Short Course Announcement – September 2013

STATISTICAL ANALYSIS USING MS EXCEL 2010

Duration: 4 days
Dates: September 17 – 20, 2013
Price: 300,000 TZS (excluding lunch)
Place: School of Social Sciences (MRL 4)-UDOM-Dodoma

Course outline

This training is organized by the department of Statistics, College of Natural and Mathematical Sciences of the University of Dodoma (UDOM).

This is a four days course designed to introduce Excel as a data analysis tool. It is designed for both non-statisticians and statisticians who wish to develop their basic statistical skills and understanding. By the end of the course, participants will be able to acquire some basic knowledge of data management using excel 2010 and understand some basic statistical concepts relating to data analysis. The course will cover;

- Data entry
- Descriptive data analysis
- Creation of pivot tables
- Inferential data analysis (causal-effect relationship among variables)

Mode of payment: All payments should be done through;

Account Name: **College of Natural and Mathematical Sciences**
Account no: **0150221567000**
Bank: **CRDB**

Please confirm fee payment and your participation by sending SMS or an email indicating your name using contact below.

Participants should come with their laptops and bank deposit slip. Certificate of attendance will be awarded.
