temporal and Spatial' framework of 'forms and energetics'. In this regard, extending in formidable spatial and temporal order, as a specific framework, is an intelligible context of 'Defense'. Thus 'Ambe/Kali/Durga' is the goddess of protection -- as ['Armed and many armed\(8\) Woman' riding the Tiger—Woman associated with protection, strength, motherhood, destruction, and wars.](#) In Kenya national symbolism, the defending proper is pronounced and marked—Two Lions holding 'Spears and Shield of Prosperity' on mount Kenya proper.

Using systems view and thinking, HARAMBEE represents mode operand of the advent 'MOTHER ECONOMIES' in the form of 'SOCIAL ENTREPRENEURSHIP SYNTHESIS'. In this regard, mother economies entail extended 'temporal-spatial' framework of industrial purpose and re-purposing for communities' needs and wants. Thus, economies at physical proper may entail 'peace and war' following Justice or Injustices while through transformative cubes of limited and limitless prospects, extends to 'Harmony and Abundance' ensuring every member of the community/society can have what s/he wants, in time without 'man eating man prospects'.

Using systems view and thinking, the present economic paradigm is 'man eating man' prospect—the Death Economy. In this regard, there is no 'real peace' rather propaganda of civil and just society while the actual fact on the ground is 'war for survival'. Thus 'Elephant Tusks' are externalization of 'Wealthy, Grounding and dynamic Stability'.

Certain extended topographical deductions from symbolic topological flow can be shared here to edify this enterprise...

It is a standard practice that heraldry and vexology has to imbue the 'Trinity' of 'Ontology of Institution', 'Insight' and 'Desired Trend and Status' of the Society in which it bears correspondence with.

'Coat of Arms of the United Republic of Tanzania' has 12 standard contextual symbols...

One of those is the contextual 'Elephant Tusks' within its artistic depictions...

What do those Tusks, symbolize?

Within the contexts of Exoteric senses pertaining to rational interpretations, it can be expressed as 'Wealthy of Natural Resource--especially Wilderness, Landscapes and the associated 'Eco-system'.

Using Systems View and Thinking, the Elephant Tusks connote/is associated with 'Royalty and Dignity'... Why Elephants are poached for(?) Their tusks... What are they used for(?) For traditions of creating omens for wealthy, power and status(!)

Using Systems View and thinking, deploying 'Elephant Tusks' in the national emblem/insignia for 'community/status/nation-state' draw 'magical influences via the occult of law of correspondences'; thus 'self determination' is spiritually charged for auspicious collective self determination to thus justify 'integrity' -- integrity towards 'wealthy generation'.

But why 'Elephant Tusks(?)

Traditionally, horns have been the symbol of 'power and status'; yet for god's sake--elephant tusks are not even 'Horns'... They are in actual essence 'Teeth'(!)

Using Systems View and thinking, 'Teeth' are associated with 'Consumption and regeneration'! Elephants eat in order to survive in the jungle by crashing trees and pulling 'resources to their mouths'-- eating and growing BIG! For god sake, elephant are 'violent too'! It is the Economics of survival... It is the practicality of

struggle for Consumption in order to feed oneself, your family and thus meet one's 'daily necessities'...

Using System View and thinking, being the pair of Tusks -- pair of tusks engulfing the 'Vesica-Pisces--Shield of Prosperity', bears resembles to 'Morals'...

Morals are the sensibilities of 'Self-Protection'. In the Coat of Arms of Tanzania, those sensibilities pertain to 'Water, Earth, Wind and Fire--water, red ground of 'self determination', patriotism over national-flagship, and 'Fire--the Torch of Liberty'.

Self determination can be symbolized as 'axe, spear of destiny and scythe' to mark 'spatial dominion, integrity and presence, perseverance'. Thus, integral topographical deduction to iterate prosperity through work, auto-resolve and perennial harvest.

Economics have to be emphasized and/or keyed by 'sound morals' pertinent to 'production and consumption' for the sake of saying, contextual community, society/nation-state.

Cotton and Clove are connotations of Economic Tapestry; that Economy is all about 'Shelter and Food' for 'Self Sustenance'... That is to remind, economics is all about diplomacy--should the nation-state know better!

That is from the possibility of 'War' and 'Peace', nation-state building is all about 'self Determination' to ascend to the high peaks of 'Consciousness/All Seeing Peak' to thus 'charge the spirituality of one nation'-- the contexts of both 'National building' and 'National Defense'.

