EDUCATION & ENTREPRENEURSHIP LTD

THE PROFESSIONAL COLLEGE OF NJOMBE.

E&E provides a high-quality technical/vocational education which enables low-income youth to get on a life path that leads to economic security, enabling them to support their families and contribute to the economic and social development of their communities.

To achieve these goals, E&E has established 10 small-scale, on-campus enterprises which will be run by teachers and students and sell goods and services in the local market. These enterprises serve as platforms for students to gain practical and entrepreneurial skills and put classroom learning into practice. At the same time, the enterprises are the means by which the social enterprise earns income through the sale of goods and services in the local market and become financially self-sustaining.

Mission &Vision

Vision: To promote an entrepreneurial spirit in vulnerable youths through a technical education that empowers them to overcome poverty in their lives and in their communities.

Mission: To promote rural development by providing a first-class agricultural technical and business education to low-income students. Additionally, the education must pay for itself through profits from the social enterprise's activities, thereby creating a financially sustainable and independent program.