It is from the peak, One can have a 'Better Topographical Senses' to determine right context of 'Self Determination', light-Bodyself-shadows – Symbolized by the 'Adam and Eve' contexts of a woman and man ascending the mount of Glory--Mount Kilimanjaro; for Tanzania and Africa; climbing the mountain in coherent fashion and mutual reflections of acts to the peek of the Highest Mountain.

The Higher the sight, the strict the senses of morals...

Those hands holding the Elephant Tusks pertain to observing morality--the Yoga of unity through harmony... Thus the shield of Prosperity is the 'Yoni'--the vesca piscis, the mystic 'Tantric Touch; while combined with Elephant Tusks is the mystic of 'Yoga' to edify '[Shiva and Lingam](#)' -- the balance of Kundalini...

Education 3.0 edify Elephant's Tusk as key to Focus, Intention and Attention being the basis of mass/weight and so forth 'Gravity Waves'.

Mother Economies, are standard to other advanced Stellar and Interstellar civilization as key to ensuring abundance for material comfort. This makes our 'Mother economies' to be thus the beginning for terrestrial industries to link up with extraterrestrial 'economies'. In this regard, the *'Power That Be' wont like the prospects of Mother Economies* as it takes away their liberty to live in Darkness and perpetuate shadows of lives--tending 'human-zombies' as the walking dead in Death Economy. Thus, prospects of mother economies imbue 'salt and light of the world' to fire up the 'dead cells' of the walking Dead... then again, mother economies usher in the prospects of RESURRECTIONS; [Mother Russia Dream](#) -- [the longings of its early Cosmists](#).

=====

=====

The Call: Work, Dance and Sing our way to the Stars!

Technicalities of 'Thy Kingdom Come on Earth as it is heaven' are not 'entirely' figurative; they are practical propositions for Earthly Societies--Earthly societies to graduate for Interstellar communities , [greater communities realities, with merits and true worthiness to be the Ones](#).

Mari Swaruu, the Princess Queen of the Taygetans as of this June 2024, [sharing cultural details of her society means business to all who qualify for the 'Graduation'](#). In this regard, individuals who know themselves to be the Ones should not hesitate to embrace the

Lion's Hearts for Golden Consciousness. Thus, Golden Consciousness is Coded Christ Consciousness—when Golden Conscious Lights up with coded Fire of the Dragons— [Being Wise as Serpent and gentle as Doves](#); Kingdom of Heaven is in Inevitable on Earth.

Mari Swaruu, the Princess Queen of the Taygetans as of this June 2024, highlighted [interstellar cooperation cover all aspects of Food, Hospitality and Defense – through diplomacy and treaties](#) as diplomatic ties that may apply to Earth and thus She is open in these prospects with Earthly communities/Society. In this regard, the priority for grounding-- as we prepare to harmonize our horizontal and vertical pursuits is to ensure the complete elimination of Hunger on Earth—something that Africa as a strategic continental land mass can play a significant role. Thus, let it be asserted—no event is merely coincidental, Africa has been prepared, is being prepared and is going to be prepared by incarnated and dis-incarnating individuals and so forth natives and non-natives individuals.

[Pivoting the Superstructure](#) is key to **the 21st Century Dhamma Yantra**, so is the realization of [Mother Economy](#) in Global Human Society. These two propositions set stage for revolutionary and evolutionary citizens of all nations.

In Tanzania, specifically, every terrestrial human being can come and assert her/his right as 'evolutionary citizen' – fulfilling the 'Quest' – as it has been articulated by founding fathers of the nation, and of the African Nation --one of key architects for African Union—Julius K Nyerere.

As His Imperial Majesty Haile Selassie, founder of [\[url=https://au.int/en/overview\]](https://au.int/en/overview) [OAU and AU](#) once said:

[“We must become something we have never been and for which our education and experience and environment have poorly prepared us. We must be bigger than we've ever been: bravest, bigger in spirit and clearer in perspective. We must be members of a new race.](#)

There are specific laws and policies in Tanzania which can be amended and/or improved to adjust to new realities of Golden Consciousness; and they just require presence of critical mass to embody coded Christ Consciousness and a very handful of individuals, natives and non natives, to WORK THEM OUT in terms of Ideas and Principles – and it can be done.

Then again with given actionable intelligence, this is a call to all who know in their heart and Being— knowing themselves to be the Ones, arise and know better.

Whoever knows better, can do better.

Let ‘I and I’—‘Eye and Eye’—‘I in I’ come together and make it WORK.

Ites!
